**Philip Ball**

**English-Esperanto Dictionary** Bernard Eustace Long,1921

The Music Instinct Philip Ball,2010-09-02 From Bach fugues to Indonesian gamelan, from nursery rhymes to rock, music has cast its light into every corner of human culture. But why music excites such deep passions, and how we make sense of musical sound at all, are questions that have until recently remained unanswered. Now in *The Music Instinct*, award-winning writer Philip Ball provides the first comprehensive, accessible survey of what is known--and still unknown--about how music works its magic, and why, as much as eating and sleeping, it seems indispensable to humanity. Deftly weaving together the latest findings in brain science with history, mathematics, and philosophy, *The Music Instinct* not only deepens our appreciation of the music we love, but shows that we would not be ourselves without it. The Sunday Times hailed it as a wonderful account of why music matters, with Ball's passion for music evident on every page.

**Trees in Nineteenth-Century English Fiction** Anna Burton,2021-03-29 This is a book about a longstanding network of writers and writings that celebrate the aesthetic, socio-political, scientific, ecological, geographical, and historical value of trees and tree spaces in the landscape; and it is a study of the effect of this tree-writing upon the novel form in the long nineteenth century. *Trees in Nineteenth-Century English Fiction: The Silvicultural Novel* identifies the picturesque thinker William Gilpin as a significant influence in this literary and environmental tradition. *Remarks on Forest Scenery* (1791) is formed by Gilpin's own observations of trees, forests, and his New Forest home specifically; but it is also the product of tree-stories collected from 'travellers and historians' that came before him. This study tracks the impact of this accumulating arboreal discourse upon nineteenth-century environmental writers such as John Claudius Loudon, Jacob George Strutt, William Howitt, and Mary Roberts, and its influence on varied dialogues surrounding natural history, agriculture, landscaping, deforestation, and public health. Building upon this concept of an ongoing silvicultural discussion, the monograph examines how novelists in the realist mode engage with this discourse and use their understanding of arboreal space and its cultural worth in order to transform their own fictional environments. Through their novelistic framing of single trees, clumps, forests, ancient woodlands, and man-made plantations, Jane Austen, Elizabeth Gaskell, and Thomas Hardy feature as authors of particular interest. Collectively, in their environmental representations, these novelists engage with a broad range of silvicultural conversation in their writing of space at the beginning, middle, and end of the nineteenth century. This book will be of great interest to students,

researchers, and academics working in the environmental humanities, long nineteenth-century literature, nature writing and environmental literature, environmental history, ecocriticism, and literature and science scholarship.
