Having listened to the pronunciation guide I am happy now to recommend this text. Good points: case studies linked to UK practice, I like the combination approach, the study skills advice, the targetting of learning theory to learning A&P, including adrenaline with epinephrine in brackets, interspersing calculations as exercises, good test activities, good reading for intro to A&P (ch. 2), good references (eg ch3), good reference to child/infant for burn estimation, good clinical application (eg assessing peripheral perfusion activity - pinching nail), good to see photographs. It embraces a variety of approaches to learning, with chapters on the body systems, sections on learning the language of anatomy, reading the body map, biochemistry, and study skills.
