*The Globally Familiar* Ethiraj Gabriel

Dattatreyan, 2020-09-14 In *The Globally Familiar* Ethiraj Gabriel Dattatreyan traces how the rapid development of information and communication technologies in India has created opportunities for young people to creatively explore their gendered, classed, and racialized subjectivities in and through transnational media worlds. His ethnography focuses on a group of diverse young, working-class men in Delhi as they take up the African diasporic aesthetics and creative practices of hip hop. Dattatreyan shows how these aspiring b-boys, MCs, and graffiti writers fashion themselves and their city through their online and offline experimentations with hip hop, thereby accessing new social, economic, and political opportunities while acting as consumers, producers, and influencers in global circuits of capitalism. In so doing, Dattatreyan outlines how the hopeful, creative, and vitally embodied practices of hip hop offer an alternative narrative of urban place-making in digital India.

**Making India Disaster Resilient** Vishwa Raj Sharma,

## **Geospatial Technology and Smart Cities** Poonam

Sharma,2021-07-06 This book presents fundamental and applied research in developing geospatial modeling solutions to manage the challenges that urban areas are facing today. It aims to connect the academics, researchers, experts, town planners, investors and government officials to exchange ideas. The areas addressed include urban heat island analysis, urban flood vulnerability and risk mapping, green spaces, solar energy, infrastructure management, among others. The book suggests directions for smart city research and outlines practical propositions. As an emerging and critical area of research and development, much research is now being done with regard to cities. At the international level and in India alike, the “smart cities” concept is a vital topic for universities and research centers, and well as for civic bodies, town planners and policymakers. As such, the book offers a valuable resource for a broad readership.

*EachOneTeachTen* Namya Joshi,2022-09-30 There is no girl or boy gamer. A gamer is a gamer. I am Namya Joshi and have spent the last four years designing and delivering free of cost coding workshops for more than 10,000 teachers, young people, especially girls, in India and all over the world, as well as empowering other young people to run their own coding clubs. I have raised awareness about the social issues using game based learning with STEM. My parents are from the field of IT. And if I go by people’s perception it’s quite obvious I will pursue the same field as it is genetic. But my purpose has always been very clear that why do we see very less girls in this field? You will see boys dominating the field of computer sciences and field of IT. Dreams come true only when you believe in them, and meeting Satya Nadella, the CEO of Microsoft, a man with exceptional leadership and delivery skills, was

one such dream. This lockdown gave me strength, and the skills I learned paved the way for me to start the #GirlsInStem club. This was a perfect example of my credo, #EachOneTeachTen. For my ongoing efforts of creating and empowering others, I was honoured with the Pradhan Mantri Rastriya Bal Puraskar, India's highest civilian award for an individual under the age of 18 years old. When we inspire girls to pursue careers in STEM, a glass ceiling will vanish. I was inspired by an incident. Who knows the next person out of you reading might be here ....have faith and belief and see magic happening in your life.
