Creative Networks and the City Bas van Heur,2014-03-31 This book offers a fundamental contribution to the literature on the creative industries and the knowledge-based economy by focusing on three aspects: urban spaces as key sites of capitalist restructuring, creative industries' policies as state technologies aimed at economic exploitation, and the role of networks of aesthetic production in inflecting these tendencies. It simultaneously goes beyond these debates by integrating a concern with the cultural and aesthetic dimensions of the creative industries. As such, the book is relevant to researchers interested in the transdisciplinary project of a cultural political economy of creativity and urban change.

A Rough and Rocky Place Christopher Mee,Hamish Alexander Forbes,1997 The uncompromising nature of the landscape of the Methana Peninsula in Greece, and its overall isolation, have been dominating factors in the peninsula's history. This is a report of major fieldwork undertaken following a brief reconnaissance in the summer of 1981. A more detailed exploratory study was made a year later, and it soon became obvious that the settlement history of the peninsula was more complex than it had been thought to be, when a number of unrecorded sites were discovered. It also became clear that most previous reports had discussed known sites solely or primarily in terms of their architectural remains, and that the peninsula's settlement history would not be comprehensible without systematic study. A survey strategy was developed and a full field-survey season on Methana was undertaken with two teams in 1984, followed by further seasons in each of the next three years. This is

the report of the archaeological survey project. There is a description of the physical environment of Methana and of the survey methodology. Chapters examine the settlement history of the peninsula in the Prehistoric, Early Iron Age-Archaic, Classical Hellenistic, Roman, Later Roman, Medieval, and the Turkish-Modern periods. The sites and churches are described in detail in the two catalogues, while appendices list the agricultural equipment, inscriptions, coins, and artefacts.

Unreal Game Development Ashish Amresh,Alex Okita,2010-08-03 Using Unreal Engine 3, the authors teach aspiring game makers the fundamentals of designing a computer game. The only prerequisite is a basic working knowledge

of computers and a desire to build an original game. This book mirrors the curriculum used at CampGame, a six week summer program organized for high school students at The New York University and Arizona State University. Students enter with no prior knowledge of game making, and through the course of six intensive weeks, they finish as teams of budding game developers.

How to Play Blues Guitar Richard Johnston, 2007 A step-by-step course in blues guitar offers instruction with musical examples in regular notation and tablature, covering licks, scales, turnarounds, and rhythms.

Sound Moves Michael Bull, 2015-03-24 This innovative study opens up a new area in sociological and urban studies: the aural experience of the social, mediated through mobile technologies of communication. Whilst we live in a world dominated by visual epistemologies of urban experience, Michael Bull argues that it is not surprising that the Apple iPod, a sound based technology, is the first consumer cultural icon of the twenty-first century. This book, in using the example of the Apple iPod, investigates the way in which we use sound to construct key areas of our daily lives. The author argues that the Apple iPod acts as an urban Sherpa for many of its users and in doing so joins the mobile army of technologies that many of us habitually use to accompany our daily lives. Through our use of such mobile and largely sound based devices, the book demonstrates how and why the spaces of the city are being transformed right in front of our ears.
