Unthinking Collaboration A. Carly Buxton, 2022-03-31 Unthinking

Collaboration uncovers the little-known history of Japanese Americans who weathered the years of World War II on Japanese soil. Severed from the country of their birth when the attack on Pearl Harbor abruptly halted all passenger traffic on the Pacific, these Nisei faced the years of total war as members of the Japanese populace, yet as the target of anti-American propaganda and suspicion. Whereas their white American counterparts were sequestered by Japanese authorities, placed on house arrest, or sent home on exchange ships during the war, American Nisei in Japan were left to contribute to the war effort alongside their Japanese neighbors as soldiers, cryptographers, interpreters, and in farming and manufacturing. When the dust of air raid bombings cleared, many such Nisei transitioned into roles in service of the Allied occupation and its goals of democratization and demilitarization. As censors, translators, interpreters, and administrative staff, they played integral roles in facilitating American-Japanese interaction, as well as in shaping policies and public opinion in the postwar era. Weaving archival data with oral histories, personal narratives, material culture, and fiction, *Unthinking Collaboration* emphasizes the heterogeneity of Japanese immigrant experiences, and sheds light on broader issues of identity, race, and performance of individuals growing up in a bicultural or multicultural context. By distancing “collaboration” from its default elision with moral judgment, and by incorporating contemporary findings from psychology and behavioral science about the power of the subconscious mind to influence human behavior, author A. Carly Buxton offers an alternative approach to history—one that posits historical subjects as deeply embedded in

the realities of their physical and discursive environment. Walking beside Nisei as they navigate their everyday lives in transwar Japan, readers “un-think” long-held assumptions about the actions and decisions of individuals as represented in history. The result is an ambitious historical study that speaks to readers who are interested in broader questions of race and trust, empire-building, World War II and its legacy on both the Western and Pacific fronts, and to all who consider questions of loyalty, treason, assimilation, and collaboration.

Peak Japan Brad Glosserman, 2019-04-01 The post-Cold War era has been difficult for Japan. A country once heralded for evolving a superior form of capitalism and seemingly ready to surpass the United States as the world's largest economy lost its way in the early 1990s. The bursting of the bubble in 1991 ushered in a period of political and economic uncertainty that has lasted for over two decades. There were hopes that the triple catastrophe of March 11, 2011—a massive earthquake, tsunami, and accident at the Fukushima Daiichi nuclear power plant—would break Japan out of its torpor and spur the country to embrace change that would restart the growth and optimism of the go-go years. But several years later, Japan is still waiting for needed transformation, and Brad Glosserman concludes that the fact that even disaster has not spurred radical enough reform reveals something about Japan's political system and Japanese society. Glosserman explains why Japan has not and will not change, concluding that Japanese horizons are shrinking and that the Japanese public has given up the bold ambitions of previous generations and its current leadership. This is a critical insight into contemporary Japan and one that should shape our thinking about this vital country.

Far Future Calling Olaf Stapledon,2015-12-17 Science fiction has its immortals - authors whose impact was so tremendous that they belong in a class by themselves. Olaf Stapledon extended the boundaries of science fiction to the infinite, and there are few of the major authors who do not directly or indirectly owe him a great debt. This volume of his short science fiction and fantasy includes in addition to the five stories, an uncollected radio script from which this volume takes its title and an uncollected 1948 address to the British Interplanetary Society.

Initiatives of institutional investors, social index providers, insurers, and banks are also covered. Websites for each instrument and its issuer are provided in order to facilitate updates and further inquiry into the issuer's activities.
