Nurses are Nuts A. E. L., 2019-12-26 Nurses have very busy jobs in the hospital, and the other hospital disciplines do not help nurses with their jobs, yet nurses always help them. There are lots of things that the other hospital disciplines can sometimes do to help nurses with their jobs, but they are never done. Nurses, on the other hand, can be found helping out many other disciplines with their jobs. Most of the things that nurses do for the other disciplines do not have to be done and should not be done, but when the other disciplines ask nurses for help with their tasks, the nurse will usually always help them out. There are lots of times when the nurse will do work for other hospital disciplines if those disciplines do not get there to do the job in question in a timely fashion. There are lots of jobs that other disciplines are supposed to do, and if they don't get done at all or in a timely fashion, the blame will fall on the nurse, especially if they involve the patient's safety, and the patient takes a turn for the worse if the job does not get done. Sometimes the nurse will volunteer to do another discipline's job when she does not have to do it. There are also times when the other discipline will ask the nurse to do something that he should do himself and will tell that nurse that he is too busy to do his own job! The nurse, regardless of how busy she is, cannot get the other disciplines to help her with her job. It is my hope that nurses will one day realize that a

large majority of what they do for other disciplines does not have to be done and should not be done by nurses.

Palliative Care Jean Lugton, Rosemary McIntyre, 2006-01-04 This title is directed primarily towards health care professionals outside of the United States. *Palliative Care: The Nursing Role* is an introductory text for nurses and other health care professionals who deliver palliative care across a range of settings. It lays a clear foundation of knowledge focusing on the

needs and perspectives of patients and families who face the challenge of advanced, incurable illness. The style is highly accessible yet challenges readers to analyze key issues that present within palliative care. Covering the wide range of care provision in hospices, hospitals and patients' homes, the book draws widely from practice based examples to explain and expand upon theoretical issues. Research evidence underpins each of the chapters. Guided activities encourage readers to reflect, in a focused way, on their clinical experience and current practice. This new edition has been fully updated to reflect ongoing developments and shifting trends in palliative care education and practice. It will suit the needs of both pre and post-qualifying students seeking to develop their knowledge and is well suited to practitioners working within either generalist or specialist palliative care settings, or within acute or community settings as well as those studying a range of palliative care educational curricula. The authors have a wide range of experience in palliative care and all are actively engaged in practice and/or education. A clear, broad-based approach offers a thorough introduction for the non-specialist nurse. Written and edited by an experienced team of nurses working in this field, grounding it in current practice. Learning outcomes listed at the start of each chapter aid learning and comprehension. Reflective practice activities and an outline of CPD is especially useful for students working independently. Case histories, recommended reading lists, and references provide a solid evidence base for clinically based practice and facilitate further study. Thoroughly revised and updated to reflect changes in policy direction. A new chapter on pain and symptom management. Revised content reflects the recent shift in the evidence base concerning spirituality. Includes psychosocial issues of loss for the patient, their

family, and careers.
