*Covert Radio Agents, 1939-1945* David Hebditch,2021-03-03 “A treasure of a book...An authentic adventure saga [and] a very human story generously seasoned with ingenuity, technology and hardy individualism.” —K9YA Telegraph Includes photos and maps Clandestine radio operators had one of the most dangerous jobs of World War II. Those in Nazi-occupied Europe for the SOE, MI6, and OSS had a life expectancy of just six weeks. In the Gilbert Islands, the Japanese decapitated seventeen New Zealand coastwatchers. These highly skilled agents’ main tasks were to maintain regular contact with their home base and pass vital intelligence back. As this meticulously researched book reveals, many operators did more than that. Norwegian Odd Starheim hijacked a ship and sailed it to the Shetlands. In the Solomon Islands Jack Read and Paul Mason warned the defenders of Guadalcanal about incoming enemy air raids, giving American fighters a chance to inflict irreversible damage on the Japanese Air Force. In 1944 Arthur Brown was central to Operation Jodburch’s success delaying the arrival of the SS Das Reich armored division at the Normandy beachheads. The author also explains in layman’s terms the technology of 1940s radios and the ingenious codes used. Most importantly, Covert Radio Agents tells the dramatic human stories of these gallant behind-the-lines radio agents. Who were they? How were they trained? How did they survive against the odds? This is a highly informative and uplifting history of World War II’s unsung heroes.

Buttress’s World Guide to Abbreviations of Organizations Jean C. Swinbank,2012-12-06 This edition of over 60 000 entries, including significantly more than 20% new or revised material, not only updates its predecessor but also continues the policy of extending coverage to areas dealt with only sparsely in previous editions. Special attention has been paid to the Far East, Australasia and Latin America in general, and to the People's Republic of China in particular. The cross-referencing between a defunct organization and its successor (indicated by ex and now) introduced into the last edition, has been extended. Otherwise the policies adopted in previous editions have been retained. All kinds of organizations are included - international, national, governmental, individual, large or small - but strictly local organizations have been omitted. The subject scope includes activities of all kinds, in the fields of commerce and industry, education, law, politics, public administration, religion, recreation, medicine, science and technology. The country of origin of a national organization is given in brackets, unless it is the home country of the title language or can be deduced readily from the title itself. Acronyms of parent bodies of subsidiary organizations are also added in brackets. Equivalences are used to link acronyms in different languages for the same organization. A select bibliography guides the reader to specialist works providing more detailed information.

Wireless World ,1922

*Sport and the Media* Raymond Boyle,Peter Flood,Deirdre Kevin,2019-09-16 Sport and the Media examines how reliable sportscasting is in the anchor role, reviews the development of sportscasting and specialized sporting services as a response to audience demand, and questions how well the sporting enthusiast--the fan--is being served by later, unanticipated developments. While sport has had a long symbiotic relationship with communication systems, the advent of a digital media age has intensified that relationship, giving evidence of both continuity and substantial change in this relationship as both media systems and popular culture have entered a new century. Collectively, the articles give an authentic flavor of the issues--real and incipient--surrounding sports broadcasting, the media, and the audience as the next round of media consolidation and investment appears to be starting. In particular, they pose questions as to whether sports as a 'killer application' has actually encountered some natural limit, and whether the audience at-large has been well served within the more recent developments.

Testing Hearing Viktoria Tkaczyk,Mara Mills,Alexandra Hui,2020-09-01 Testing Hearing: The Making of Modern Aurality argues that the modern cultural practices of hearing and testing have emerged from a long interrelationship. Since the early nineteenth century, auditory test tools (whether organ pipes or electronic tone generators) and the results of hearing tests have fed back into instrument calibration, human training, architecture, and the creation of new musical sounds. Hearing tests received a further boost around 1900 as a result of injury compensation laws and state and professional demands for aptitude testing in schools, conservatories, the military, and other fields. Applied at large scale, tests of seemingly small measure-of auditory acuity, of hearing range-helped redefine the modern concept of hearing as such. During the twentieth and twenty-first centuries, the epistemic function of hearing expanded. Hearing took on the dual role of test object and test instrument; in the latter case, human hearing became a gauge by which to evaluate or regulate materials, nonhuman organisms, equipment, and technological systems. This book considers both the testing of hearing and testing with hearing to explore the co-creation of modern epistemic and auditory cultures. The book's twelve contributors trace the design of ever more specific tests for the arts, education and communication, colonial and military applications, sociopolitical and industrial endeavors. Together, they demonstrate that testing as such became an enduring and wide-ranging cultural technique in the modern period, one that is situated between histories of scientific experimentation and many fields of application.

**Buttress’s World Guide to Abbreviations of Organizations** L. Pitman,2012-12-06 The previous edition of this directory extended its coverage of the Far East, Australasia and Latin America, areas previously under-represented. For this new edition emphasis has been given to increasing the number of entries for organizations from Britain, the United States and Australia, and particular attention has been paid to new political organizations in Central and Eastern Europe and the former Soviet Union. The number of entries included has gone up to over 68,000 of which over 9,000 are new or amended. Cross-references from defunct organizations in the previous edition have been deleted, and references (indicated by ex and now) added for organizations which have changed their name since the previous edition. As before, the range of organizations included is broad and only purely local organizations have been excluded. This directory therefore lists official and unofficial organizations, national and international, on all SUBjects: political, economic and social. Acronyms of parent bodies of subsidiary organizations are given where appropriate and equivalencies are used to link acronyms in different languages for the same organization. Further information about the organizations listed can be found in the sources listed in the bibliography. I would like to thank Henry Heaney and Graeme Mackintosh for their advice, and David Grinyer for his technical support. L. M. Pitman Bibliography Adams, R. (ed.)
