**The Impact of the 2012 Olympic and Paralympic Games** K. Dixon,T. Gibbons,2014-12-10 The London 2012 Olympics and Paralympics were seen as a success and the hosts were praised for the promotion of equality, tolerance and unity as well as inspiring a legacy to continue these values. This volume contains a collection of sociological case studies which critically assess the diverse impacts of London 2012 and its key controversies.

**Machine Learning for Networking** Éric Renault,Selma Boumerdassi,Paul Mühlethaler,2021-03-02 This book constitutes the thoroughly refereed proceedings of the Second International Conference on Machine Learning for Networking, MLN 2019, held in Paris, France, in December 2019. The 26 revised full papers included in the volume were carefully reviewed and selected from 75 submissions. They present and discuss new trends in deep and reinforcement learning, pattern recognition and classification for networks, machine learning for network slicing optimization, 5G system, user behavior prediction, multimedia, IoT, security and protection, optimization and new innovative machine learning methods, performance analysis of machine learning algorithms, experimental evaluations of machine learning, data mining in heterogeneous networks, distributed and decentralized machine learning algorithms, intelligent cloud-support communications, resource allocation, energy-aware communications, software defined networks, cooperative networks, positioning and navigation systems, wireless communications, wireless sensor networks, underwater sensor networks.

**2012 London Olympics** Nick Hunter,2011-07 The London Olympics 2012 offers up-to-the-minute information about this forthcoming world event, including the countdown to 2012, an overview of Olympic venues for 2012, athletes to watch, and sports that will be featuring. It also includes Going for Gold fact boxes, a map of Olympic venues and a timeline of Olympic history.

**Shooting the Picture** Sally Young,Fay Anderson,2016-08-01 Shooting The Picture is the story of Australian press photography from 1888 to today—the power of the medium, seismic changes in the newspaper industry, and photographers who were often more colourful than their subjects. This groundbreaking book explores our political leaders and campaigns, crime, war and censorship, international events, disasters and trauma, sport, celebrity, gender, race and migration. It maps the technological evolution in the industry from the dark room to digital, from picturegram machines to iPhones, and from the death knock to the ascendancy of social media. It raises the question whether these changes will spell the end of traditional press photography as we know it.

**Social Computing and Social Media. Design, Human Behavior and Analytics** Gabriele Meiselwitz,2019-07-10 This two-volume set LNCS 11578 and 11579 constitutes the refereed proceedings of the 11th International Conference on Social Computing and Social Media, SCSM 2019, held in July 2019 as part of HCI International 2019 in Orlando, FL, USA. HCII 2019 received a total of 5029 submissions, of which 1275 papers and 209 posters were accepted for publication after a careful reviewing process. The 81 papers presented in these two volumes are organized in topical sections named: Social Media Design and Development, Human Behaviour in Social Media, Social Network Analysis, Community Engagement and Social Participation, Computer Mediated Communication, Healthcare Communities, Social Media in Education, Digital Marketing and Consumer Experience.

**Modern History in Pictures** DK,2012-09-17 The twentieth century saw seismic changes in every country and walk of life, from the collapse of global empires to the horrors of world war, from the rise of mass media to the development of motor transportation, air travel, and the digital revolution. In Modern History in Pictures, all of the most significant happenings of the last century are captured in a unique storyboard style, showing how each event unfolded through a series of contemporary photographs.

**Encoding the Olympics** Luo Qing,Giuseppe Richeri,2013-09-13 Encoding the Olympics assembles a uniquely representative international team of media experts to provide a comprehensive review of the global impact of media and cultural communications associated with the Beijing 2008 Olympics. Commissioned by the IOC, this pioneering comparative study – the largest in Olympic Games research –provides a ground-breaking, panoramic, cross-cultural perspective on media responses to the leading sports event of the modern world. The representative team that undertook the study includes media commentators and political analysts, sport and media journalists, Sinologists and observers of the Asian Pacific Rim, academics in Olympic Studies and media and communication studies, scholars of the cultural and sociology studies of sport and festival and events managers. Encoding the Olympics provides a unique, encyclopaedic study that will serve as a versatile resource at several levels – as a textbook or source reference for academic institutions, media public relations agencies that facilitate the work of inter-cultural exchange organisations, and international communication departments of multinational enterprises and international NGOs. This volume analyses global media responses to a mega-sport event on a scale never before attempted. This book was previously published as a special issue of the International Journal of the History of Sport.

**Slow Journalism** Megan Le Masurier,2020-04-02 Slow Journalism has emerged in recent years to enact a critique of the limitations and dangers of the speed of much mainstream contemporary journalistic practice.

There have been types of journalism produced and consumed slowly for centuries, of course. What is new is the context of hyper-acceleration and over-production of journalism, where quality has suffered, ethics are compromised and user attention has eroded. Many have been asking if there is another way to practice journalism. The emergence of Slow Journalism suggests that there is. Many international scholars and practitioners have been thinking critically about the problems wrought by speed, and are utilising the concept of slow to describe a new way of thinking about and producing journalism. This edited collection offers theoretical perspectives and case studies on the practice of slow journalism around the globe. Slow Journalism is a new practice for new times. This book was originally published as two special issues of Journalism Practice and Digital Journalism.

**Killing for Show** Julian Stallabrass, 2020-10-30 See firsthand how war photography is used to sway public opinion. In the autumn of 2014, the Royal Air Force released blurry video of a missile blowing up a pick-up truck which may have had a weapon attached to its flatbed. This was a lethal form of gesture politics: to send a £9-million bomber from Cyprus to Iraq and back, burning £35,000 an hour in fuel, to launch a smart missile costing £100,000 to destroy a truck or, rather, to create a video that shows it being destroyed. Some lives are ended—it is impossible to tell whose—so that the government can pretend that it taking effective action by creating a high-budget snuff movie. This is killing for show. Since the Vietnam War the way we see conflict—through film, photographs, and pixels—has had a powerful impact on the political fortunes of the campaign, and the way that war has been conducted. In this fully illustrated and passionately argued account of war imagery, Julian Stallabrass tells the story of post-war conflict, how it was recorded and remembered through its iconic photography. The relationship between war and photograph is constantly in transition, forming new perspectives, provoking new challenges: what is allowed to be seen? Does an image have the power to change political opinion? How are images used to wage war? Stallabrass shows how photographs have become a vital weapon in the modern war: as propaganda—from close-quarters fighting to the drone’s electronic vision—as well as a witness to the barbarity of events such as the My Lai massacre, the violent suppression of insurgent Fallujah or the atrocities in Abu Ghraib. Through these accounts Stallabrass maps a comprehensive theoretical re-evaluation of the relationship between war, politics and visual culture. Killing for Show offers: 190 photographs encompassing photojournalism, artists’ images, photographs by soldiers and amateurs and drones A comprehensive comparison of the role of photography in the Vietnam and Iraq Wars An explanation of the waning power of iconic images in collective memory An analysis of the failure of military PR and the public display of killing A focus on what can and cannot be seen, photographed and published An exploration of the power and limits of amateur photography Arguments about how violent images act on democracy This full-color book is an essential volume in the history of warfare and photography

**Mass Photography** Annebella Pollen, 2020-09-09 With increasingly accessible camera technology, crowdsourced public media projects abound like never before. Such projects often seek to secure a snapshot of a single day in order to establish communities and create visual time capsules for the future. Mass Photography: Collective Histories of Everyday Life assesses the potential of these popular moment-in-time projects by examining their current day prevalence and their historical predecessors. Through archival research and interviews with organisers and participants, it examines, for the first time, the vast photographic collections resulting from such projects, analysing their structures and systems, their aims and objectives, and their claims and promises. The central case study is the 55,000 photographs submitted to One Day for Life in 1987, which aimed, in its own time, to be ‘the biggest photographic event the world had ever seen’.

**On Sports Photography with Peter Read Miller** Peter Read Miller, 2019-11-06 In Peter Read Miller on Sports Photography, the 35-year Sports Illustrated veteran photographer takes readers into the action of many of his most iconic shots, sharing the stories behind the photos of some of the world's greatest athletic events. Peter discusses the circumstances surrounding particular shots, shares observations of the athletes themselves, and provides key techniques for sports photographers of all levels who are looking for tips on getting great photos of football, track and field, gymnastics, swimming, and portraits. Each chapter includes at least one gallery of photos that showcase Peter's images while illustrating the technical points he is discussing in that chapter. Unlike photo collections by other greats of sports photography, Miller's book seamlessly interweaves his images with the stories behind the shots, photographic instruction, and his inside look at what it's like to work at the nation's leading sports publication. Beautifully illustrated with Miller's images of the Olympics, football, and portrait sessions with professional athletes, Peter Read Miller on Sports Photography offers a rich and inspiring experience for all photographers, especially sports photographers; as well as sports fans and Sports Illustrated readers.

**A Conspiracy of Images** John J. Curley, 2013-12-03 An important new look at Cold War art on both sides of the Atlantic

**Technology-Augmented Perception and Cognition** Tilman Dingler, Evangelos Niforatos, 2021-01-04 Tools and technologies have long complemented and extended our physical abilities: from pre-historic spearheads to

steam-propelled ploughs and high-tech prosthetics. While the development of lenses granted us insights into the micro and macrocosms, new sensors and technologies increasingly augment our cognitive abilities, including memory and perception. This book integrates current research efforts, results, and visions from the fields of computer science, neuroscience, and psychology. It provides a comprehensive overview of the state-of-the-art and future applications of how technologies assist and augment human perception and cognition. Experts in the field share their research and findings on: Working memory enhancements Digitization of memories through lifelog archives The consequences of technology-induced disruptions and forgetting The creation and utilization of new human senses Ethical and security concerns that arise with augmentation technologies. As technology weaves itself ever deeper into our lives, careful examination of its capabilities, risks and benefits is warranted. While this book focuses on the complementation and augmentation of human capabilities, it serves as a foundation for students, researchers and designers of technologies that push the boundaries of perception and cognition.

*A Contemporary History of Women's Sport, Part One* Jean Williams,2014-04-24 This book is an historical survey of women's sport from 1850-1960. It looks at some of the more recent methodological approaches to writing sports history and raises questions about how the history of women's sport has so far been shaped by academic writers. Questions explored in this text include: What are the fresh perspectives and newly available sources for the historian of women's sport? How do these take forward established debates on women's place in sporting culture and what novel approaches do they suggest? How can our appreciation of fashion, travel, food and medical history be advanced by looking at women's involvement in sport? How can we use some of the current ideas and methodologies in the recent literature on the history and sociology of sport in order to look afresh at women's participation? Jean Williams's original research on these topics and more will be a useful resource for scholars in the fields of sports, women's studies, history and sociology.

*Designing the Olympics* Jilly Traganou,2016-04-14 Designing the Olympics claims that the Olympic Games provide opportunities to reflect on the relationship between design, national identity, and citizenship. The Olympic design milieu fans out from the construction of the Olympic city and the creation of emblems, mascots, and ceremonies, to the consumption, interpretation, and appropriation of Olympic artifacts from their conception to their afterlife. Besides products that try to achieve consensus and induce civic pride, the Olympic design milieu also includes processes that oppose the Olympics and their enforcement. The book examines the graphic design program for Tokyo 1964, architecture and urban plans for Athens 2004, brand design for London 2012, and practices of subversive appropriation and sociotechnical action in counter-Olympic movements since the 1960s. It explores how the Olympics shape the physical, legal and emotional contours of a host nation and its position in the world; how the Games are contested by a broader social spectrum within and beyond the nation; and how, throughout these encounters, design plays a crucial role. Recognizing the presence of multiple actors, the book investigates the potential of design in promoting equitable political participation in the Olympic context.

**The Global Impact of Olympic Media at London 2012** Andrew C. Billings,Marie Hardin,2016-01-13 This book explores the biggest sporting event in the world through the lens in which most people witness it: the media. Traversing nations and media formats, contributors offer insights into the manner in which the Olympics is conveyed to the masses and the impact arising from the mass consumption of Olympic media in its plethora of dimensions. The book gleans insight from past Olympic media analyses, but focuses on the role media played within the 2012 London Summer Olympics. Using a variety of methodologies, the book underscores how the Olympic Games are more than just a sporting event but should be understood a vast mosaic of images and events that shape public understandings of nations, society, and the values that undergird such renderings. This

book was published as a special section in Mass Communication & Society.
