Statebuilding, Security-Sector Reform and the Liberal Peace Barry J. Ryan, 2011-03-31 This book explores how and why police reform became an international phenomenon in the era of statebuilding that followed the end of the Cold War. Police reform has become an indispensable element in the spread of liberal democracy. Policing is distinguished by its ability to combine reasonable and forcible methods to preserve and spread liberal values. The book examines the reason police reform was introduced as a method of building consensus in Latin America and the Balkans and documents the development of its use in Africa, the Middle East and the Caucasus region. It illustrates how police power binds the liberal value of freedom to the security needs of post-conflict regions and discusses its force as a strategy to bring law and order to a global security domain. Drawing on a multi-disciplinary approach to the subject, the book delves deeply into policing as a method to bring coherence to global security. It traces the presence of coherent police strategies in contemporary international relations through studies of the United Nations, the European Union and the Organization for Security and Cooperation in Europe. By contrasting police reform with security sector reform, the book explores how liberal peace is imagined by the international NGO sector, state aid agencies and international organizations. This book will be of much interest to students of statebuilding, post-conflict reconstruction, critical security studies, development studies and IR in general.

The Afghan-Central Asia Borderland Suzanne Levi-Sanchez, 2016-07-15 Based on extensive, long-term fieldwork in the borderlands of Afghanistan and Tajikistan, this book explores the importance of local leaders and local identity groups for the stability of a state's borders, and ultimately for the stability of the state itself. It shows how the implantation of formal institutional structures at the border, a process supported by United Nations and other international bodies, can be counterproductive in that it may marginalise local leaders and alienate the local population, thereby increasing overall instability. The study considers how, in this particular borderland where trafficking of illegal drugs, weapons and people is rampant, corrupt customs and border personnel, and imperfect new institutional arrangements, contributed to a complex mix of oppression, hidden protest and subtle resistance, which benefitted illicit traders and hindered much needed humanitarian work. The book relates developments in this region to borderlands elsewhere, especially new borders in the former Soviet bloc, and argues that local leaders and organisations should be given semi-autonomy in co-ordination with state border forces in order to increase stability and the acceptance of the state.
