Star Trek: Corps of Engineers: Wildfire David Mack,Keith R. A. DeCandido,J. Steven York,Christina F. York,2004-11-01 Whenever there's a need to fix, repair, or salvage, Starfleet calls in the crack S.C.E. team on the U.S.S. da Vinci. Under the command of Captain David Gold and Commander Sonya Gomez, the S.C.E. solves the unsolvable, from finding a Starfleet vessel lost inside a holographic ship to doping out new technology captured during the Dominion War. However, the da Vinci's mission to Galvan VI will prove to be the S.C.E.'s greatest challenge to date, as they must salvage the U.S.S. Orion from the turbulent atmosphere of a gas giant. As if that wasn't enough, the Orion is carrying the prototype of the deadly Wildfire device -- a protomatter warhead that can ignite gas giants into stars -- and the planet seems to be home to a strange alien life-form that may have been responsible for the Orion 's destruction! Wildfire contains the complete eBook editions of S.C.E. adventures #20-24: Enigma Ship, War Stories Book 1, War Stories Book 2, Wildfire Book 1, and Wildfire Book 2.

Poussin's Paintings David Carrier,1993 Employing the methodologies of the new art history as well as some tools provided by poststructuralism, historiography, and analytic philosophy, Poussin's Paintings offers a novel approach to the art of Poussin. David Carrier begins with a comprehensive analysis of Poussin's self-portraits, which provides the starting point for a critical discussion of the traditional strategies of Poussin scholarship and for an evaluation of the status of this artist. Carrier shows that Poussin can be properly understood only by seeing how his visual and political culture differs from ours. Carrier examines the traditional approaches of Poussin scholars, noting the limitations of their views and showing how they not only shape our image of the artist but also restrict our ability to properly grasp his concerns. Carrier also considers the important conceptual claims of connoisseurs and reveals how their work invokes an implicit theory of Poussin's development. Carrier then focuses on a group of paintings concerned with erotic themes, demonstrating the inadequacy of traditional accounts of these pictures. He extends his analysis to a discussion of Poussin's landscapes, which have a different and more important place in his development than the older accounts claim. Carrier places Poussin within the artistic and political culture of seventeenth-century Rome. He asserts that artists of the time were concerned with the problem of belatedness and that Poussin attempted to return to the tradition of the High Renaissance, reworking images from that tradition in response to his own visual culture. Carrier argues that Poussin's art is thus best understood as a response to that setting for baroque art, and he relates Poussin's work to the later tradition of French history painting.

Statius' Silvae and the Poetics of Empire Carole E. Newlands,2002-03-14 Statius' Silvae, written late in the reign of Domitian (AD 81-96), are a new kind of poetry that confronts the challenge of imperial majesty or private wealth by new poetic strategies and forms. As poems of praise, they delight in poetic excess whether they honour the emperor or the poet's friends. Yet extravagant speech is also capacious speech. It functions as a strategy for conveying the wealth and grandeur of villas, statues and precious works of art as well as the complex emotions aroused by the material and political culture of empire. The Silvae are the product of a divided, self-fashioning voice. Statius was born in Naples of non-aristocratic parents. His position as outsider to the culture he celebrates gives him a unique perspective on it. The Silvae are poems of anxiety as well as praise, expressive of the tensions within the later period of Domitian's reign.

Celestial Inclinations Anne-Marie Lewis,2023 Celestial Inclinations: A Life of Augustus provides a new perspective on the life and career of the first Roman emperor Augustus (63 B.C.-A.D. 14) and presents the case that Augustus used his knowledge of the celestial sphere in various ways to confirm for himself and convey to others that the heavens supported his activities on earth and his inevitable greatness. The book is based on fresh assessments of relevant ancient historical, literary, astronomical, astrological, and artistic sources for the years prior to and during the life of Augustus. The book combines these sources with astronomical sky maps and astrological diagrams to offer fresh interpretations of critical events in the life of Augustus at a time when the celestial sphere had come to play an important cultural and political role. Topics include the identification of the celestial object that appeared at the ludi in honor of Caesar in 44 B.C.; the Battle of Actium; the iconography of the Tellus Relief Panel on the Ara Pacis Augustae; the Ludi Saeculares; Augustus' major building projects in Rome; and Augustus' interactions with major figures of the period such as Cicero, Caesar, Agrippa, and Antonius--

Wildfire Book 1 David Mack,2003-01-02 The da Vinci goes on a dangerous salvage mission: to rescue the U.S.S. Orion from a gas giant. As if the turbulent atmosphere of the planet wasn't enough, the Orion is carrying the prototype of the deadly Wildfire device -- a protomatter warhead that can ignite gas giants into stars. But the operation may be more than even Capt. David Gold's crack team of engineers can handle, as they have to fight against the liquid atmosphere of the planet, the volatility of the Wildfire warhead -- and a strange alien life-form that may be responsible for the attack on the Orion!

The Orion Complex: A Case Study of Interstellar Matter C.D. Goudis,2012-12-06 This work deals with some of the most typical complexes of interstellar matter and is intended to serve both as a reference book for the specialist and as an introduction for the newcomer to the field. It is hoped to meet the first aim by presenting a holistic view of the well studied complexes in Orion, built on information derived from various branches of modern Astrophysics. The wealth of published data is presented in the form of photographs, contour maps, diagrams and numerous heavily annotated tables. The second aim is pursued by providing an outline of the complexes, the physical problems associated with them, the empirical models describing their behaviour and, in addition, by including an extended Appendix section summarizing the numerous methods employed to derive the physical parameters of an H II region and the dust and molecular cloud physically associated with it. The book consists of five chapters and four Appendix sections. Chapter 1, which is concerned with the large scale view of the Orion region, outlines the morphology of the area and examines in particular the nature of Barnard's Loop and the associated filamentary structure in addition to the origin of the I Orion OB association. Chapter 2 focuses on the ionized gas of the Orion H II/molecular complex i. e.

Illustrating the Phaenomena Elly Dekker,2013 In this volume all extant celestial maps and globes made before 1500 are described and analysed. It also discusses the astronomical sources involved in making these artefacts in antiquity, the Middle Ages, the Islamic world and the European Renaissance before 1500.

Quirky Sides of Scientists David R Topper,2007-08-03 These historical narratives of scientific behavior reveal the often irrational way scientists arrive at and assess their theories. There are stories of Einstein's stubbornness leading him to reject a correct interpretation of an experiment and miss an important deduction from his own theory, and Newton missing the important deduction from one of his most celebrated discoveries. This enlightening book clearly demonstrates that the greatest minds throughout history arrived at their famous scientific theories in very unorganized ways and they often did not fully grasp the significance and implications of their own work.

,2018-11-30 The Apocalypse of Enoch and Bhuśunda The Apocalypse of Enoch and Bhuśunda challenges the underlying assumptions of the classical roots of civilization by restoring the original context of creation mythology. In this second volume of A Chronology of the Primeval Gods and the Western Sunrise, ancient myths from multiple geographies are correlated to spikes in cosmic rays over the past 120,000 years – as documented in ice core data. The chronology and content of these myths tell us that the primary forces behind these cataclysms were the most ancient gods - hyper-nova at the Galactic Center associated with Sgr A*(The Dragon), Sgr West (The Beast) and Sgr East (Hiranyāksha and Hiranyakas'ipu), with secondary supernova seen as the birth of new, destructive gods. Ancient myth has documented the cataclysmic destruction of the world on at least twenty occasions with four major geo-polar migrations, which has resulted in a shift of the earth's equator on at least one occasion. Multiple myths are shown to represent a view of the sky that can only be seen from the Antarctic region. Multiple versions of the myths of Orion are analyzed, showing clear linkages between the Vedic myth of Trisanku, the Book of Genesis, Senmut's Tomb, and the myths of Prajāpati Daksa representing the oldest version of

the Orion myth – older than Trishanku and Genesis by 20,000 years! The stunning conclusion explains how the “Watchers” of Enoch were the Vedic descendants of Ila and Iksvaku. These descendants of the seventh Manu had been observing and recording the stars as a source of cataclysm for at least 15,000 years prior to Enoch, thus allowing Enoch to prophesize a ‘new heaven.’ That prophecy became the foundation for St John’s Book of Revelations, which is shown to be a description of a series of cataclysms attributed to Sgr West. The book offers a new theory for explaining geo-polar migration. That theory suggests small shifts in the location of the earth’s center of gravity underlie each migration, but that there are multiple causes for the shifts.

The Shroud of the Second Coming Scott Simpson,2022-07-02 What if in one possible future that the burial cloth of Jesus Christ is proven to be authentic? That the technology of the given time can identify the creation of something so extraordinary that it goes way beyond scientific understanding? And what if someone was to tell you that it could happen in this lifetime? Well, there is such a possibility. And based on scientific facts with biblical understanding is a story describing such an event as it unfolds. Based on facts, this fantasy has it all. The Shroud of Turin, The Hadron Particle Collider, Spiritual Intervention, Paranormal Events, World Involvements, Battles, and Global Terrorism. In the near future, an Earthquake erupts out in the West Bank desert, creating an eerie blue glow that forms over a valley they call The Corridor. Looked upon as a scientific phenomenon, science and religion have a need to investigate. And during their research, experience anomalies that go way beyond human understanding and are soon recognized as spiritual occurrences. Further up north in Europe is the Particle Collider and its discovery of another dimensional plane. It's there that they make the most significant find of them all when testing for the Shroud's authenticity. In effect, its repercussions have a global impact that alters the course of humanity.

Wildfire David Mack,Keith R. A. DeCandido,2012-08-14 Wherever there is a need to fix a malfunction or rescue a damaged ship, the Federation calls in the crack team from Starfleet S.C.E. From finding a Starfleet vessel lost inside a holographic ship, to checking out new technology captured during the Dominion War, no task is too bizarre or too dangerous for Captain David Gold, Commander Sonya Gomez and their crew of S.C.E. troubleshooters on board the USS da Vinci. However their mission to Galvan VI could prove their greatest challenge yet. Not only must they salvage the USS Orion from the turbulent atmosphere of a gas giant, but the Orion is carrying the prototype of the deadly Wildfire device, a protomatter warhead that can ignite gas giants into stars. And to complicate matters still further they encounter an unknown alien life-form that may have lured the USS Orion to its destruction...

Connecting Theory and Practice in Middle School Literacy Jason DeHart,Carla K. Meyer,Katie Walker,2021-12-27 Bringing together the voices of researchers and teachers, this volume addresses how teachers connect theory to practice in the middle school English Language Arts education setting and explores how to teach and engage with young adults in a way that treats them as ethical and thoughtful citizens. The book bridges the gap between educational theory and real-world implementation and covers a range of timely topics in middle level education through a focus on text choice, identity, and practice. Contributors acknowledge and balance the challenges associated with the reality of teaching, including time constraints, sudden shifts, and fast-paced work, with real-world guidance on key topics, such as supporting multilingual students, queering middle grade pedagogies, teaching diverse texts, examining racial bias in the classroom, and critical digital literacy. Ideal for courses on middle level education and literacy education, this book encourages and equips pre-service teachers to engage in meaningful conversations with their students that foster reflection and transformative learning.
