Migration, Mobility and Place in Ancient Italy Elena Isayev, 2017-08-31 Migration, Mobility and Place in Ancient Italy challenges prevailing conceptions of a natural tie to the land and a demographically settled world. It argues that much human mobility in the last millennium BC was ongoing and cyclical. In particular, outside the military context 'the foreigner in our midst' was not regarded as a problem. Boundaries of status rather than of geopolitics were those difficult to cross. The book discusses the stories of individuals and migrant groups, traders, refugees, expulsions, the founding and demolition of sites, and the political processes that could both encourage and discourage the transfer of people from one place to another. In so doing it highlights moments of change in the concepts of mobility and the definitions of those on the move. By providing the long view from history, it exposes how fleeting are the conventions that take shape here and now.

Global Study on Homicide 2013 United Nations, 2014-06-15 The Global Study on Homicide 2013 is based on comprehensive data from more than 200 countries/territories, and examines and analyses patterns and trends in homicide at the global, regional, national and sub-national levels. Such analysis is fundamental to understanding the various factors and dynamics that drive homicide, so that measures can be developed to reduce violent crime. The Study provides a typology of homicide, including homicide related to crime, coexistence-related homicide, and socio-political homicide. The nature of crime in several countries emerging from conflict, the role of various mechanisms in killing, and the response of the criminal justice system to homicide are also analyzed. A further chapter examines homicide at the sub-national level, and includes analysis at the city-level for selected global cities.

The Geology of Thailand Michael Frederick Ridd, A. J. Barber, Michael J. Crow, 2011 This is the first volume in the English language to cover the entire range of the geology of Thailand since the joint Thai-US account by Brown et al. exactly 60 years ago. Over this period there has been a phenomenal growth in interest in this core area of SE Asia. This has been led by geologists in Thailand, but with important and highly significant input from geologists based elsewhere in Asia and in Europe, Australasia and North America. Some of that research was prompted by commercial considerations, since Thailand has important energy and mineral resources, while other research has sought to understand better the stratigraphic and structural history, including the plate-tectonic story which Thailand's rocks reveal. This new volume seeks to bring together all of this knowledge into a single accessible book; it is the work of an international team drawn from Thailand, Japan, Australia, USA, Canada, Germany and the UK.

Mafia Organizations Maurizio Catino,2019-02-07 How do mafias work? How do they recruit people, control members, conduct legal and illegal business, and use violence? Why do they establish such a complex mix of rituals, rules, and codes of conduct? And how do they differ? Why do some mafias commit many more murders than others? This book makes sense of mafias as organizations, via a collative analysis of historical accounts, official data, investigative sources, and interviews. Catino presents a comparative study of seven mafias around the world, from three Italian mafias to the American Cosa Nostra, Japanese Yakuza, Chinese Triads, and Russian mafia. He identifies the organizational architecture that characterizes these criminal groups, and relates different organizational models to the use of violence. Furthermore, he advances a theory on the specific functionality of mafia rules and discusses the major organizational dilemmas that mafias face. This book shows that understanding the organizational logic of mafias is an indispensable step in confronting them.
