Ars nova John L. Nádas,Michael Scott Cuthbert,2017-07-05 In the early fourteenth century, musicians in France and later Italy established new traditions of secular and sacred polyphony. This ars nova, or new art, popularized by theorists such as Philippe de Vitry and Johannes de Muris was the among the first of many later movements to establish the music of the present as a clean break from the past. The rich music of this period, by composers such as Guillaume de Machaut and Francesco Landini, is not only beautiful, but also rewards deep study and analysis. Yet contradictions and gaps abound in the ars nova of the fourteenth and early fifteenth centuries- how do we read this music? how do we perform this music? what was the cultural context of these performances? These problems are well met by the ingenuity of approaches and solutions found by scholars in this volume. The twenty-seven articles brought together reflect the broad methodological and chronological range of scholarly inquiry on the ars nova.

Nova Vol. 4 Dan Abnett,Andy Lanning,2012-11-29 Collects Nova #19-22. Could it be --the return of the Nova Corps? Will things ever be the same for Richard Rider? What is the Worldmind up to, and what will it mean for the

future of the Human Rocket and the Nova Corps itself?!

Robotech: Remix #3 Brenden Fletcher,2019-12-11 Dana's arrival created a splinter timeline where she was never born, where everything feels like her past… but nothing is quite right. She doesn't belong but has no way to return to her reality — if it even exists anymore. But now an opportunity has arisen in the shape of two mysterious spaceships able to travel the multiple realities of the "Protoverse". Could this be Dana's path home? The pilot of one of the vessels appeared to recognize Dana, and later got into a brawl with Miriya. The other pilot, who had seemingly targeted Dana for elimination, crashlanded in the wasteland outside New Macross City… His Battloid and unconscious body were discovered by Jack Baker and Karen Penn — and he seems to be Rick Hunter! Seconds later, a giant hand smashed out from beneath the ground…

Deep Sky Objects David H. Levy,2011-02-02 Veteran comet hunter and eloquent popular astronomy writer David H. Levy takes amateur sky-watchers on a fascinating journey into deep space in this enthusiastic and informative survey of the many far distant yet observable objects in the night sky. Light years beyond our solar system, deep sky objects include such intriguing phenomena as double and triple stars, nebulae, galaxies, and quasars. Designed to be accessible for even beginners, Levy''s clear, elegant descriptions will guide astronomy buffs in any hemisphere and locale (light-polluted cities as well as dark countryside) to the wonders of our enormous universe. As the discoverer or codiscoverer of twenty-one comets, including the famous Shoemaker-Levy 9 that crashed into Jupiter in 1994, Levy has devoted many decades of experience to observing the night sky. Over the years he has located over 300 deep sky objects, of which more than 100 best and brightest are featured in this book. Levy offers a physical description and a

discussion of each object''s history and beauty, as well as a star atlas to aid in finding the objects. Proceeding from objects closest to our solar system to those farthest away, Levy gives readers an awe-inspiring glimpse into the structure of the cosmos. Complete with both color and black-and-white photos, plus many helpful illustrations, Deep Sky Objects is the ideal guide to the wonders of the universe for both experienced and novice star gazers.
