Education, Values and Ethics in International Heritage Jeanette Atkinson,2016-04-29 The changing and evolving relationship between museums and communities, Indigenous, ethnic and marginalized, has been a primary point of discussion in the heritage sector in recent years. Questions of official and unofficial heritage, whose artefacts to collect and exhibit and why, have informed and influenced museum practice. Developing from this, a key issue is whether it is possible to raise awareness of differing cultural perspectives, values and beliefs and incorporate this into the education and training of heritage professionals, with the aim of making 'cultural awareness' an integrated and sustainable core part of future heritage training and practice. This book discusses perceptions of values and ethics, authenticity and significance, and documents the historical, heritage and education context in North America, Scandinavia and the United Kingdom, with a particular emphasis on Aotearoa New Zealand. The author explores whether it is possible to learn respect for differing cultural perspectives through the undertaking of educational programmes, identifies various approaches that could complement the development of students and professionals in the cultural heritage and preservation sectors, and offers a means of actively engaging with cultural and professional values through a Taxonomy for Respecting Heritage and Values.

**Designing Sustainable Energy for All** Carlo Vezzoli,Fabrizio Ceschin,Lilac Osanjo,Mugendi K. M'Rithaa,Richie Moalosi,Venny Nakazibwe,Jan Carel Diehl,2018-05-17 This open access book addresses the issue of diffusing sustainable energy access in low- and middle-income contexts. Access to energy is one of the greatest challenges for many people living in low- income and developing contexts, as around 1.4 billion people lack access to electricity. Distributed Renewable Energy systems (DRE) are considered a promising approach to address this challenge and provide energy access to all. However, even if promising, the implementation of DRE systems is not always straightforward. The book analyses, discusses and classifies the promising Sustainable Product-Service System (S.PSS) business models to deliver Distributed Renewable Energy systems in an effective, efficient and sustainable way. Its message is supported with cases studies and examples, discussing the economic, environmental and socioethical benefits as well as its limitations and barriers to its implementation. An innovative design approach is proposed and a set of design tools are supplied, enabling readers to create and develop Sustainable Product-Service System (S.PSS) solutions to deliver Distributed Renewable Energy systems. Practical applications of the book's design approach and tools by companies and practitioners are discussed and the book will be of interest to readers in design, industry, governmental institutions, NGOs as well as researchers.

*Mineral Resources and Energy* Olivier Vidal,2017-11-25 Increasing the world's population to 9 billion by 2050 will lead to an increase in the need for raw materials that support basic human activities, as well as all developments in new technologies, mobility, energy. If current trends continue, projections indicate that to meet global needs by 2050, we will have to extract more metals from the subsoil than mankind has extracted since the inception. It is against this backdrop of strong demand for metals that energy and the transition to decarbonized energy production arise. The stakes associated with energy and mineral raw materials are indissociable because metals are necessary to build the infrastructures of production of energy, its storage and its distribution, but also because the energy is necessary to produce the raw materials. The offshoring of production weighs on the adaptive capacities of Western non-producing countries, which are currently confronted with the economic, political and technological emergence of producer countries such as China. Industries in developed non-producing countries are thus placed in a situation of great dependence on imports of fossil energy, but also mineral resources. In this highly competitive context, the stakes in raw materials and energy are considerable. Mineral Resources and Energy addresses these topics from the point-of-view of needs, notably to ensure the energy transition and primary production, recycling, technological innovation, economic and social issues. A chapter is devoted to modeling in order to understand and integrate these couplings in a global model. Increasing the world's population to 9 billion by 2050 will lead to an increase in the need for raw materials that support basic human activities. In this highly competitive context, the stakes in raw materials and energy are considerable. This book addresses these needs in order to ensure energy transition, primary production, recycling and technological innovation. Approaches the issues of commodities and energy in terms of needs, technological innovation and economic and social issues Emphasizes the couplings between these different aspects Helps readers understand and integrate these couplings through global modeling

Handbook of Research on Records and Information Management Strategies for Enhanced Knowledge Coordination Chisita, Collence Takaingenhamo,Enakrire, Rexwhite Tega,Durodolu, Oluwole Olumide,Tsabedze, Vusi Wonderboy,Ngoaketsi, Joseph M.,2021-01-15 The convergence of technologies and emergence of interdisciplinary and transdisciplinary modus of knowledge production justify the need for research that explores the disinterestedness or interconnectivity of the information science disciplines. The quantum leap in knowledge production, increasing demand for information and knowledge, changing information needs, information governance, and proliferation of digital technologies in the era of ubiquitous digital technologies justify research that employs a holistic approach in x-raying the challenges of managing information in an increasingly knowledge- and technology-driven dispensation. The changing nature of knowledge production for sustainable development, along with trends and theory for enhanced knowledge coordination, deserve focus in current times. The Handbook of Research on Records and Information Management Strategies for Enhanced Knowledge Coordination draws input from experts involved in records management, information science, library science, memory, and digital technology, creating a vanguard compendium of novel trends and praxis. While highlighting a vast array of topics under the scope of library science, information science, knowledge transfer, records management, and more, this book is ideally designed for knowledge and information managers, library and information science schools, policymakers, practitioners, stakeholders, administrators, researchers, academicians, and students interested in records and information management.

**Sustainability in Project Management** Gilbert Silvius,Ron Schipper,Julia Planko,Jasper van den Brink,2017-03-02 The concept of sustainability has grown in recognition and importance. The pressure on companies to broaden their reporting and accountability from economic performance for shareholders, to sustainability performance for all stakeholders is leading to a change of mindset in consumer behaviour and corporate policies. How can we develop prosperity without compromising the life and needs of future generations? Sustainability in Project Management explores and identifies the questions surrounding the integration of the concepts of sustainability in projects and project management and provides valuable guidance and insights. Sustainability relates to multiple perspectives, economical, environmental and social, but also to responsibility and accountability and values in terms of ethics, fairness and equality. The authors will inspire project managers to be aware of these considerations, and to apply them to the role they play in projects, not just 'doing things right' but 'doing the right things right'.

**Row-Level Security in Power BI** Reza Rad,2019-12-16 I have been writing and presenting about Row-Level Security in Power BI for many years. Through the comments and feedback I got from my presentations and articles, I felt a need for a place to have everything gathered in one place. The lack of a book that explains everything about the current subject motivated me to end up gathering all my articles in this book. The result is what you are reading. Row-Level Security in Power BI is not about sharing your content. It is, on the other hand, about sharing the same content with a different audience in the way that they see different views of the data. They will have different access to the data. Some of them might see the entire data, and some others might see part of the data that they are authorized to see. Instead of creating multiple reports with the same format, fields, calculations, and visualizations, and only making them different in filtering, the correct way to do it is through row-level security. This will make sure you have the maximum consistency and minimum maintenance for your Power BI project. This is not a book about theories. This is a hands-on book. There are tons of demos and examples with the code samples that you can try. You will learn through this book, what is row-level security. You will learn different types of security and patterns in which you will see the most common challenges for implementing the security and the solution to save them. The book starts with the basics of row-level security, then you will learn about static vs. dynamic row-level security. You will learn patterns such as everyone see their own data, but the manager sees a different view or users and profiles for branch managers. Or the organizational hierarchy, or even the many-to-many relationship challenge of row-level security etc. through this book. This book is not about how to create a report, build a visualization, connect to a dataset, or set up a gateway. If you want to learn those, I do recommend reading my other book: Power BI online book, from Rookie to Rock Star.
