Das OpenStreetMap Handbuch Walter Immler, 2014-12-14 OpenStreetMap (oder kurz: OSM) ist ein einzigartiges internationales Projekt mit dem Ziel, eine freie Weltkarte zu erschaffen, die genauer und

aktueller ist als jede andere und von allen Menschen auf der Erde lizenzkostenfrei genutzt und auch beliebig weiterverarbeitet werden kann. Fast zwei Millionen sogenannte Mapper tragen mit ihrem Fachwissen und ihrer Ortskenntnis bereits zu der Erweiterung und Aktualisierung des Kartenmaterials bei und erfassen per GPS zusätzliche Daten. OpenStreetMap-Daten bearbeiten: Dieses Buch lädt ein, sich selbst als Mapper anzumelden und neue Informationen zu OpenStreetMap beizutragen. Dazu werden in zahlreichen Anwendungsbeispielen die wichtigen Handgriffe im Umgang mit den verschiedenen OpenStreetMap-Editoren und Datenbanktools vermittelt. Anhand eines überschaubaren Projektgebiets zeigt das Buch, was in OpenStreetMap-Karten alles möglich ist. Für Entwickler: Webentwickler können OpenStreetMap-Karten als Wegbeschreibung in eigene Webseiten einbinden sowie über zusätzlich auf den Karten gesetzte Markierungen bestimmte Punkte kennzeichnen. Spezialprogramme wie Maperitive ermöglichen das Rendern eigener Karten mit besonderen Informationen anhand selbst erstellter Regeldateien. Die Vielfalt von OpenStreetMap: OpenStreetMap-Karten- und Datenmaterial wird nicht nur auf der interaktiven Karte, sondern auch auf zahlreichen Spezialkarten und Apps verwendet. Das Buch zeigt die Vielfalt der Nutzungsmöglichkeiten und wie man auch diese Karten erweitern und für eigene Zwecke nutzbar machen kann.

Introducción a la Investigación en Geografía DE LÁZARO Y TORRES María Luisa, MORALES YAGO Francisco José, 2021-08-31 La creciente importancia de la investigación en geografía se hace patente desde los primeros años de la formación universitaria hasta la realización de los Trabajos Fin de Grado (TFG) y Máster (TFM), e incluso en los inicios de la tesis doctoral. Aspectos esenciales de la misma responden al modelo IMRyD. Así, los capítulos 1 y 2 se ocupan de la contextualización de la ciencia, de interés para la Introducción; los capítulos 3 y 4 aconsejan sobre el manejo de datos de distintas fuentes, empleando diferentes técnicas, de gran utilidad para abordar una Metodología cuyos Resultados respondan a los objetivos de investigación; y, por último, la Discusión, que supone valorar la relevancia de la propia investigación y contrastarla con la de otros autores. Los dos últimos capítulos se ocupan de cómo redactar el informe final y cómo citar. No puede faltar un enfoque de sostenibilidad, que se desarrolla como broche final del libro, en el último anexo, que hace referencia a los Objetivos de Desarrollo Sostenible bajo el título: «Los ODS como elementos transversales esenciales en la investigación».

A lo largo de todos los capítulos de este libro se exponen propuestas didácticas que permiten trabajar con los alumnos sobre el patrimonio desde una amplia perspectiva que abarca tanto el ámbito de lo natural como de lo cultural y matemático. La publicación de un texto sobre este patrimonio es la mejor forma de lograr ciudadanos activos, sensibles y comprometidos con su entorno, con la defensa de la herencia de nuestros antepasados y del planeta Tierra, y partícipes de un futuro para la convivencia y el desarrollo armónico de todos los seres humanos. Como muchas investigaciones han corroborado, los modelos generales y abstractos no son útiles para el profesorado, pues para ser eficaces se requieren propuestas didácticas específicas. Es por ello por lo que los aspectos del patrimonio tratados en este libro se trabajan de forma aplicada y, por tanto, se refieren a contextos locales concretos –en este caso a la Comunidad de Madrid, que es el entorno directo de los autores-. Sin embargo, todas las técnicas que se describen, así como los medios y métodos que se proponen son extrapolables a otros entornos ya sean españoles, europeos o latinoamericanos y las propuestas servirán de ejemplificación de cómo trabajar por proyectos con el patrimonio cercano a cada profesor. Las propuestas didácticas expuestas están avaladas por las investigaciones realizadas por el profesorado del Departamento de Didácticas Específicas de la Facultad de Formación de Profesorado y Educación de la Universidad Autónoma de Madrid (UAM). Esta publicación será una útil herramienta de trabajo para el profesorado de las Facultades de Educación, los alumnos de los Grados de Educación Infantil y Educación Primaria y de los Másteres de Educación Secundaria y Obligatoria (MESOB) en sus distintas especialidades, así como para los maestros en ejercicio. Todos ellos encontrarán propuestas didácticas innovadoras en los campos de las Didácticas de las Ciencias Sociales, las Ciencias Experimentales y las Matemáticas.

Backpacking in the Technological Era Joseph Zhang, Maximize the enjoyment, convenience, and safety of your hike with these free technologies. Technology is all around us. The development of GPS and increasingly advanced software applications motivates you and me to explore and travel to remote places with greater confidence. While you should always bring the trusty and forever reliable ten essentials and follow general outdoor ethics principles (like Leave No Trace!), the value in these applications is undeniable, making them a smart addition to your trip preparation and smartphone. Use of a mobile phone should be limited to conserve battery and minimize distractions, so I only discuss worthwhile applications that add educational and safety utility. In this forever evolving market for outdoor applications, I summarize and guide you through the most relevant software from my experiences out on trail. For each application recommended, from gear lists to smartphone GPS navigation, I provide an introduction and a fundamental guide to get started with screenshots and examples. I made sure that all the technologies are free, promoting the principle that just like technology, the outdoors should be accessible by all. This eBook is broken down into three major parts. The first part presents technologies to facilitate the preparation for a trip, including resources used to organize gear which can also help in terms of mental preparation and

streamlining your pack weight. It also contains navigation tools used to devise a route and calculate statistics, such as distance and elevation. The second section includes applications that are used while out on the trail. These include mobile maps with GPS tracking that do not need an internet connection to operate and the highly informative but optional applications used to educate yourself about the outdoors and wildlife. Finally, I cover advanced settings to minimize battery drain since I notice a lot of hikers pack unnecessarily bulky power banks to supply minimal phone use. A dead phone is a safety hazard since you might end up needing to make an emergency call or SMS.

Swiss National Forest Inventory – Methods and Models of the Fourth Assessment Christoph Fischer, Berthold Traub, 2019-09-24 The Swiss National Forest Inventory (NFI) is a forest survey on national level which started in 1982 and has already reached its 5th survey cycle (NFI5). It can be characterized as a multisource and multipurpose inventory where information is mainly collected from terrestrial field surveys using permanent sample plots. In addition, data from aerial photography, GIS and forest service questionnaires are also included. The NFI's main objective is to provide statistically reliable and sound figures to stakeholders such as politicians, researchers, ecologists, forest service, timber industry, national and international organizations as well as to international projects such as the Forest Resources Assessment of the United Nations. For Switzerland, NFI results are typically reported on national and regional level. State of the art methods are applied in all fields of data collection which have been proven to be of international interest and have even served as a basis for other European NFIs. The presented methods are applicable to any sample based forest inventory around the globe. In 2001 the Swiss NFI published its methods for the first time. Since then, many methodological changes and improvements have been introduced. This book describes the complete set of methods and revisions since NFI2. It covers various topics ranging from inventory design and statistics to remote sensing, field survey methods and modelling. It also describes data quality concepts and the software framework used for data storage, statistical analysis and result presentation.

Cyberspace J. Martín Ramírez, Luis A. García-Segura, 2017-05-11 This book covers many aspects of cyberspace, emphasizing not only its possible 'negative' challenge as a threat to security, but also its positive influence as an efficient tool for defense as well as a welcome new factor for economic and industrial production. Cyberspace is analyzed from quite different and interdisciplinary perspectives, such as: conceptual and legal, military and socio-civil, psychological, commercial, cyber delinquency, cyber intelligence applied to public and private institutions, as well as the nuclear governance.

The Cycle Touring Diaries - Diary 1: Land's End to John O' Groats Bradley Howard, 2014-02 In 2012, Bradley Howard set off on a journey which lasted almost a month, which ran roughly 1,000 miles from the southern most tip of the U.K. to the northern most part of it. During his cycle, Bradley visited County after County, and he 'no-trace' camped every night of it. As if that wasn't enough, he took on many National Parks such as Dartmoor and The Cairngorms. Whilst on the tour, he saw many amazing sights including Lichfield Cathedral, Edinburgh Castle, and the Forth Road Bridge, and much more besides. Through his trip, Bradley kept a journal, which he has now turned into this book, to share his knowledge and adventures with others. In this book, he gives us his reflections on profound insights that came from his adventure, how he managed to live on a budget whilst being on the road, and how he kept himself fuelled whilst he still maintained his Vegan diet. Along the way, Bradley worked hard to tread in harmony with the environment. So pack your pannier bags, let's go on an adventure!

Technology and the City Tan Yigitcanlar, 2016-04-28 The interplay between smart urban technologies and city development is a relatively uncharted territory. Technology and the City aims to fill that gap,
