Management Consulting Introduction: What Does a Consultant Do and Best Practices Chris Haroun, 2016-01-16 Many business concepts are simply common sense. This book will focus on high level consulting concepts that you need to know that might not be common sense! This book is a great introduction to consulting and assumes that the reader has no background in consulting! Most business books are significantly outdated. This book leverages incredible online resources and makes the whole consulting process very easy! There are some incredibly engaging and entertaining video links in the book to YouTube and other sources; edutainment rocks! I tried to visualize the content of this book as much as possible as this is a more impactful and enjoyable way to learn (think Pinterest versus the tiny words in the Economist)! The contents of this book are all based on my work experience at several firms, including Goldman Sachs, the consulting industry at Accenture, a few companies I have started, the hedge fund industry where I worked at Citadel and most recently based on my experience at a prominent San Francisco based venture capital firm. I will also include helpful practical business concepts I learned while I did an MBA at Columbia University and a Bachelor of

Commerce degree at McGill University. Think of this book as a greatest hits accounting summary from my MBA, undergraduate business degree, work experience in consulting, equities, hedge funds, venture capital and starting my own companies. I have also included two bonus chapters on incredibly important business best practices and recent trends that many people often overlook in business. As the title of this book suggests, this is a great introduction to consulting. I have minimized boring theoretical concepts in this book in order to keep it as close to reality as possible. I hope you enjoy it! In addition to teaching at 4 universities in the Bay Area, you can find other courses that I teach online at : www.tiny.cc/chris1 I hope you enjoy this book! I am a firm believer that 'edutainment' works best!

Disruptive consulting: How to consistently earn \$850/hour as a consultant Adriaan Brits,2015-11-09 Disruptive consulting: How I consistently earn \$850/hour as a consultant A consulting career offers unrivalled freedom and flexibility. Proliferated by the mindset of alliance rather than employment which has gripped the corporate world, it has become an increasingly desired occupation for most professionals. Today more than ever, corporates are aware of the benefits consulting offers, namely access to a fresh perspective and expertise without the need to commitment or to involve a new player in the intricate, sensitive or political aspects of the organization. It really is a win-win to both the consultant and the client, however many consultants are yet to find a strategy to make sure their diaries duly overbooked. In this publication, I am going to share with you how I consistently earn \$850/hour as a solo consultant, with clients chasing me to fill up my diary. Just as Amazon disrupted retail and Airbnb disrupted hotels, this publication is about how to disrupt the consulting industry: You will learn powerful, effective hacks to obtain highly paid consultancy work. It is therefore assumed that you are already competent and professional in your field but that you are lacking opportunities for

consulting – and need a proven way to make sure clients will chase you for business and not the other way around. However in this publication, we are not going to focus on how to become competent in your field, how to behave properly and professionally towards clients, or for that matter, how to draw up a legal agreement. It is therefore not intended as a guide for incompetent individuals to pretend that they are consultants – and to get paid for it. Neither is it intended as a guide on how to access large pots of government funding without reciprocating value. The good news is that the following four activities does not form part of this proven strategy at all: 1. Spending any money on advertising 2. Making any cold calls 3. Begging for referrals 4. Working as a slave for Facebook or any other social media platform to get noticed Since my background is in marketing, I established a way of making my marketing activities self-funded, or as the CIA would call it, “living of the land”. In fact, by the time a potential client contacts me, most of the “selling” has already been done and it is more a matter of determining whether the client will be a good fit for me or not. In all honesty: whilst I have a MSC in Marketing and owned a few companies, I would not go as far as to describe myself as the world’s leading authority on consulting, however I have developed

one of the most innovative ways to ensure that my diary is ALWAYS full – and that I can decline any work which I do not think is going to be a good fit. The model that we are going to discuss is perfectly suitable for consultants in the areas of Business & Finance, IT, Marketing, Sales, Security and a range of professions. Whether you are a technical, business or executive consultant, the principles will still apply. Please read my feedback on various digital channels before starting with the book. Enjoy your newly found profession!

The Ultimate Guide to College Safety Peter J. Canavan, 2018-08-29 New college students are led to believe that sharing personal information and freely expressing their opinions on social media is expected and their right to free speech. What they fail to understand is that any information they reveal may be

used to steal their identity, prevent them from being hired and possibly even get them hurt or killed. It is well known that college is a time for learning, experiencing and growing as a person...but it is little understood that it is also the point in time when students form relationships, political beliefs, attitudes, and habits that will shape them for the rest of their lives. The influence of their friends, teachers and the social and political climate on campus are huge factors in their development - both good and bad. Understanding and learning can help parents assist their sons and daughters avoid future pitfalls and grow up to be successful, productive members of society. There is nothing more important than your personal safety and the safety of your family. Safety has become the highest priority for students, parents, educators and administrators. However, the educational tools and reference guides that contain this essential information for them is lacking since most safety material focuses on the school itself and public safety professionals, not the individual. Today's college students face threats to their personal safety that generations before did not have to deal with. New problems exist in both the digital world and the physical world, and can be harmful or even deadly. Thinking a problem won't happen to you will not make it any less likely. The

solution is to be aware of what threats exist, learn how to protect yourself, and know what steps to take should a problem arise to you or around you. You can give your child the most comprehensive resource ever compiled about how to stay safe in both the physical world and digital world. This will help ensure that students are made aware of the various threats to their personal safety that exist both online and offline so they will ultimately be safer during their college years and beyond. The author has worked as an information technology consultant since 1995, a self-defense instructor for over 20 years, and is a former university public safety professional. He is fully qualified to educate students and others based on decades of knowledge that has been distilled into this comprehensive book. Topics include: defining safety concerns safety awareness establishing personal boundaries routines & comfort zones problem roommate(s) bullying, cyberbullying & hazing the dangers of mixing alcohol and energy drinks cyber-security & online safety social media & cell phone safety phishing scams & identity theft active shooter preparedness & defensive actions viruses, malware and ransomware physical threat self-defense / safe dating / sexual harassment alcohol, drugs and prescription medication abuse party, bar & club safety caffeine

and energy drinks travel safety - both on campus and semesters abroad credit card and ATM safety dorm room safety - fires, electrical, cooking, outside threats personal safety alarms and apps building confidence & developing a never quit attitude health, fitness, nutrition & hygiene Get the next best thing to being there for your child when they are away from home and your protection.
