Orange Coast Magazine ,1981-07 Orange Coast Magazine is the oldest continuously published lifestyle magazine in the region, bringing together Orange County¹s most affluent coastal communities through smart, fun, and timely editorial content, as well as compelling photographs and design. Each issue features an award-winning blend of celebrity and newsmaker profiles, service journalism, and authoritative articles on dining, fashion, home design, and travel. As Orange County¹s only paid subscription lifestyle magazine with circulation figures guaranteed by the Audit Bureau of Circulation, Orange Coast is the definitive guidebook into the county¹s luxe lifestyle.

Technobiophilia Sue Thomas,2013-09-26 Why are there so many nature metaphors - clouds, rivers, streams, viruses, and bugs - in the language of the internet? Why do we adorn our screens with exotic images of forests, waterfalls, animals and beaches? In Technobiophilia: Nature and Cyberspace, Sue Thomas interrogates the prevalence online of nature-derived metaphors and imagery and comes to a surprising conclusion. The root of this trend, she believes, lies in biophilia, defined by biologist E.O. Wilson as 'the innate attraction to life and lifelike processes'. In this wide-ranging transdisciplinary study she explores the strong thread of biophilia which runs through our online lives, a phenomenon she calls 'technobiophilia', or, the 'innate attraction to life and lifelike processes as they appear in technology'. The restorative qualities of biophilia can alleviate mental fatigue and enhance our capacity for directed attention, soothing our connected minds and easing our relationship with computers. Technobiophilia: Nature and Cyberspace offers new insights on what is commonly known as 'work-life balance'. It explores ways to make our peace with technology-induced anxiety and achieve a 'tech-nature balance' through practical experiments designed to enhance our digital lives indoors, outdoors, and online. The book draws on a long history of literature on nature and technology and breaks new ground as the first to link the two. Its accessible style will attract the general reader, whilst the clear definition of key terms and concepts throughout should appeal to undergraduates and postgraduates of new media and communication studies, internet studies, environmental psychology, and human-computer interaction. www.technobiophilia.com

Spend Low, Live High Catherine Morsink,2002-09 Spend Low, Live High is a self-help book for busy people who are trying to find balance in their lives. Based on more than 50 years of collecting, testing, refining, and developing ideas, the author presents a sensible way of living well by managing time and money and maintaining good health. The book talks to readers in the conversational, sometimes humorous style of friends chatting over coffee. It offers alternatives rather than prescribing solutions. To find an appropriate spend low-live high lifestyle balance, readers are urged to compare potential savings in money with their cost in time and energy. The book reminds readers to choose realistic diet plans, practical fitness routines, and reasonable budget rules that can be maintained. Readers start their individualized approach by taking the Two-timing Survey focused on the ways they spend their time and money, compared with goals they would like to reach. Book chapters creatively address ten major issues: two-timing, savvy saving, casual organizing, crafty decorating, lazy gardening, domesticated cleaning, human conditioning, lighthearted eating, simplified meal planning, and naked traveling.

Coming Soon Keith M. Johnston,2009-09-12 The audience's first exposure to a new movie is often in the form of a "coming attraction" trailer, and short previews are also a vanguard for emerging technology and visual techniques. This book demonstrates how the trailer has educated audiences in new film technologies such as synchronized sound, widescreen and 3-D, tracing the trailer's status as a trailblazer on to new media screens and outlets such as television, the Internet, and the iPod. The impact and use of new technologies and the evolution of trailers beyond the big screen is followed into the digital era.

  Fractured Sandra Windsor,2021-03-04 "It's just a move," her father said. Her mother shrugged. Sarah cried. Fourteen and her dream country club life shattered. It's not just a move, it's a move to a farm with fields and animals and miles of dusty roads between farmhouses. She isn't even part of a town. Neither is her mother. These two lives move in parallel as each negotiates change within the confines of the 1950s Midwest mores. A perfect family: executive father, trophy wife, two daughters until this move rips the scabs off the marriage and fractures the family structure. "Readers will be swept away by FRACTURED, a timeless coming-of-age novel with an unforgettable heroine. Set in the 1950s, the novel evokes a more innocent time, but Sandra Windsor has a few plot twists up her sleeve that show the darkness hiding behind even the most perfect-seeming family. Windsor is a masterful storyteller with remarkable insight into the human condition. This novel is full of heart."

  Androids Chet Haase,2021-08-13 In 2004, Android was two people who wanted to build camera software. But they couldn't get investors interested. Today, Android is a large team at Google, shipping an operating system (including camera software) to over three billion devices worldwide. This is the inside story, told by the people who made it happen. "What are the essential ingredients that lead a small team to build software at the sheer scale and impact of Android? We may never fully know, but this first person account is probably the closest set of clues we have." —Dave Burke, VP of Android Engineering "Androids captures a strong picture of what the early development of Android, as well as the Android team, was like." —Dianne Hackborn, Android Framework Engineer "Androids is the engaging tale of a motley group of coders with a passion to make insanely great products who banged out the operating system when that idea seemed nuts. True to his geek genes, Chet Haase tells this remarkable tale of technical and business success from the trenches, an inspiring, massive collective effort of dozens of programmers who flipped their seemingly late timing to their advantage, and presaged a generation of platform builders. Read Androids to discover what it takes to create a hot tech team that shipped a product running today on more than 3 billion devices." —Jonathan Littman, co-author of The Entrepreneurs Faces: How Makers, Visionaries and Outsiders Succeed, and author of The Fugitive Game All profits from the book will be donated to charity.
