Thank Earth You Armand Daigle, 2014-02-03 Liberation and abundance bloom in arm's reach, but a young engineer's wrists are choked red by the chains of cubical slavery. Brought to his breaking point, he quits and confesses to his disappointed and worried parents that he has no plans of returning to a discipline they hold so dear. His world butterflies open. Relief and happiness come fast, but his new course remains obscured, and it's not until five months later, when he takes up with a pack of wolves, that direction begins to emerge. His surroundings become vibrant, lines dissolve, and never feeling so alive he pushes himself to precarious limits. And late one winter night, in the den where the wolves came from, the ex-engineer is confronted by a power that brings him both rapid bliss and the crumbling of his reality. Finding himself is a dark and constant battle between sanity and revelation in which he's not sure what side to take.

Dark Ecology Timothy Morton, 2016-04-12 Timothy Morton argues that ecological awareness in the present Anthropocene era takes the form of a strange loop or Möbius strip, twisted to have only one side. Deckard travels this oedipal path in *Blade Runner* (1982) when he learns that he might be the enemy he has been ordered to pursue. Ecological awareness takes this shape because ecological phenomena have a loop form that is also fundamental to the structure of how things are. The logistics of agricultural society resulted in global warming and hardwired dangerous ideas about life-forms into the human mind. Dark ecology puts us in an uncanny position of radical self-knowledge, illuminating our place in the biosphere and our belonging to a species in a sense that is far less obvious than we like to think. Morton explores the logical foundations of the ecological crisis, which is suffused with the melancholy and negativity of coexistence yet evolving, as we explore its loop form, into something playful, anarchic, and comedic. His work is a skilled fusion of humanities and scientific scholarship, incorporating the theories and findings of philosophy, anthropology, literature, ecology,

biology, and physics. Morton hopes to reestablish our ties to nonhuman beings and to help us rediscover the playfulness and joy that can brighten the dark, strange loop we traverse.

Cataract City Craig Davidson, 2014-02-06 Cataract City, a dead-end border town overlooking Niagara Falls. Owen Stuckey and Duncan Diggs are fast friends as kids - united by wrestling, go-karts, and metal bands - but as they grow into young men, their once simple affection competes with the tensions created by their respective circumstances. Owen, born to relative privilege, seems destined to get out of the city, while Duncan, honest but hard, is hurtling along the rails towards a future working the assembly line at the soulless biscuit factory, The Bisk. As Duncan becomes more and more desperate to escape, he finds himself at opposite ends of the law to Owen, and as the coils of the city creep ever tighter around the two friends, they find themselves struggling not to break free, but simply to survive.

"With pages of tips and twelve DIY projects, the book makes the free-spirited style easy to achieve." —Architectural Digest In *The New Bohemians*, LA-based designer Justina Blakeney defines the New Bohemians as creative individuals who are boutique owners and bloggers, entrepreneurs and ex-pats, artists and urban farmers. Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an

American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

In a world of seasonal foods, solar panels, skill-swapping schemes, cuttlefish toothpaste, and compost toilets, Boyle puts the fun into frugality and offers some great tips for economical and environmentally friendly living. By following his own strict rules, he learns ingenious ways to eliminate his bills and flourish for free. Heart-warming, witty, and full of money-saving tips, *The Moneyless Man* will inspire you to ask what really matters in life.

The Moneyless Manifesto Mark Boyle, 2012 In direct response to the interest and questions raised by readers of the 'Moneyless Man', in which Mark Boyle tells of his first year of operating completely without spending, earning, saving or using money, the 'Moneyless Manifesto' delves deeper in to the culture of modern economics, and provides a how-to on the logistics of going moneyless, or at least reducing dependency on money.

Doglands Tim Willocks, 2011-09-27 Furgul is a puppy born in a slave camp for racing greyhounds, and he has a terrible secret--he is himself only part greyhound. When the cruel owner of the camp recognizes Furgul's impure origins he takes Furgul to be killed, but Furgul manages a spectacular escape. Now Furgul must confront the indifference, complexity, warmth, and ferocity of the greater world, a world in which there seem to be two choices: live the comfortable life of a pet and sacrifice freedom or live the life of a free dog, glorious but also dangerous, in which every man will turn his hand against you. In the best tradition of *The Call of the Wild* and *Watership Down*, novelist Tim Willocks offers his first tale for young adults, an allegorical examination of human life through a dog's eyes, infused with heart, heroism, and the mysteries of the spirit.

Virginia Woolf and the Natural World Kristin Czarnecki, Carrie Rohman, 2011 *Virginia Woolf and the Natural World* is a compilation of thirty-one essays presented at the twentieth annual international conference on Virginia Woolf. This volume explores Woolf's complex engagement with the natural world, an engagement that was as political as it was aesthetic. The diversity of topics within this collection--ecofeminism, the nature of time, the nature of the self, nature and sporting, botany, climate, and landscape, just to name a few--fosters a deeper understanding of the nature of nature in Woolf's works. Contributors include Bonnie Kime Scott, Carrie Rohman, Diana Swanson, Elisa Kay Sparks, Beth Rigel Daugherty, Jane Goldman, and Diane Gillespie, among many others from the international community of Woolf scholars.

All the Wonder that Would Be Stephen Webb, 2017-05-03 It has been argued that science fiction (SF) gives a kind of weather forecast – not the telling

of a fortune but rather the rough feeling of what the future might be like. The intention in this book is to consider some of these bygone forecasts made by SF and to use this as a prism through which to view current developments in science and technology. In each of the ten main chapters - dealing in turn with antigravity, space travel, aliens, time travel, the nature of reality, invisibility, robots, means of transportation, augmentation of the human body, and, last but not least, mad scientists - common assumptions once made by the SF community about how the future would turn out are compared with our modern understanding of various scientific phenomena and, in some cases, with the industrial scaling of computational and technological breakthroughs. A further intention is to explain how the predictions and expectations of SF were rooted in the scientific orthodoxy of their day, and use this to explore how our scientific understanding of various topics has developed over time, as well as to demonstrate how the ideas popularized in SF subsequently influenced working scientists. Since gaining a BSc in physics from the University of Bristol and a PhD in theoretical physics from the University of Manchester, Stephen Webb has worked in a variety of universities in the UK. He is a regular contributor to the Yearbook of Astronomy series and has published an undergraduate textbook on distance determination in astronomy and cosmology as well as several popular science books.
