Healthy Ageing in Singapore Sabrina Ching Yuen Luk, 2023-03-31 Singapore is the world's second-fastest ageing society and will become a super-aged society by 2030. This book fills an important research gap by examining Singapore's efforts to achieve healthy ageing. It draws on both semi-structured interviews and secondary data (e.g. government documents, journal articles, books, reports) to examine hot topics such as financial wellness of older adults, ageing in place, dementia friendly communities and digital connection with older adults in the time of the 2019 coronavirus disease (COVID-19). In the interviews, experts and professionals provide valuable insights into the issue of healthy ageing in Singapore. The book's goal is to provide a comprehensive portrait of healthy ageing in Singapore, while also sharing valuable lessons to help other countries achieve healthy ageing.

Corporate Governance and Banking in China Michael Tan, 2013-09-02 As China began its economic reforms in the late 1970s and made a transition from planned to a market economy, corporate governance of the banking sector became an increasingly pressing issue. Further, in the aftermath of the Asian Financial Crises in the late 1990s, Chinese authorities became acutely aware of the importance of corporate governance to ensure that their banking system would not suffer similar fates to those of other Asian countries. This book examines corporate governance in city commercial banks, which are the main source of loans to the dynamic small and medium enterprises that are crucial to the development of China's economy. By the end of 2008, there were 136 city commercial banks in China, 13 of which had foreign partners, and this book clearly demonstrates the positive effect of these foreign partnerships on corporate governance practices, in addition to financial performance. With evidence from extensive interviews with 10 city commercial banks in China, Michael Tan explores the different models of corporate governance, and in turn, asks which model is most suitable to China, how are Chinese authorities overcoming problems with corporate governance, and how do these problems compare with those in other transition economies? Whilst the primary focus of this study is on China's city commercial banks, there are lessons that apply much more broadly to the industry and it therefore will be invaluable to foreign banking institutions wishing to invest in China. This book will also be of great appeal to students and scholars of Chinese business and economics, corporate governance and banking.

The Simplicity Playbook for Innovators: Creating Lovable Experiences in a Complicated World Jin Kang Moller, 2020-08-24 Simplicity is a hard thing. As the legendary Jony Ive, Apple's former Chief Design Officer, once said, the challenge is to solve incredibly complex problems and make their resolution appear inevitable and incredibly simple. Today, as technology becomes more complex than we can process, how do we hold on to that precious thread of simplicity? How do we design products and systems that are human-centred? How do we put innovation back in our own hands, even as we drive radical digital transformation? The Simplicity Playbook for

Innovators shows the way. It introduces five strategic shifts that will transform the way you look at your business - from customer research to product/service development. In each strategic shift, you will find a wealth of practical tools that have been applied and tested, particularly in legacy companies dealing with complex processes and systems. When we focus on simplicity instead of innovation-for-the-sake-of-innovation, customers love the experience. With this illuminating step-by-step guide, you will rediscover how to focus on what really matters for your business, and learn the methods to create experiences that win customers' hearts

Party Autonomy in Contractual Choice of Law in China Jieying Liang,2018-03-22 The principle of party autonomy in contractual choice of law is widely recognised in the law of most jurisdictions. It has been more than 30 years since party autonomy was first accepted in Chinese private international law. However, the legal rules provided in legislation and judicial interpretations concerning the application of the party autonomy principle are abstract and open-ended. Without a critical understanding of the party autonomy principle and appropriate interpretations of the relevant legal rules, judges have not exercised their discretionary power appropriately. The party autonomy principle has been applied in a way that undermines its very purpose, that is, to protect the legitimate expectations of the parties and promote the predictability of outcomes in transnational commercial litigation. Jieying Liang addresses the question of how, when, and with what limitations, parties' choice of law clauses in an international commercial contract should be enforced by Chinese courts.

Finance in Asia Qiao Liu,Paul Lejot,Douglas W. Arner,2013-03-12 Asia's demand for second-generation financial institutions and markets needs to be met in order for the region's further development to be sustained. This book provides a compelling, fact-based assessment of current practices and regulations in Asia's financial institutions and markets and carefully documents the exciting opportunities and challenges that lie ahead in the region's financial systems. This book differs in design from typical treatments of financial institutions and markets because its focus is on Asia rather than using the US model (in terms of market configurations or products) as a benchmark, and it takes a contemporary and forward-looking view of financial markets. Examples of practice from Asia are used to illustrate major accepted themes in finance and financial regulation. To the extent that Asia's main economies share characteristics that are distinct, for example, in the relationship between government and the banking sector, or in aspects of corporate governance, the book will discuss the consequences for market operation and intermediation. The book's carefully structured facts and rigorously argued analysis carry important implications both for students in business and law and for professionals new to financial markets in Asia. It will change the way that Asian financial markets and institutions is taught in universities as well as provide a valuable resource for professionals working in finance in Asia.

Financial Valuation And Econometrics (2nd Edition) Kian Guan Lim, 2015-04-15 This book is an introduction to financial valuation and financial data analyses using econometric methods. It is intended for advanced finance undergraduates and graduates. Most chapters in the book would contain one or more finance application examples where finance concepts, and sometimes theory, are taught. This book is a modest attempt to bring together several important domains in financial valuation theory, in econometrics modelling, and in the empirical analyses of financial data. These domains are highly intertwined and should be properly understood in order to correctly and effectively harness the power of data and statistical or econometrics methods for investment and financial decision-making. The contribution in this book, and at the same time, its novelty, is in employing materials in basic econometrics, particularly linear regression analyses, and weaving into it threads of foundational finance theory, concepts, ideas, and models. It provides a clear pedagogical approach to allow very effective learning by a finance student who wants to be well equipped in both theory and ability to research the data. This is a handy book for finance professionals doing research to easily access the key techniques in data analyses using regression methods. Students learn all 3 skills at once – finance, econometrics, and data analyses. It provides for very solid and useful learning for advanced undergraduate and graduate students who wish to work in financial analyses, risk analyses, and financial research areas.

Islamic Banking & Finance in South-East Asia Angelo M. Venardos, 2006 To truly understand the current interest in the development of Islamic banking and finance in South-East Asia and how it is different from the conventional

banking system, one must first understand the religious relationship originating from the Qur'an, and then trace the historical geographic and political developments of Islam over recent centuries. Only on this basis can the reader, without prejudice or cynicism, begin to appreciate Shari'ah law and Islamic jurisprudence. With this platform established in the first part of the book, readers are invited to learn about the financial products and services offered, understand the challenges in their development, and ultimately recognize the significant opportunities that Islamic banking and finance can provide both Muslims and non-Muslims. This second edition contains updates of statistics and dates with regards to the development of Islamic banking in Malaysia, Singapore, Indonesia and Brunei. In particular, the chapter on Singapore details significant developments such as the direction which major banks are taking towards Islamic banking and the increase in Islamic banking products being offered. Although written by a non-Muslim author, this highly-regarded book is being translated into Arabic by a leading Islamic university in the Middle East.

Asia's Energy Revolution Joseph Jacobelli, 2021-06-21 Asia is home to 60 per cent of the world's population, including the world's two most populous nations, China and India. The region's economic gains and rising middle class are accelerating demand for more consumer goods and a better quality of life. For further economic growth to be realised, the region will need a massive supply of additional energy, three- to five-fold 2020's amount by 2050. These changes create new business and investment opportunities for domestic companies and overseas participants. Asia's energy market, already the world's biggest, will soon be the most advanced. There will be mass adoption of digital technologies, like artificial intelligence, to make the distribution of solar, wind and other clean resources, smarter and more efficient. Led by China, billions of dollars in capital investment will drive the region's shift to green, sustainable energy, replacing polluting and expensive fossil fuels, which will help to rein in climate change. In *Asia's Energy Revolution*, leading energy markets analyst and practitioner Joseph Jacobelli explains why Asia is the world's most important territory for energy transition, how developments in the region will drive change in the rest of the world as well as how it will all be financed. The book discussion includes: Analysis of past events and forward-looking analysis of the industry in the region encompassing commercial, economic, and financial aspects Appraisal of new energy technologies, such as electric vehicles, and digital solutions, such as blockchain for energy Review of the capital flows and sustainable financing channels needed to fund energy infrastructure and tech growth

No Such Thing as Can'T Dahlan Iskan, 2011-06-21 NISP BANK In the waning days of Dutch rule over Indonesia, a poor Chinese merchant bought the license to a bank named NV Nederlandsch Indische Spaar en Deposito (NISP) paid by his assets to the last pennies., and ran the bank successfully. By tradition, he was obligated to express his gratitude for the fortune by paying homage to his ancestors burial place in China. His return to Indonesia, however, was hindered for a long 16 years. The responsibility for the bank, which had been ruined by senior managers' embezzlement, fell to his son-in-law, Karmaka, a teacher with only a high school degree. Through die-hard determination, and a noble personality of respect to elders, true to his words, fair play with enemies, and

compassion to the meeks, Karmaka overcame incredible calamities, including the national economic turmoil of 1960 and the Asian economic crisis of 1997, and grave threats to his health that resulted in risky liver and kidney transplants. Karmaka and his resourceful wife not only kept NISP alive and thriving, but also molded the character of their five children, two of whom became the bank's executives. A solid partnership with IFC-World Bank Group and OCBC Bank of Singapore has paved the way for NISP, recognized as the sole survivor from the past 70 years of Indonesian private banking history, to rise even further in the new millennium. It has been really a pleasure and privilege to have Pak Karmaka as a very good friend and reliable partner for many years. We greatly admire his strong determination in saving as well as rebuilding Bank NISP and guiding the merger of OCBC and NISP. We have full confidence that our partnership in Bank OCBC NISP will be a truly successful one. - Mr Lee Seng Wee, former Chairman, OCBC Bank Group.
