Little Girls and Nobel Prizes Andrew Sassani,Dr Andrew Sassani M D,2017-07-31 Girl-Empowerment at it's best. This book empowers girls with real-life examples that nothing can hold them back from pursuing what they love and achieving their dreams. This based-on-true-stories children's book highlights the lives, struggles, as well as educational & professional achievements of all female Nobel laureates from America. Despite life's biggest challenges and with their sheer Grit to pursue what they love, they broke professional-educational ceilings along the way and became America's female Nobel laureates. Along the way, they literally changed America and the world. Each woman is featured in her own chapter with a colorful portrait (at the end of each chapter). A few storied examples from the book:'''Her Dyslexia caused poor standardized test scores as a student. Yet, she won a Nobel Prize as an adult and became a Distinguished Professor at Johns Hopkins University.'''As a child of first-generation immigrants and without a formal PhD, she became the 1st woman inducted into Inventors Hall of Fame and received a Nobel Prize.'''She was rejected from entering a PhD program in Economics. Yet, she became the only woman in the world to win the Nobel Prize in Economics.'''Her parents escaped racism of the south. She grew up in poverty of the Great Depression. She was the only African American student in her first-grade class. She won a Nobel Prize and is a recipient of the Presidential Medal of Freedom.'''As a young woman, she had to work two secretarial jobs to pay for college. Years later, she won a Nobel Prize in medicine.'''As a child, her parents couldn't afford to raise her so they sent her to live with other family members. She grew up and became America's only woman to win an unshared Nobel Prize in Medicine.'''She suffered through starvation-related hospitalizations of World War in Europe. As a first-generation immigrant to the U.S. and despite facing gender discriminatory attitudes of the time, she went on to become America's 1st woman to win a Nobel Prize in science.'''She lost her mother at the age of 2. She lost four other siblings by the time she was 8. Her Tuberculosis of the spine forced her to walk with a limp. She became America's first-ever winner of a Nobel Prize and a co-founder of the American Civil Liberties Union (ACLU).

The Jewish Mothers' Hall of Fame Fred A. Bernstein,1986-04-02 For this wonderful collection, Fred A. Bernstein interviewed 25 mothers of famous and successful Jewish people, including, for example, Clara Sussman, mother of Rosalyn Yalow, a Nobel Prize winner in medicine: Like other mothers in the book, Clara exemplified a life of hard work and sacrifice, as well as worry about her child when a teacher told her Rosalyn was a genius (I never met the man Einstein but I heard he was a little peculiar). And also Leah Adler, mother of film director Steven Spielberg, who, Bernstein writes, was the funniest person he'd ever met, and readers will agree. With obvious love and pride, Leah kvetches about bringing up a peculiar son (I didn't know what the hell he was). The mothers in The Jewish Mothers' Hall of Fame lovingly report on their children—rock stars, a lawyer, a playwright, and other achievers, and at least two people more notorious than famous: porn film star Harry Reems and Yippie ex-convict Abbie Hoffman.

A to Z of Women in Science and Math Lisa Yount,2007 From ancient times to the present day, scientifically inclined women in many cultures have had to battle against the traditional belief that men are more cognitively adept than women. At times throughout history, women were persecuted for their attempts to break down traditional gender barriers. Today, women scientists and mathematicians must continue to defend the quality of their work and demand the respect they deserve in the mathematical and scientific communities.A to Z of Women in Science and Math, Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science. This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles. Among the profiles included are those of chemists, astronomers, geologists, environmental scientists, and a range of other professions and careers. In addition, new photographs have been added, and the bibliography has been updated. Subject indexes allow the reader to search by such professions as microbiology and paleontology.Additional subject indexes organize individuals by country of birth, country of major scientific activity, and year of birth.

Nobel's Women of Peace Michelle Benjamin,Maggie Mooney,2008-01-01 Each year since 1901, the Nobel Peace Prize has been awarded to a person who has made a difference in the world. Twelve women have been given this award, and each has her own fascinating story. Each had to struggle to be heard because she was a woman, and each one shares an incredible determination, commitment, and hope for the future. The most recent winner, Wangari Maathai of Kenya, has helped African women plant more than 30 million trees. How does planting trees promote peace? By improving the lives of communities. Aung San Suu Kyi of Burma has also fought to improve lives by trying to bring democracy to her country. MíÁiread Corrigan Maguire and Betty Williams worked to end violence in Northern Ireland, Jody Williams campaigns to ban landmines, and Mother Theresa was an example of compassion to millions. The courage of the women here will inspire.

Portrait of Gunnar Källén Cecilia Jarlskog,2013-10-21 Wolfgang Pauli referred to him as 'my discovery,' Robert Oppenheimer described him as 'one of the most gifted theorists' and Niels Bohr found him enormously stimulating. Who was the man in question, Gunnar Källén (1926-1968)? His appearance in the physics sky was like a shooting star. His contributions to the scientific debate caused excitement among young and old. Similar to his friend and mentor, Wolfgang Pauli, he demanded honesty and rigor in physics - a distinct dividing line between fact and speculation. In his obituary, Arthur S. Wightman would write: 'Gunnar Källén was a proud continuer of the tradition in quantum field theory established by Wolfgang Pauli. His papers on quantum electrodynamics in the period 1950-1954 carried the non-perturbative approach to quantum electrodynamics forward to a point beyond which very little essential progress has been made up to the present day. At the time I was trying to puzzle out the grammar of the language of quantum field theory, and here was Källén already writing poetry in the language!'. In addition to being a remarkable scientist, Källén had a very interesting personality, well worth exploring. In her book, physicist Cecilia Jarlskog traces both the personal and scientific trajectory of this unsung hero of the early days of high-energy physics and quantum field theory. A number of invited contributions by members of the Källén family and distinguished researchers from the field, all of them personally acquainted with Källén, combine to form an authentic portrait of the researcher and the man. Last but not least, the reader will become acquainted with some aspects of the history of particle physics in those days,

as related by Källén and those who corresponded with him. A commented selection of his most important and not easily accessible papers is included as an added bonus for specialists.

Loaded Words Marjorie Garber,2012-06-01 In Loaded Words the inimitable literary and cultural critic Marjorie Garber invites readers to join her in a rigorous and exuberant exploration of language. What links the pieces included in this vibrant new collection is the author's contention that all words are inescapably loaded—that is, highly charged, explosive, substantial, intoxicating, fruitful, and overbrimming—and that such loading is what makes language matter. Garber casts her keen eye on terms from knowledge, belief, madness, interruption, genius, and celebrity to humanities, general education, and academia. Included here are an array of stirring essays, from the title piece, with its demonstration of the importance of language to our thinking about the world; to the superb “Mad Lib,” on the concept of madness from Mad magazine to debates between Foucault and Derrida; to pieces on Shakespeare, “the most culturally loaded name of our time,” and the Renaissance. With its wide range of cultural references and engaging style coupled with fresh intellectual inquiry, Loaded Words will draw in and enchant scholars, students, and general readers alike.

Bob Dylan Harry Shapiro,2019-09-10 Bob Dylan: His Life in Pictures does exactly what the title says. In 256 pages with over 300 images it provides a timeline to this amazing career, showing highlights along with more mundane moments at home and on tour. Though this book may not help you to understand Dylan's lyrics, it provides a brilliant photographic background to his life and music. After a contextualizing introduction, Bob Dylan breaks his life into five chapters that cover the story decade by decade from the 1960s. Each chapter has a detailed timeline and a wealth of information. Robert Allen Zimmerman (as Bob Dylan was born) has had more impact on the music world than could normally be expected of one man. The quicksilver folk hero of the early 1960s has redefined himself regularly over the decades and remains as controversial and brilliant as ever. The voice of the 1960s protest movement, he has not stagnated—over the years, his music has incorporated many styles, including pop music, folk music, gospel, rock, and even jazz. The one continuous thread is that his music is intelligent and literary; he is a poet first and a songwriter—albeit a great songwriter—second. It is Dylan's words that have ensured his continued importance and not his aging voice. His peers rate him highly: Neil Young, himself no slouch in the music world, said of him in 2005: He's the master. If I'd like to be anyone, it's him. And he's a great writer, true to his music and done what he feels is the right thing to do for years and years and years. Joe Strummer praised Dylan as having laid down the template for lyric, tune, seriousness, spirituality, depth of rock music. And if you judge a musician by his awards, Dylan has done pretty well: from a Lifetime Achievement Award at the Grammys in 1990 to induction into the Rock and Roll Hall of Fame; from France's highest cultural award, the Commandeur dans l'Ordre des Arts et des Lettres to the Polar Music Prize from the Royal Swedish Academy of Music; from an honorary doctorate awarded by Princeton University (US) to an honorary degree at the University of St. Andrews (Scotland)—not to mention albums of the year, six entries in the Grammy Hall of Fame, a 2000 Academy Award, a 2001 Golden Globe and a 2008 Pulitzer Prize Special Citation. Get an intimate view of this legendary singer-songwriter, artist, and writer through this amazing photographic account of his life.
