Understanding Airspace, Objects, and Their Effects on Airports ,2010 ACRP Report 38: Understanding Airspace, Objects, and Their Effects on Airports provides a comprehensive description of the regulations, standards, evaluation criteria, and processes designed to protect the airspace surrounding airports. Aviation practitioners, local planning and zoning agencies, and developers all have a need to understand and apply the appropriate airspace design and evaluation criteria to ensure a safe operating environment for aircraft, to maintain airport operational flexibility and reliability, without unduly restricting desirable building development and attendant economic growth in the surrounding community.

Digital Microwave Communication George Kizer,2013-05-22 The first book to cover all engineering aspects of microwave communication path design for the digital age Fixed point-to-point microwave systems provide moderate-capacity digital transmission between well-defined locations. Most popular in situations where fiber optics or satellite communication is impractical, it is commonly used for cellular or PCS site interconnectivity where digital connectivity is needed but not economically available from other sources, and in private networks where reliability is most important. Until now, no book has adequately treated all engineering aspects of microwave communications in the digital age. This important new work provides readers with the depth of knowledge necessary for all the system engineering details associated with fixed point-to-point microwave radio path design: the why, what, and how of microwave transmission; design objectives; engineering methodologies; and design philosophy (in the bid, design, and acceptance phase of the project). Written in an easily accessible format, Digital Microwave Communication features an appendix of specialized engineering details and formulas, and offers up chapter coverage of: A Brief History of Microwave Radio Microwave Radio Overview System Components Hypothetical Reference Circuits Multipath Fading Rain Fading Reflections and Obstructions Network Reliability Calculations Regulation of Microwave Radio Networks Radio Network Performance Objectives Designing and Operating Microwave Systems Antennas Radio Diversity Ducting and Obstruction Fading Digital Receiver Interference Path Performance Calculations Digital Microwave Communication: Engineering Point-to-Point Microwave Systems will be of great interest to engineers and managers who specify, design, or evaluate fixed point-to-point microwave systems associated with communications systems and equipment manufacturers, independent and university research organizations, government agencies, telecommunications services, and other users.

Best Practices for Airport Obstruction Management Guidebook ,2019 TRB's Airport Cooperative Research Program (ACRP) Research Report 195: Best Practices for Airport Obstruction Management Guidebook is designed to assist airport operators in developing and implementing an obstruction management program to protect the airport airspace from encroachment by tall objects. The guidance will help airport staff in developing an obstruction management plan by understanding the regulatory environment, identifying obstructions, and in developing a strategy for communication with surrounding communities that will ensure airport involvement in any development issues that could result in an obstruction around the airport.

Aviation Systems Andreas Wittmer,Thomas Bieger,Roland Müller,2011-08-17 This book aims to provide comprehensive coverage of the field of air transportation, giving attention to all major aspects, such as aviation regulation, economics, management and strategy. The book approaches aviation as an interrelated economic system and in so doing presents the “big picture” of aviation in the market economy. It explains the linkages between domains such as politics, society, technology, economy, ecology, regulation and how these influence each other. Examples of airports and airlines, and case studies in each chapter support the application-oriented approach. Students and researchers in business administration with a focus on the aviation industry, as well as professionals in the industry looking to refresh or broaden their knowledge of the field will benefit from this book.

A Commentary on Apollonius Rhodius Argonautica III, 1-471 Malcolm Campbell,2018-07-17 This is a commentary on the third book of Apollonius' Argonautica, one of the most influential and admired products of the Hellenistic era. The author sets out to deal comprehensively with all important aspects of the work; in particular, proper attention is paid for the first time to the poet's constant manipulation of the two Homeric epics; many thorny problems of text and interpretation are examined afresh; and a wealth of hitherto unadduced illustrative material drawn from Greek and Roman poetry of various genres and periods is used to shed light on a number of issues. The volume closes with a series of detailed digressive indexes dealing with diction, models and imitations, language and style, metre, transmission, mythology, religion, geography, ethnography and aetiology.

The Nature of Sympathy Max Scheler,2017-07-28 The Nature of Sympathy explores, at different levels, the social emotions of fellow-feeling, the sense of identity, love and hatred, and traces their relationship to one another and to the values with which they are associated. Scheler criticizes other writers, from Adam Smith to Freud, who have argued that the sympathetic emotions derive from self-interested feelings or instincts. He reviews the evaluations of love and sympathy current in different historical periods and in different social and religious environments, and concludes by outlining a theory of fellow-feeling as the primary source of our knowledge of one another.A prolific writer and a stimulating thinker, Max Scheler ranks second only to Husserl as a leading member of the German phenomenological school. Scheler's work lies mostly in the fields of ethics, politics, sociology, and religion. He looked to the emotions, believing them capable, in their own quality, of revealing the nature of the objects, and more especially the values, to which they are in principle directed.
