**Risk-Based Monitoring and Fraud Detection in Clinical Trials Using JMP and SAS** Richard C. Zink,2014-07 International guidelines recommend that clinical trial data should be actively reviewed or monitored; the well-being of trial participants and the validity and integrity of the final analysis results are at stake. Risk-based monitoring (RBM) makes use of central computerized review of clinical trial data and site metrics to determine if and when clinical sites should receive more extensive quality review or intervention. Risk-Based Monitoring and Fraud Detection in Clinical Trials Using JMP and SAS describes analyses for RBM that incorporate and extend the recommendations of TransCelerate Biopharm Inc., methods to detect potential patient-or investigator misconduct, snapshot comparisons to more easily identify new or modified data, and other novel visual and analytical techniques to enhance safety and quality reviews. The analytical methods described enable the clinical trial team to take a proactive approach to data quality and safety to streamline clinical development activities and address shortcomings while the study is ongoing.

**Marketing in the Round** Gini Dietrich, Geoff Livingston, 2012-04-24 Drive more value from all your marketing and communications channels--together! Demolish your silos and sync all your messaging, strategies, and tactics (really!). Optimize every medium and platform, from iPad and Facebook to TV and direct. This book is a must-read for every senior marketing, communications, and PR decision-maker. It's not about social media. Or new (or old) media. It's about results--and there's only one way to get results. You must finally bite the bullet, tear down your silos, and integrate all your marketing and communications. That's how you choose the best platforms and messages for each customer. That's how you make research and metrics work. That's how you

overcome today's insane levels of complexity and clutter. You're thinking: Oh, that's all I need to do? "Just" integrate my whole organization? Are you nuts? No. We're not. It can be done. This book's authors have done it. They've shown others how to do it. And now they're going to show you. Step by step. Strategy. Tactics. Research. Metrics. Culture. Social. Mobile. Direct. Broadcast. Print. All of it. With you, the marketing/communications decision-maker, right at the center...right where you belong! Even now, organizational silos prevent most companies from conversing coherently with customers, delivering the right targeted messages, and building real synergies across all their marketing and communications programs. Now, Gini Dietrich and Geoff Livingston show how to finally break down those silos, bridging traditional and newer disciplines to drive more value from all of them. You'll learn how to create a flexible marketing hub with integrated spokes including sales, PR, advertising, customer service, HR, social media, and the executive team. Then, you'll learn how to use your hub to speak cohesively with each customer through the tools and platforms that deliver the best results at the lowest cost. Dietrich and Livingston guide you through hands-on strategic planning, illustrating key points with real case studies and offering practical exercises for applying their principles. You'll learn how to perform baseline analyses of media from iPad apps to radio, optimize resource allocation, change culture to overcome siloed behavior, use measurement to clear away obstacles, and gain more value from every marketing investment you make. Pull it all together--finally! How to successfully integrate your tactics, tools, messages, and teams Better goals, better results: beyond "SMART" to "SMARTER" Specific, measurable, attainable, relevant, time-bound, evaluate, and reevaluate Better listening: stakeholders, customers, and research that works

How to make sure you hear what really matters Four powerful ways to market in the round When to go direct, come from above, use the groundswell, or execute flanking maneuvers

**Pervasive Design** Håkan Gulliksson, Services and products are increasingly composed of interconnected computerized things with embedded sensors and interaction capabilities. This trend is evident also in everyday objects and tools and is rapidly changing the way we live our lives. Design work and designers have to keep up with this development and adapt both thinking and tools. The problem is no longer just to design a physical object or interact with a single computational device and design is not even limited to the service embedding the device. Design needs to include all of the above while, importantly, also taking the particular context of use into account. This book presents a framework and a number of tools from a systems perspective that will help the designer take the step from designing a thing or a web site to designing a context aware pervasive service. As a first basis for this, three complementary interactors; Human, Information and Thing, along with the interactions they enable are introduced. This basis is used to infuse a way of thinking on pervasive services that is reapplied also to groups and joint ventures. Services are thoroughly introduced in the book along with their support, ranging from networked infrastructure for communication to cognitive by artificial intelligence. The design process is introduced by a discussion on the goals for design. Usability, value based design and meaningful user experiences are surveyed as guides for better designs. Beginning with the resultant understanding, the design process is

staged using the levels of service design, requirement analysis, concept, information, interaction, and appearance design. Relevant tools and an outline of the possible design space of mobile and pervasive applications are given for each level, and the design work is framed by an overall story-based approach. In total the book consists of 658 pages, 112 figures and 218 illustrations. Both text and ideas have improved from the third edition. One year Weiser. Håkan Gulliksson is a lecturer on Interaction technology and Mobile design at Umeå University Sweden. He has been the coordinator for the Master of Science program in Interaction and Design for more than ten years.

**You vs You** Todd Cahill, 2019-02-19 The greatest battles we face are with ourselves In *You vs You*, author Todd Cahill starts with a simple premise: As people strive for any improvement in their lives—whether it's more income, a better relationship, a promotion, a bigger business, or a better body—the most important battles they will face are against themselves. People invite problems into their lives through poor choices, apathy, indecision, arrogance, anxiety, selfishness, and other traits they would rather not discuss but must be addressed. In this valuable book, Cahill shares what he has learned about these battles that either keep people from success and significance or usher them to victory. As a life coach and leadership trainer, he has taught thousands of people these lessons, and many of them are now experiencing a level of personal achievement, relational abundance, and financial freedom they never thought possible. People often self-sabotage if they're not mindful, wise, and willing. Cahill reinforces the idea that readers can choose today to fight against who they once were (or are) and become who they are made to be. *You vs You* is about that choice and the challenging, rewarding quest that ensues.
