Tar Sands Andrew Nikiforuk,2010-08-01 Tar Sands critically examines the frenzied development in the Canadian tar sands and the far-reaching implications for all of North America. Bitumen, the sticky stuff that ancients used to glue the Tower of Babel together, is the world's most expensive hydrocarbon. This difficult-to-find resource has made Canada the number-one supplier of oil to the United States, and every major oil company now owns a lease in the Alberta tar sands. The region has become a global Deadwood, complete with rapturous engineers, cut-throat cocaine dealers, Muslim extremists, and a huge population of homeless individuals. In this award-winning book, a Canadian bestseller, journalist Andrew Nikiforuk exposes the disastrous environmental, social, and political costs of the tar sands, arguing forcefully for change. This updated edition includes new chapters on the most energy-inefficient tar sands projects (the steam plants), as well as new material on the controversial carbon cemeteries and nuclear proposals to accelerate bitumen production.

Soil Testing and Plant Analysis ,1967

North of the DMZ Andrei Lankov,2014-01-10 The Kim dynasty has ruled North Korea for over 60 years. Most of that period has found the country suffering under mature Stalinism characterized by manipulation, brutality and tight social control. Nevertheless, some citizens of Kim Jong Il's regime manage to transcend his tyranny in their daily existence. This book describes that difficult but determined existence and the world that the North Koreans have created for themselves in the face of oppression. Many features of this world are unique and even bizarre. But they have been created by the citizens to reflect their own ideas and values, in sharp contrast to the world forced upon them by a totalitarian system. Opening chapters introduce the political system and the extent to which it permeates citizens' daily lives, from the personal status badges they wear to the nationalized distribution of the food they eat. Chapters discussing the schools, the economic system, and family life dispel the myth of the workers' paradise that North Korea attempts to perpetuate. In these chapters the intricacies of daily life in a totalitarian dictatorship are seen through the eyes of defectors whose anecdotes constitute an important portion of the material. The closing chapter treats at length the significant changes that have taken place in North Korea over the last decade, concluding that these changes will lead to the quiet but inevitable death of North Korean Stalinism. Instructors considering this book for use in a course may request an examination copy here.

Biomass and Bioenergy Khalid Rehman Hakeem,Mohammad Jawaaid,Umer Rashid,2014-08-25 Biomass obtained from agricultural residues or forest can be used to produce different materials and bioenergy required in a modern society. As compared to other resources available, biomass is one of the most common and widespread resources in the world. Thus, biomass has the potential to provide a renewable energy source, both locally and across large areas of the world. It is estimated that the total investment in the biomass sector between 2008 and 2021 will reach the large sum of \$104 billion. Presently bioenergy is the most important renewable energy option and will remain so the near and medium-term future. Previously several countries try to explore the utilization of biomass in bioenergy and composite sector. Biomass has the potential to become the world's largest and most sustainable energy

source and will be very much in demand. Bioenergy is based on resources that can be utilized on a sustainable basis all around the world and can thus serve as an effective option for the provision of energy services. In addition, the benefits accrued go beyond energy provision, creating unique opportunities for regional development. The present book will provide an up-to-date account of non-wood, forest residues, agricultural biomass (natural fibers), and energy crops together with processing, properties and its applications to ensure biomass utilization and reuse. All aspects of biomass and bioenergy and their properties and applications will be critically re-examined. The book consists of three sections, presenting Non wood and forest products from forestry, arboriculture activities or from wood processing, agricultural biomass (natural fibers) from agricultural harvesting or processing and finally energy crops: high yield crops and grasses grown especially for energy production.

A Bibliography of the Literature on North American Climates of the Past 13,000 Years DONALD K. GRAYSON,2021-10 Originally published in 1975, this extensive bibliography has been drawn from archaeological, botanical, geological, meteorological and zoological sources. It covers those studies which deal with periods of time for which modern observational data are not available. Included sources range from those which make minor contributions to our understanding of North American paleoclimates to those whose impacts upon this understanding have been considerable.

Great Leader, Dear Leader Bertil Lintner, 2005 Great Leader, Dear Leader is an absorbing expose of North Korea under the Kim clan--Great Leader Kim Il Sung and his son, Dear Leader Kim Jong Il. It traces the origin of the regime's ideology and investigates its attempts to fill the empty state coffers through missile technology sales and other unorthodox schemes. It examines the regime's relations with South Korea, the countrywide famine and the *juche* ideal, the military first policy, and the nuclear weapons program. Bertil Lintner, one of the very few Western journalists to visit North Korea in 2004, aims to demystify rather than demonize the least known of the axis of evil countries by interviewing Koreans from both sides of the divided peninsula as well as ethnic Koreans in Japan and leading Korea experts outside the country.

The Future of War George Friedman, Meredith Friedman, 2002-02-01 The 21st century, even more than the 20th, will be the American century, & that America's global dominance will be associated with a revolution in weaponry & warfare as basic as the one that arose with the development of gunpowder 500 years ago. We are entering the age of Precision-Guided Munitions, the so-called smart weapons that will antiquate the traditional way of making war. These new projectiles are precise & lethally efficient, & they can devastate from any distance. The innovations in weapons tech'y. will affect America's defense strategies, reshaping our mil. forces, while confronting us with new strategic challenges as America enters the 21st century as the dominant world power.
