The Platform Economy Maxim I. Inozemtsev, Elina L. Sidorenko, Zarina I. Khisamova, 2022-09-27 Digital ecosystems formed on the basis of digital platforms are significantly transforming modern reality. Today it is difficult to imagine life without LinkedIn, Facebook, or Amazon. The total income generated by them is estimated at trillions of dollars. Digital platforms are the main driving force of the digital economy. The impact and growth of digital platforms on social and economic processes today is difficult to overestimate. The pandemic has further deepened their influence on society, as almost all social communication and economic activity has moved to online format on digital platforms. The growth of the share of digital platforms in various segments of the economy was so rapid that regulators around the world were not ready for such large-scale transformations. All this has caused a number of crisis phenomena, when IT giants have grown into an independent branch of “power”, which has direct access to the personal and

financial data of millions of citizens, and moreover, have the opportunity to directly influence them. This monograph is a unique publication in which, for the first time, a large-scale and sufficiently deep team of experts and scientists from various countries of the world studied in detail the multidimensional phenomenon of the “platform economy” and the measures taken by states to regulate these processes. The book will be interesting to a wide range of readers interested in the problems of the development of digital platforms and the developing branch of law and science – the law of digital platforms.

Wonked! Vivan Sharan, 2019-12-26 More than two decades since India was forced to liberalize its economy, the country has undergone radical transformation – from a planned,

centralized economy, to one that seeks to harness market forces and technological change. Today, India is at a crossroads – even as political discourse has undergone churn, there is a distinct lack of conceptual clarity and well-defined economic policymaking. As a result, there is little that separates the economic and foreign policies of successive governments, despite divergent political ideologies, which has been the hallmark of Indian policymaking. In *Wonked!*, economist Vivan Sharan breaks down the challenges facing the Indian economy today, while developing a framework through which broad policy strategies can be laid down based on principles acceptable to multiple stakeholders. How should the Indian digital economy be regulated in the days to come? How does one realize greater value from Indian agriculture? Why is there a shortage of electricity despite India being a power-surplus country? And what is the foreign policy outlook India must have in a world where economics and politics are coupled? Breaking down complex policymaking issues for a general reader, *Wonked!* asserts the need for India to have an economic ideology that will strengthen its institutions while thinking about the needs of its citizens in the years to come. Deeply researched, cogent and bridging the divide between conflicting ideologies, this book calls upon policymakers, private sector players and the political establishment to develop a wider consensus on the paths India must pursue in the years to come.

Uber versus taxi. Generation Y's perception of taxi and Uber services in Lisbon Benyi Heider, Carla Sofia Simões, Ivana Cizmar, Marvin Burmester, 2016-05-02 Seminar paper from the year 2016 in the subject Economics - Case Scenarios, grade: 17,0 (=1,3 in Deutschland), Católica Lisbon School of Business & Economics, language: English, abstract: This report investigates the effects and influence of Uber's market entry in the greater

Lisbon area. More specifically, the study evaluates the resulting impact on “Generation Y”’s perception of traditional taxi services. Based on the findings of the research, the report suggests concrete managerial implications to the traditional taxi industry. The overall research was designed to derive insights based on both, qualitative and quantitative approaches. The qualitative research was performed with two focus groups and created the foundation for the quantitative research, which was executed using an extensive online questionnaire with 94 participants. Both approaches targeted respondents classified as “Generation Y”. Core findings include the most significant attributes to evaluate traditional taxi services. Most importantly, the price, the friendliness of the driver and security were highlighted. Moreover, the overall satisfaction of customers is further determined by attributes such as availability, comfort and payment process. It must be considered however, that taxi services are rated significantly different among Uber users and non Uber users. As the former have ranked taxi services significantly worse than non Uber users, it can be concluded that the recent market entry of Uber influences and changes “Generation Y”’s perception of traditional taxis. The complementing finding that Uber services have been evaluated significantly more positive among the all respondents impressively emphasizes the thread for traditional taxis in the greater Lisbon area. The emerging competitor Uber is perceived as superior, even among the non Uber users. Both, the qualitative and quantitative analysis revealed that the traditional taxi industry currently faces major problems related to the lack of trust, transparency and security of the services, as well as the limited options of payment methods. For the time being, this leaves the services’ availability as the only competitive advantage of the traditional taxi industry. In

order to secure its competitiveness in any market scenario, it can be concluded that the industry needs to adapt its core services with regards to multiple service features. With a focus on “Generation Y”, the taxi industry must introduce tools and mechanisms to enhance and control transparency, foster the acceptance of credit cards as a payment method and ultimately drop prices to a perceived fair and competitive level.

Doing Business in Russia, Volume II Anatoly Zhuplev, 2016-12-26 Russia is a major economy and important power in the global political-economic landscape. Following the dissolution of the USSR, Russia has become a premier global marketplace despite remaining enigmatic and challenging. The book serves as a concise guide in understanding Russia from an international business perspective. It explores strategic issues, drivers, constraints, costs, and risks of international expansion and includes analytical tools, practical applications, sources of information, and assistance in international business research. These are supplemented by analysis of Russia's macro-economic profile, drivers, strategic strengths and weaknesses in the comparative context, including its international market attractiveness and opportunities for U.S. companies. The book examines Russia's main industries, their profiles, trends and business attractiveness, trends, and marketing strategies. The discussion of Russia's regions covers regional subdivisions and economic profiles with the focus on Moscow, the leading economic region. The book also covers the drivers and trends of the Russian small business sector and entrepreneurial business venturing. Despite the onslaught of capitalism, Russia retains its relationship-driven culture. The book provides insights by evaluating the determinants of Russian culture, its national profile in major global cross-cultural studies, and practical cultural applications in business, negotiations, and communications. The book's pedagogy includes skill development exercises and cases on doing business in Russia.

We Are Bridges Cassandra Lane, 2021-04-20 In this evocative memoir, Cassandra Lane deftly uses the act of imagination to reclaim her ancestors' story as a backdrop for telling her own. The tradition of Black women's storytelling leaps forward within these pages—into fresh, daring, and excitingly new territory. —Bridgett M. Davis, author of *The World According to Fannie Davis* When Cassandra Lane finds herself pregnant at thirty-five, the knowledge sends her on a poignant exploration of memory to prepare for her entry into motherhood. She moves between the twentieth-century rural South and present-day Los Angeles, reimagining the intimate life of her great-grandparents Mary Magdelene Magee and Burt Bridges, and Burt's lynching at the hands of vengeful white men in his southern town. *We Are Bridges* turns to creative nonfiction to reclaim a family history from violent erasure so that a mother can gift her child with an ancestral blueprint for their future. Haunting and poetic, this debut traces the strange fruit borne from the roots of personal loss in one Black family—and considers how to take back one's American story.

Platformization and Informality Aditi Surie, Ursula Huws, 2023-05-11 In this edited volume, scholars from Mumbai, Bengaluru, Jakarta, Cape Town, Sao Paulo and other cities of the global South explore the complex relationship between platformization and informality through a different lens. Drawing on extensive theoretical, quantitative and qualitative scholarship, they provide both a useful overview and insights into the lived realities of gig work for platforms covering a range of skills, working conditions, and forms

of algorithmic management. Platform work has attracted considerable attention from scholars in the global North, who have tended to view it as a form of casualisation of work that was previously regulated. But what about the global South, where most employment, especially that of women and migrant workers was historically already informal? Beyond a focus on livelihoods, employment, and work, the authors show how labour platforms take on powers that bring about broader impacts, including those affecting identity and personal wellbeing. They also illustrate the impact of platformization on the governance of affected sectors by public agencies, thus affecting political power, and how public data infrastructures contribute to further platformization. The purpose of this pioneering work is to lay bare these interactions to then rebuild our understanding of platformization and its social, political, cultural and economic impacts. Its insights are attentive to gender and ethnic differences, as well as geographical ones.

Life in a Field Katie Peterson, 2021-04 This is a comedy about climate change, in which a girl and a donkey become friends, then decide to marry time. A lyric fable, *Life in a Field* intersperses Katie Peterson's slow-moving, cinematic, and sensual writing with three folios of photographs by Young Suh. Introspection, wish, dream, and memory mark this tale, which is set in a location resembling twenty-first-century California--with vistas and orchards threatened by drought and fires. This is also a place of enchantment, a fairy-tale landscape where humans and animals live as equals. As the girl and the donkey grow up,

they respond to the difficulties of contemporary civilization, asking a question that meets our existential moment: What do you do with the story you didn't wish for? A narrator's voice combines candor with distance, attempting to find a path through our familiar strife, toward a future that feels all but impossible, and into what remains of beauty and pleasure. *Life in a Field* tries to reverse our accelerating destruction of the natural world, reminding us of the cold clarity we need to continue on this earth.

Uber—Brave New Service or Unfair Competition Jasenko Marin, Siniša Petrović, Mišo Mudrić, Hrvoje Lisičar, 2019-10-19 This book analyzes the legal issues connected with the provision of Uber-related services. It primarily focuses on the various contractual and non-contractual relationships that occur during the use of Uber applications, especially with reference to Uber headquarters (Uber App), Uber branch offices (advertisements), Uber partner drivers (employees or self-employed), Uber application registered users, Uber

transportation service users (contracting passenger) and third-party Uber transportation service users (additional passenger). It also provides a comparison of standard transportation services and contracts of carriage, irrespective of whether the carrier in question is a common carrier, contractual carrier, actual carrier or an intermediary service provider. Furthermore, the book presents the relevant case law, especially with regard to Uber as a taxi service, Uber as a share-riding service, Uber as a rent-a-car with driver service, Uber as an employer and Uber as a key organizer of transportation service, in Croatia, Belgium, Germany, Italy, the Netherlands, United Kingdom, United States, Hungary, Argentina, and France. Lastly, it explores the different legislative approaches to resolving various issues related to the appearance of Uber and similar companies – the Laissez-faire model, Status Quo model, Legal Adjustment model, and the New Legislative Paradigm model.
