*Ageing and Contemporary Female Musicians* Abigail

Gardner,2019-07-11 *Ageing and Contemporary Female Musicians* focuses on ageing within contemporary popular music. It argues that context, genres, memoirs, racial politics and place all contribute to how women are 'aged' in popular music. Framing contemporary female musicians as canonical grandmothers, Rude Girls, neo-Afrofuturist and memoirists settling accounts, the book gives us some respite from a decline or denial narrative and introduces a dynamism into ageing. Female rock memoirs are age-appropriate survival stories that reframe the histories of punk and independent rock music. Old age has a functional and canonical 'place' in the work of Shirley Collins and Calypso Rose. Janelle Monáe, Christine and the Queens and Anohni perform 'queer' age, specifically a kind of 'going beyond' both corporeal and temporal borders. Genres age, and the book introduces the idea of the time-crunch; an encounter between an embodied, represented age and a genre-age, which is, itself, produced through historicity and aesthetics. Lastly the book goes behind the scenes to draw on interviews and questionnaires with 19 women involved in the contemporary British and American popular music industry; DIY and ex-musicians, producers, music publishers, music journalists and audio engineers. *Ageing and Contemporary Female Musicians* is a vital intergenerational feminist viewpoint for researchers and students in gender studies, popular music, popular culture, media studies, cultural studies and ageing studies.

### **Radio Galaxies at TeV Energies**

Dorit Glawion, 2020-05-13 It is common believe that the centers of all galaxies exhibit supermassive black holes with masses ranging from millions up to billions of the mass of our Sun. By accreting surrounding matter, the luminosity of these galactic nuclei can outshine the emission of their host galaxies. If this is the case, they are called active galactic nuclei. Some of these objects eject powerful outflows composed of plasma, called jets. These jets can

produce non-thermal radiation which observable across the entire electromagnetic spectrum from radio up to the gamma-ray frequencies. At highest frequencies (TeV range) most of the detected active galaxies have jets directed along or close to the line of sight. However, also galaxies with larger angles to the line of sight showing fascinating features were discovered, in seeming contradiction to traditional models for these so-called radio galaxies. Thus, the latter are of particular importance for understanding active galactic nuclei in general. This Special Issue contains reviews and research articles about the current knowledge of radio galaxies at TeV energies, including observational results and theoretical models. It is intended to guide the interested reader deeper into this fascinating discipline of modern day astronomy.

*Chicago's WLS Radio* Scott Childers, 2008 From its early days as the farmer's companion to over a quarter century as the nation's premier rock-and-roll station, WLS has touched the lives of millions of listeners. Many well-known celebrities, like Gene Autry, owe their careers to the Big 89, through the famous Saturday night program The National Barn Dance. Local personalities such as Dick Biondi, Larry Lujack, and John Records Landecker became household names thanks to Chicago's 50,000-watt blowtorch. The images in Chicago's WLS Radio scan the entire history of the station, featuring engaging hosts, the biggest stars, and lots of fun. The book also covers WLS's move in the 1990s to become a leader in the news and talk format.

**Radio Live! Television Live!** Robert L. Mott, 2003-12-11 During the golden age of live radio and television, writers, performers, and producers created their programs in an environment far different from the studios of today. With live programming, anything could happen,

and often did. Robert L. Mott, a veteran writer and Emmy-nominated sound effects creator of the live era, recreates the days when television and radio programs were performed live. He includes personal reminiscences as well as a forthright look behind the microphones: horses' hooves were played by coconuts, African-American women were played by white males, and television actors might ad lib an entire program that didn't go as planned. Celebrities like Red Skelton and Jackie Gleason, as well as the unsung heroes in the sound booth and backstage, step up to the mike here. Behind-the-scenes photographs are also included in this account of the exciting--but not always glamorous--world that was live on the air.
