Freitag Lars Müller,2001-10-01 In an age of irony, Freitag bags shoulder it all. Respectable, credible, authentic, genuine, trustworthy, and honest, they are an urban tool, a saddlebag for the city cowboy, a messenger bag for the real and the virtual; durable enough to be carried all over the world. Invented by Swiss brothers Daniel and Markus Freitag, who wanted bags just like the ones worn by New York bike couriers, bags that were practical, weatherproof, quick, and easy, the Freitag bag is tailor-made on a small-scale of recycled truck tarpaulins, bicycle inner tubes, and car seatbelts. In line with the Freitag principle, each book is individually bound with a spine made of typical bag material, and it holds a grab bag of printed goodies. In addition to covering the history of the bag and its particular ecological, economic, and sociocultural contexts, Freitag contains portraits of 3000 Freitag bags and their owners, most of whom are members of a generation that is as vain as it is critical of consumerism -- a generation for whom the Freitag bag is the ideal brand-name product.

German Battlecruisers of World War One Gary Staff,2014-11-29 This is the most comprehensive study yet in the English language of the German Imperial Navy's battlecruisers that served in the First World War. Known as Panzerkreuzer, literally 'armoured cruiser', the eight ships of the class were to be involved in several early North Sea skirmishes before the great pitched battle of Jutland where they inflicted devastating damage on the Royal Navy's battlecruiser fleet. In this new book the author details their design and construction, and traces the full service history of each ship, recounting their actions, largely from first-hand German sources and official documents, many previously unpublished in English. Detailed line drawings and maps augment the text throughout, as do a wealth of contemporary photos that depict the vessels at sea as well as in dock, where details of damage sustained in action and many aspects of their design can be viewed in close up. A superb series of full-colour, specially-commissioned computer graphics show full length profiles and top-down views of each ship in precise and clear detail. This stunning book is a major new contribution to German naval history in this country and will become a 'must-have' volume on the shelves of historians, enthusiasts and modellers and indeed for anyone interested in the navies of the First World War and steel warships in general.

Smart Mobs Howard Rheingold, 2007-03-21 From Tokyo to Helsinki, Manhattan to Manila, Howard Rheingold takes us on a journey around the world for a preview of the next techno-cultural shift—a shift he predicts will be as dramatic as the widespread adoption of the PC in the 1980s and the Internet in the 1990s. The coming wave, says Rheingold, is the result of super-efficient mobile communications—cellular phones, personal digital assistants, and wireless-paging and Internet-access devices that will allow us to connect with anyone, anywhere, anytime. From the amusing (Lovegetty devices in Japan that light up when a person with the right date-potential characteristics appears in the vicinity) to the extraordinary (the overthrow of a repressive regime in the Philippines by political activists who mobilized by forwarding text messages via cell phones), Rheingold gives examples of the fundamentally new ways in which people are already engaging in group or collective action. He also considers the dark side of this phenomenon, such as the coordination of terrorist cells, threats to privacy, and the ability to incite violent behavior. Applying insights from sociology, artificial intelligence, engineering, and anthropology, Rheingold offers a penetrating perspective on the brave new convergence of pop culture, cutting-edge technology, and social activism. At the same time, he reminds us that, as with other technological revolutions, the real impact of mobile communications will come not from the technology itself but from how people use it, resist it, adapt to it, and ultimately use it to transform themselves, their communities, and their institutions.
