**Daughters and Granddaughters of Farmworkers** Barbara Wells,2013-11-15 In *Daughters and Granddaughters of Farmworkers*, Barbara Wells examines the work and family lives of Mexican American women in a community near the U.S.-Mexican border in California’s Imperial County. Decades earlier, their Mexican parents and grandparents had made the momentous decision to migrate to the United States as farmworkers. This book explores how that decision has worked out for these second- and third-generation Mexican Americans. Wells provides stories of the struggles, triumphs, and everyday experiences of these women. She analyzes their narratives on a broad canvas that includes the social structures that create the barriers, constraints, and opportunities that have shaped their

lives. The women have constructed far more settled lives than the immigrant generation that followed the crops, but many struggle to provide adequately for their families. These women aspire to achieve the middle-class lives of the American Dream. But upward mobility is an elusive goal. The realities of life in a rural, agricultural border community strictly limit social mobility for these descendants of immigrant farm laborers. Reliance on family networks is a vital strategy for meeting the economic challenges they encounter. Wells illustrates clearly the ways in which the “long shadow” of farm work continues to permeate the lives and prospects of these women and their families.

**Growth Within Bounds** California. Commission on Local Governance for the 21st Century,2000 In 1997 the State of California Legislature created the Commission on Local Governance for the 21st Century to review current statutes &, where appropriate, recommend revisions to the laws that govern city, county, and special district boundary changes. Over a period of 16 months, the Commission held 25 days of public hearings, received over 100 recommendations, and had nearly 90,000 visits to the commission's website. Based upon this extensive input and deliberations on the information received, the Commission has issued this report, which concludes with a strategic plan for its implementation by the California Legislature. Redefining Urban and Suburban America Alan Berube,Bruce Katz,Robert E.

Lang,2007-01-30 Results from Census 2000 have confirmed that American cities and metropolitan areas lie at the heart of the nation's most pronounced demographic and economic changes. The third volume in the Redefining Urban and Suburban America series describes anew the changing shape of metropolitan American and the consequences for policies in areas such as employment, public services, and urban revitalization. The continued decentralization of population and economic activity in most metropolitan areas has transformed once-suburban places into new engines of metropolitan growth. At the same time, some traditional central cities have enjoyed a population renaissance, thanks to a recent book in living downtowns. The contributors to this book probe the rise of these new growth centers and their impacts on the metropolitan landscape, including how recent patterns have affected the government's own methods for reporting information on urban, suburban, and rural areas. Volume 3 also provides a closer look at the social and economic impacts of growth patterns in cities and suburbs. Contributors examine how suburbanization has affected access to employment for minorities and lower-income workers, how housing development trends have fueled population declines in some central cities, and how these patterns are shifting the economic balance between older and newer suburbs. Contributors include Thomas Bier (Cleveland State University), Peter Dreier (Occidental College), William Frey (Brookings), Robert Lang (Virginia Tech), Steven Raphael (University of California, Berkeley), Audrey Singer (Brookings), Michael Stoll (University of California, Los Angeles), Todd Swanstrom (St. Louis University), and Jill Wilson (Brookings).
