<u>Software Sourcing in the Age of Open</u> Pär J. Ågerfalk,Brian Fitzgerald,Klaas-Jan Stol,2015-04-21 This SpringerBrief discusses multiple forms of open-source-inspired outsourcing: opensourcing, innersourcing and crowdsourcing. It uses a framework-based comparison to explain the strengths and weaknesses of each approach. By pointing out characteristics along with benefits and pitfalls of each approach, the authors provide nuanced and research-based advice to managers and developers facing software sourcing decisions. The differences and commonalities of these three emerging approaches are carefully analyzed. Chapters explore the primary challenges of reliability, efficiency and robustness in open-source methods. Examples from industrial cases are included, along with extensive references to recent research. The brief concludes with a comparative analysis of approaches and outlines key implications to be aware of when outsourcing. Software Sourcing in the Age of Open: Leveraging the Unknown Workforce is designed for professionals and researchers interested in outsourcing challenges. The content is also suitable for postgraduate students interested in contemporary software sourcing approaches.

Folklore, Horror Stories, and the Slender Man S. Chess,E. Newsom,2014-11-27 The Slender Man entered the general popular consciousness in May 2014, when two young girls led a third girl into a wooded area and stabbed her. Examining the growth of the online horror phenomenon, this book introduces unique attributes of digital culture and establishes a needed framework for studies of other Internet memes and mythologies.

Open Sourcing A Complete Guide - 2020 Edition Gerardus Blokdyk,2020-02-07 Who is responsible for ensuring appropriate resources (time, people and money) are allocated to Open-sourcing? Implementation Planning: is a pilot needed to test the changes before a full roll out occurs? Are you dealing with any of the same issues today as yesterday? What can you do about this? Record-keeping requirements flow from the records needed as inputs, outputs, controls and for transformation of a Open-sourcing process, are the records needed as inputs to the Open-sourcing process available? How long will it take to change? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, 'What are we really trying to accomplish here? And is there a different way to look at it?' This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc... - they are the people who rule the future. They are the person who asks the right questions to make Open Sourcing investments work better. This Open Sourcing All-Inclusive Self-Assessment enables You to be that person. Agile Information Business Natalia Kryvinska,Michal Gregus,2017-09-01 This book accomplishes an analysis of critical aspects of managerial implications on the business with information. The business dealing with information is spreading in the service market; and, an efficient management of informational processes, in order to perform successful business with them, is now crucial. Besides, economical/business, technological or any other kind of information, organized in a variety of forms, can be considered as an 'informational product'. Thus, creating a business value out of information is challenging but vital, especially in the modern digital age. Accordingly, the book covers the methods and technologies to capture, integrate, analyze, mine, interpret and visualize information out of distributed data, which in turn can help to manage information competently. This volume explores the challenges being faced and opportunities to look out for in this research area, while discussing different aspects of this subject. The book will be of interest to those working in or are interested in joining interdisciplinary and transdisciplinary work in the areas of information management, service management, and service business. It will also be of use to young generation researchers by giving them an overview on different aspects of doing business with information. While introducing them to both technical and non-technical details, as well as economic aspects, the book will also be extremely informative for professionals who want to understand and realize the potential of using the cutting-edge managerial technologies for doing successful business with information/ services.

Metaverse and Immersive Technologies Chandrashekhar A,Shaik Himam Saheb,Sandeep Kumar Panda,S. Balamurugan,Sheng-Lung Peng,2023-11-07 METAVERSE AND IMMERSIVE TECHNOLOGIES The book covers the multidimensional perspectives of the metaverse through the prism of virtual reality, augmented reality, blockchain, artificial intelligence, and IoT, ranging from rudimentary to advanced applications. This book provides a thorough explanation of how the technology behind metaverse and other virtual reality technologies are changing the world. The primary objective is to present the revolutionary innovation of the 21st century—the metaverse—and exhibit its wide range of applications in different domains. Although blockchain and VR/AR were the first popularly known applications of the metaverse, several other applications also exist. While some still believe the metaverse is overhyped, in reality, it is transforming almost every industry—healthcare, 3D, 4D, industry, game industry, business management, artificial intelligence, and IoT, just to name a few. This technological breakthrough not only paved the way for virtual reality but also provided useful solutions for other areas of technology. The unique nature of the technology, which is a single, shared, immersive, persistent, 3D virtual space where humans experience life in ways not possible in the physical world,

makes it suitable for all real-world applications; it has great potential to transform business, and companies are already in the race for different product offerings. Audience AI and computer science researchers, engineers and graduate students, IT personnel in business as well as entrepreneurs and policymakers.

Open Source Technology: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2014-11-30 The pervasiveness of and universal access to modern Information and Communication Technologies has enabled a popular new paradigm in the dissemination of information, art, and ideas. Now, instead of relying on a finite number of content providers to control the flow of information, users can generate and disseminate their own content for a wider audience. Open Source Technology: Concepts, Methodologies, Tools, and Applications investigates examples and methodologies in user-generated and freely-accessible content available through electronic and online media. With applications in education, government, entertainment, and more, the technologies explored in these volumes will provide a comprehensive reference for web designers, software developers, and practitioners in a wide variety of fields and disciplines.

Remote Workforce Training: Effective Technologies and Strategies Hai-Jew, Shalin,2014-02-28 Lifelong learning can occur both in and out of the classroom, but the most valuable instruction takes place on the job. Remote Workforce Training: Effective Technologies and Strategies investigates methods, techniques, and systems used in employee training programs. The tools and technologies surveyed within these pages will help employers take their workers beyond the transient skill sets offered by university degrees and into a constant state of learning and practice that will enhance both their productivity and technical abilities on a regular basis. In particular, the knowledge offered by this reference book will be of use to educators and students as well as managers, leaders, administrators, and personnel.

Culture-on-Demand James Lull,2008-04-30 This highly original, thought-provoking book – written by a pioneer of communication studies – is the first to analyze the post 9/11 world in terms of global media and popular culture. Written in an engaging and candid manner by a leading expert in this field Argues that cross-cultural understanding can only be achieved by harnessing the power of global media, popular culture, information technology, and personal communications technologies Examines the global trend of using film, video, music, and TV "on-demand" as the framework through which we experience all

cultural activity Draws inspiration from the work of a range of theorists, from Charles Darwin to Anthony Giddens Candidly interrogates the very latest developments in world affairs, especially the roles of fundamentalist religious ideology, media globalization, and individualism, whose complex relationships have yet to be explained by social scientists

Organizations, Policy, and the Natural Environment Andrew J. Hoffman,Marc J. Ventresca,2002 This book brings together emerging perspectives from organization theory and management, environmental sociology, international regime studies, and the social studies of science and technology to provide a starting point for discipline-based studies of environmental policy and corporate environmental behavior. Reflecting the book's theoretical and empirical focus, the audience is two-fold: organizational scholars working within the institutional tradition, and environmental scholars interested in management and policy. Together this mix forms a creative synthesis for both sets of readers, analyzing how environmental policy and organizational practices are shaped, spread and contested.

The Black Hole of Public Administration Ruth Hubbard,Gilles Paquet,2010 In The Black Hole of Public Administration experienced public servant Ruth Hubbard and public administration iconoclast Gilles Paquet sound a wake-up call to the federal public service. They lament the lack of serious play going on in Canada's public administration today and map some possible escape plans. They look to a more participatory governance model - open source governing or small g governance - as a way to liberate our public service from antiquated styles and systems of governing. --

Learning to Seek Walter Truett Anderson,James A. Dator,Majid Tehranian,2011-12-31 The accelerating technological transformation in learn- ing has necessitated an ability to search and differentiate among the one billion web pages, libraries, databases, books, newspapers, magazines, radio and television stations, and opinion columns available online. This volume focuses on the normative challenges that the current technological transformation presents to all professionals engaged in higher education. Part I concentrates on the current social and technological trends. David Snyder presents an outline of technologies that have made open knowledge systems possible. Majid Tehranian argues that the new technological environment has made learning to seek out information more possible than ever before. Robert Fuller calls for an egalitarian rather than hierarchical approach to communication systems. Harlan Cleveland proposes integrative learning, broad thinking, and globally aware citizenship through education for wisdom. Part II focuses on problems of governance and finance in the new technological environment. John Hinchcliff takes up the problem of values and argues for the maintenance of traditional altruistic rather than Promethean goals. Karou Yamaguchi comes to the problem of the futures with the tools of system dynamics. William Bergquist calls for a reorganization of higher education to meet the needs for creation, transfer, and inculcation of knowledge and skills. Hamid Shirvani calls for the core values of transparency, integrity, open communication, and dignitarian approach as the guideposts in educational leadership. Walter Truett Anderson concludes by attempting to bring the complex technological, social, economic, and political variables into a holistic approach for the management of higher education. In 2005, at the Universities of the Future Conference, participants were asked to envision the future of higher education. Part III, presents their visions.
