Christian Rudder

Dataclysm Christian Rudder, 2014-09-09 A New York Times Bestseller An audacious, irreverent investigation of human behavior—and a first look at a revolution in the making Our personal data has been used to spy on us, hire and fire us, and sell us stuff we don't need. In *Dataclysm*, Christian Rudder uses it to show us who we truly are. For centuries, we've relied on polling or small-scale lab experiments to study human behavior. Today, a new approach is possible. As we live more of our lives online, researchers can finally observe us directly, in vast numbers, and without filters. Data scientists have become the new demographers. In this daring and original book, Rudder explains how Facebook likes can predict, with surprising accuracy, a person's sexual orientation and even intelligence; how attractive women receive exponentially more interview requests; and why you must have haters to be hot. He charts the rise and fall of America's most reviled word through Google Search and examines the new dynamics of collaborative rage on Twitter. He shows how people express themselves, both privately and publicly. What is the least Asian thing you can say? Do people bathe more in Vermont or New Jersey? What do black women think about Simon & Garfunkel? (Hint: they don't think about Simon & Garfunkel.) Rudder also traces human migration over time, showing how groups of people move from certain small towns to the same big cities across the globe. And he grapples with the challenge of maintaining privacy in a world where these explorations are possible. Visually arresting and full of wit and insight, *Dataclysm* is a new way of seeing ourselves—a brilliant alchemy, in which math is made human and numbers become the narrative of our time.

Optimal Cupid Christopher McKinlay, 2014-01-25 An easy-to-implement blueprint from the mathematician who reverse-engineered OkCupid and met the woman of his dreams in 90 days. Christopher McKinlay has been featured in *Wired Magazine* and *Good Morning America* for his groundbreaking analysis of OkCupid.

For the first time he's showing non-experts how to turn Internet dating on its head. This concise guide will show anyone (straight, gay, male or female) the procedure McKinlay used to meet his fiancée and how the same ideas can transform their lives and bring them from browsing to contact. One summer evening while logged into a supercomputer in Colorado waiting for a large computation, McKinlay was killing time on OkC when he was troubled by a problem: what if large groups of people responded to OkCupid's personality questionnaire in statistically similar ways? He created custom software to scrape data from the site, collecting over 6,000,000 answers to OkC's "match questions" from more than 20,000 real users. This data made clear he'd been using the site the wrong way. Based on his findings, McKinlay (a mathematics PhD), optimized his own profile. The transformation was profound. He went from showing a "match percentage" of 90% with a few hundred women in the L.A. area to showing 90% or higher with over 30,000 local women. Unsolicited messages from attractive strangers began flooding his inbox. With a foreword by Jon Finkel, McKinlay's insightful how-to will teach you how to benefit from the buried statistical patterns of online romance.

Modern Romance Aziz Ansari,Eric Klinenberg,2016-06-14 The #1 New York Times Bestseller "An engaging look at the often head-scratching, frequently infuriating mating behaviors that shape our love lives." —Refinery 29 A hilarious, thoughtful, and in-depth exploration of the pleasures and perils of modern romance from Aziz Ansari, the star of Master of None and one of this generation's sharpest comedic voices At some point, every one of us embarks on a journey to find love. We meet people, date, get into and out of relationships, all with the hope of finding someone with whom we share a deep connection. This seems standard now, but it's wildly different from what people did even just decades ago. Single people today have more romantic options than at any

point in human history. With technology, our abilities to connect with and sort through these options are staggering. So why are so many people frustrated? Some of our problems are unique to our time. “Why did this guy just text me an emoji of a pizza?” “Should I go out with this girl even though she listed Combos as one of her favorite snack foods? Combos?!” “My girlfriend just got a message from some dude named Nathan. Who’s Nathan? Did he just send her a photo of his penis? Should I check just to be sure?” But the transformation of our romantic lives can’t be explained by technology alone. In a short period of time, the whole culture of finding love has changed dramatically. A few decades ago, people would find a decent person who lived in their neighborhood. Their families would meet and, after deciding neither party seemed like a murderer, they would get married and soon have a kid, all by the time they were twenty-four. Today, people marry later than ever and spend years of their lives on a quest to find the perfect person, a soul mate. For years, Aziz Ansari has been aiming his comic insight at modern romance, but for *Modern Romance*, the book, he decided he needed to take things to another level. He teamed up with NYU sociologist Eric Klinenberg and designed a massive research project, including hundreds of interviews and focus groups conducted everywhere from Tokyo to Buenos Aires to Wichita. They analyzed behavioral data and surveys and created their own online research forum on Reddit, which drew thousands of messages. They enlisted the world’s leading social scientists, including Andrew Cherlin, Eli Finkel, Helen Fisher, Sheena Iyengar, Barry Schwartz, Sherry Turkle, and Robb Willer. The result is unlike any social science or humor book we’ve seen before. In *Modern Romance*, Ansari combines his irreverent humor with cutting-edge social science to give us an unforgettable tour of our new romantic world.

Many of the kids at my school use these apps to 'hook-up.' They usually have no idea who the person really is. Rapes and robberies are not uncommon as a result of meeting up with someone for anonymous sex. This book has helped me understand what information is out there and how to get it. -Detective, University of California Police Department I used the information in this book the same week I

A Million First Dates Dan Slater, 2014-01-28 ** Previously published in hardcover as *Love in the Time of Algorithms* ** Once considered the realm of the lonely and desperate, sites like eHarmony, Match, OkCupid, and Plenty of Fish have been embraced by pretty much every demographic. Dating has been transformed from a daunting transaction based on scarcity to one in which the possibilities are almost endless. Now anyone can search for exactly what they want, connect with more people, and get more information about those people than ever before. As journalist Dan Slater shows, online dating is changing society in more profound ways than we imagine. He explores how these new technologies, by altering our perception of what's possible, are reconditioning our feelings about commitment and challenging the traditional paradigm of adult life. Slater takes readers behind the scenes of a fascinating business. Dating sites capitalize on our

quest for love, but how do their creators' ideas about pro ts, morality, and the nature of desire shape the virtual worlds they've created for us?

40 Days of Dating Timothy Goodman, Jessica Walsh, 2015-01-20 "What would happen if Harry met Sally in the age of Tinder and Snapchat? . . . A field guide to Millennial dating in New York City" (New York Daily News). When New York-based graphic designers and long-time friends Timothy Goodman and Jessica Walsh found themselves single at the same time, they decided to try an experiment. The old adage says that it takes forty days to change a habit—could the same be said for love? So they agreed to date each other for forty days, record their experiences in questionnaires, photographs, videos, texts, and artworks, and post the material on a website they would create for this purpose. What began as a small experiment between two friends became an Internet sensation, drawing five million unique (and obsessed) visitors from around the globe to their site and their story. *40 Days of Dating: An Experiment* is a beautifully designed, expanded look at the experiment and the results, including a great deal of material that never made it onto the site, such as who they were as friends and individuals before the forty days and who they have become since.

Love and Technology Fabian Broeker, 2023-12-22 *Love and Technology: An Ethnography of Dating App Users in Berlin* explores how dating apps fit into Berlin's unique dating culture and brand of intimacy, and form a tangible nucleus around which users navigate dating rituals, romantic biographies, and digitally mediated intimacies within city space. Drawing on the field of digital anthropology, this book takes the form of an immersive ethnography, resulting from 13 months of fieldwork with young dating app users, across Tinder, Bumble, and OkCupid, in Berlin. It argues that dating apps offer, or impose, depending on their context of use, a series of affordances. These affordances, and the technological devices they rely upon, exist through the relation

between users and their environment, both in terms of physical spaces and cultural frameworks. The book posits that dating apps are woven into spatial practices and self-narrativization, constituting imagined communities for their users, as well as a canvas, alongside the city of Berlin, against which to characterise romantic experiences. Scholars interested in digital anthropology, ethnography, dating, and regional Berlin will find that *Love and Technology* offers a vibrant springboard for thinking through both theoretical and methodological concerns.

Dating, Mating, Relating Pamela Anne Quiroz, 2022-06-20 To fit a changing society, the conventional ways we date and mate have given way to brand new methods. People nowadays marry later in life, choose not to marry at all, seek partners after divorce, outlive spouses, relocate to new areas and even endure pandemics. This signifies that we are moving toward larger dating pools, something made possible through public personal advertising. This text details personal advertising in print and digital media, as well as online dating services, speed dating, the use of mobile dating apps and other topics. Interviews reveal the appeal and limitations of personal advertising for meeting people. This book offers a window into the development of trust and relationships, as well as the increasing role technology plays in shaping how people meet and mate in the modern world.

Everything I Ever Needed to Know about Economics I Learned from Online Dating Paul Oyer, 2014-01-07 Conquering the dating market—from an economist's point of view After more than twenty years, economist Paul Oyer found himself back on the dating scene—but what a difference a few years made. Dating was now dominated by sites like Match.com, eHarmony, and OkCupid. But

Oyer had a secret weapon: economics. It turns out that dating sites are no different than the markets Oyer had spent a lifetime studying. Monster.com, eBay, and other sites where individuals come together to find a match gave Oyer startling insight into the modern dating scene. The arcane language of economics—search, signaling, adverse selection, cheap talk, statistical discrimination, thick markets, and network externalities—provides a useful guide to finding a mate. Using the ideas that are central to how markets and economics and dating work, Oyer shows how you can apply these ideas to take advantage of the economics in everyday life, all around you, all the time. For all online daters—and for anyone else swimming in the vast sea of the information economy—this book uses Oyer’s own experiences, and those of millions of others, to help you navigate the key economic concepts that drive the modern age.
