Kris Longknife: Defender Mike Shepherd,2013-10-29 Kris Longknife is back in the good graces of the brass—and to demonstrate that, they've promoted her to Admiral. Now her mission is to find the home base of the space pirates who are plaguing the fringes of the galaxy. But no mission is ever simple when your name is Longknife. And this time the complications range from the military to the personal, as Kris finds herself—reluctantly—having to make some command decisions about her future...

**Orbit-Shifting Innovation** Rajiv Narang,Devika Devaiah,2014-01-03 The Dynamics Of Ideas That Create History Orbit-shifting innovation happens when an area that needs transformation meets an innovator with the will and the desire to create, and not follow, history. At the heart of every orbit-shifting innovation is the breakthrough that achieves a transformative impact. Businesses, social enterprises and even governments need orbit-shifting ideas to create a transformative impact. But how does that ground breaking idea come about, and what translates it into actuality? Charting the vast global landscape of orbit-shifting innovation and using unique examples from prominent businesses, the social sector, entrepreneurs and public services - spread across US, UK, Europe, Africa and Asia - the authors build insight into the key drivers behind taking on a transformative challenge and provide a unique framework to navigate the pitfalls and challenges in making it happen. Orbit-shifting innovation empowers everyone to overcome the obstacles to innovation and provides the tools to maximize the impact of transformative change. The inspirational examples and tools for success compel leaders and entrepreneurs to not only pursue impossible challenges but lead the successful journey from conception of an orbit-shifting idea to actually creating history.

*Kriglem* Bob Mann,2004-12 The War ended twenty years ago, and the time since has been one of reconciliation and reconstruction. And expansion: humanity is pushing into Space again. The sparsely settled Frontier, and beyond it, the lawless Out, are growing in volume, wealth and stellar systems. The dream of universal peace seems to have arrived at last: though criminals and pirates still gnaw at civilization's edges as they always have and always will, vast armies no longer mobilize to do battle in planet-crushing conflagrations. But there are dangers in Space, and strange things happening at Land Ho colony. A pair of tramp miners bring in a body, killed by an agent that left only a nosebleed and a face frozen in agony as evidence of its passing. A deranged pilot fires nuclear-tipped missiles at colony defenses, then dies through suicide-by-cop. An innocent miner/engineer becomes a target for murder. As Detective Vasily Laranov investigates, he uncovers a labyrinthine web of clandestine and criminal enterprises that stretch deep into the Frontier--and beyond. Humanity is indeed pushing into Space. And something is pushing back.

**Artificial Immune Systems** Paul S. Andrews,Jon Timmis,Nick D. L. Owens,Uwe Aickelin,Emma Hart,Andrew Hone,Andy Tyrrell,2009-08-12 Artificial immune systems (AIS) is a diverse and maturing area of research that bridges the

disciplines of immunology and engineering. The scope of AIS ranges from immune-inspired algorithms and engineering solutions in software and hardware, to the understanding of immunology through modeling and simulation of immune system concepts. AIS algorithms have been applied to a wide variety of applications, including computer security, fault tolerance, data mining and optimization. In addition, theoretical aspects of artificial and real immune systems have been the subject of mathematical and computational models and simulations. The 8th International Conference on AIS (ICARIS 2009) built on the success of previous years, providing a forum for a diverse group of AIS researchers to present and discuss their latest results and advances. After two years outside Europe, ICARIS 2009 returned to England, the venue for the first ICARIS back in 2002. This year's conference was located in the historic city of York, and was held in St. William's College, the conference venue of York Minster, northern Europe's largest Gothic cathedral.

**Shooting War** Anthony Lappe, 2009-08-29 The global war on terror is raging out of control. The president is popping Prozac. And the #1 selling videogame in 2011 America is the terrorist-simulator Infidel Massacre: Los Angeles. On the streets of gentrified Brooklyn, videoblogger Jimmy Burns' latest anti-corporate rant is cut short by a terrorist bombing of a Starbucks...but his live feed isn't. When his dramatic footage is uploaded by Global News (Your home for 24-hour terror coverage) and rebroadcast across the planet, the obscure blogger is transformed into an overnight media sensation. The next thing he knows he's on a Black Hawk helicopter inbound for Baghdad, working for the same mainstream media monster he once loathed. Burns soon finds that everyone from his ratings-ravenous network overlords to Special Ops troops with messianic complexes to a charismatic band of tech-savvy jihadists all want to make him their pawn. Shooting War is an irreverent and unflinching graphic novel satirizing network news, the Iraq War, and the burgeoning citizen journalism movement that Rolling Stone magazine calls a scary-smart take on what the horrors of the future may hold. Fierce, shocking, over-the-top, and wickedly smart. - New York Magazine Ambitious...A determined citizen journalist (and overnight celebrity) infuriated by the mainstream media's indifference to the endless war, Burns aims to bring home the facts on the ground. -Paper This is a winner...the Apocalypse Now of the War on Terrorism, told in the form of a brilliantly rendered graphic novel. -Forbes.com A stunningly rendered graphic novel that manages to stick a red-hot skewer the war on terror, Islamic jihad, the mainstream media and the antiestablishment blogosphere in one fell swoop. -Newsweek.com

**Xenos Rampant** Daniel Mersey, Richard Cowen, 2022-11-24 Science Fiction wargame rules for large skirmishes, based on the popular Rampant system. Xenos Rampant is a setting agnostic, large skirmish, miniature wargame for fighting science fiction battles using 28mm figures. Developed from the popular Lion Rampant ruleset, the core mechanics featured within will be instantly recognisable to those familiar with the other Rampant systems, while still being accessible to new players. Xenos Rampant contains all the rules, army lists, and scenarios required to fight science fiction battles as well as a whole host of subgenres including: post-apocalyptic, weird war, near future.

So, whatever your science fiction preference, the rules can cover it – just let your imagination run rampant.

**Lash-Up** Larry Bond, 2015-05-05 New York Times bestselling author Larry Bond thrills again in *Lash-Up*, an explosive new novel. In a bid to dominate Asia and the western Pacific, China provokes a military crisis with the United States and then starts shooting down GPS satellites. America has only a short amount of time to devise some way of protecting its remaining satellites or China will gain an enormous advantage in the coming conflict. The only way the satellites can be protected is from orbit, so an armed spacecraft must be quickly designed, built, and launched to fight on this new battlefield. A team of soldier-scientists must construct a craft capable of knocking space weapons out of the sky. The fate of the United States rests on the shoulders of these determined people. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Defenders** Will McIntosh, 2014-05-13 A new epic of alien invasion and human resistance by Hugo Award-winning author Will McIntosh. The invaders came to claim earth as their own, overwhelming us with superior weapons and the ability to read our minds like open books. Our only chance for survival was to engineer a new race of perfect soldiers to combat them. Seventeen feet tall, knowing and loving nothing but war, their minds closed to the aliens. But these saviors could never be our servants. And what is done cannot be undone.

*Dreaming of Eden* James Lucien, *Dreaming of Eden* is a rapid-paced, action-heavy, post-cyberpunk thriller, supercharged with excitement and enlightenment. A full-length novel with a spiritual journey laced between the hammering heartbeats of the inspirational story.

**Single Stage to Orbit** Andrew J. Butrica, 2004-12-01 Winner of the Michael C. Robinson Prize for Historical Analysis given by the National Council on Public History While the glories and tragedies of the space shuttle make headlines and move the nation, the story of the shuttle forms an inseparable part of a lesser-known but no less important drama—the search for a reusable single-stage-to-orbit rocket. Here an award-winning student of space science, Andrew J. Butrica, examines the long and tangled history of this ambitious concept, from its first glimmerings in the 1920s, when technicians dismissed it as unfeasible, to its highly expensive heyday in the midst of the Cold War, when conservative-backed government programs struggled to produce an operational flight vehicle. Butrica finds a blending of far-sighted engineering and heavy-handed politics. To the first and oldest idea—that of the reusable rocket-powered single-stage-to-orbit vehicle—planners who belonged to what President Eisenhower referred to as the military-industrial complex added experimental (X), aircraft-like capabilities and, eventually, a faster, cheaper, smaller managerial approach. *Single Stage to Orbit* traces the interplay of technology, corporate interest, and politics, a combination that well served the conservative space agenda and ultimately triumphed—not in the realization of inexpensive, reliable space transport—but in a vision of space militarization and commercialization that would appear settled United States policy in the early twenty-first century.

**Space Safety is No Accident** Tommaso Sgobba, Isabelle Rongier, 2015-06-04 Includes the proceedings from the 7th IAASS Conference, *Space Safety is No Accident*, held in Friedrichshafen, Germany, in October 2014. The 7th IAASS

Conference, "Space Safety is No Accident" is an invitation to reflect and exchange information on a number of topics in space safety and sustainability of national and international interest. The conference is also a forum to promote mutual understanding, trust and the widest possible international cooperation in such matters. The once exclusive "club" of nations with autonomous sub-orbital and orbital space access capabilities is becoming crowded with fresh and ambitious new entrants. New commercial spaceports are starting operations and others are being built. In the manned spaceflight arena a commercial market is becoming a tangible reality with suborbital spaceflights and government use of commercial services for cargo and crew transportation to orbit. Besides the national ambitions in space, the international cooperation both civil and commercial is also gaining momentum. In the meantime robotic space exploration will accelerate and with it the need to internationally better regulate the usage of nuclear power sources. Space-bound systems and aviation traffic will share more and more a crowded airspace, while aviation will increasingly rely on space-based safety-critical services. Finally, most nations own nowadays space assets, mainly satellites of various kinds and purposes, which are under the constant threat of collision with other spacecraft and with the ever increasing number of space debris. Awareness is increasing internationally (as solemnly declared since decades in space treaties) that space is a mankind asset and that we all have the duty of caring for it. Without proactive and courageous international initiatives to organize space, we risk to negate access and use of space to future generations.

Opera's Orbit Stefanie Tcharos, 2011-02-03 Tcharos illustrates opera's engagement in a larger musical sphere of Arcadian Rome, where opera inspired debate and fuelled ideological reform.

*Defender* C. J. Cherryh, 2002-11-05 The fifth novel in Cherryh's *Foreigner* space opera series, a groundbreaking tale of first contact and its consequences... Nearly ten years after the unexpected return of the starship Phoenix, the alien atevi have three functioning space shuttles, and teams of atevi engineers labor in orbit to renovate the space station. But these monumental advances not only add a dangerously powerful third party to an already precarious diplomatic situation, but rouse pro- and anti-space factions in atevi society to incendiary levels. To help negotiate these treacherous diplomatic waters, Tabini-aiji, the powerful head of the atevi's Western Association, has sent the only human he fully trusts into space: his own paidhi, Bren Cameron. However, the threat of possible invasion by hostile aliens who attacked Phoenix's station in a far-off sector of space hangs over them all. And when one of the senior captains of the Phoenix confesses that this station was not completely destroyed, as had been previously thought, the crew mutinies. How can Bren hope to mediate on a station overcome by a rebellious crew intent on taking the Phoenix on a rescue mission back into hostile alien territory? The long-running *Foreigner* series can also be enjoyed by more casual genre readers in sub-trilogy installments. *Defender* is the fifth *Foreigner* book and the the second book of the second sub-trilogy.

**From Catalonia to the Caribbean: The Sephardic Orbit from Medieval to Modern Times** Federica Francesconi, Stanley Mirvis, Brian Smollett, 2018-08-20 *From Catalonia to the Caribbean* is a polyphonic collection of essays in dialogue

with Jane S. Gerber's seminal contributions to Sephardic Studies. The essays present new sources and new perspectives that challenge our perceptions of the Sephardic experience from Medieval to Modern Times.

*Security and Stability in the New Space Age* Brad Townsend, 2020-07-12 This book examines the drivers behind great power security competition in space to determine whether realistic strategic alternatives exist to further militarization. Space is an area of increasing economic and military competition. This book offers an analysis of actions and events indicative of a growing security dilemma in space, which is generating an intensifying arms race between the US, China, and Russia. It explores the dynamics behind a potential future war in space and investigates methods of preventing an arms race from an international relations theory and military-strategy standpoint. The book is divided into three parts: the first section offers a broad discussion of the applicability of international relations theory to current conditions in space; the second is a direct application of theory to the space environment to determine whether competition or cooperation is the optimal strategic choice; the third section focuses on testing the hypotheses against reality, by analyzing novel alternatives to three major categories of space systems. The volume concludes with a study of the practical limitations of applying a strategy centered on commercialization as a method of defusing the orbital security dilemma. This book will be of interest to students of space power, strategic studies, and international relations.
