Teaching Young Children Social Studies Gayle Mindes,2006-09-30 By linking theory to practice with an emphasis on national and state standards, Head Start Performance Standards, No Child Left Behind, and IDEA, the authors coherently combine principles of child development and social studies content to create a solid program for preschool through grade three. The authors maintain the overriding idea throughout the Teaching Young Children series—that strategies derived from knowledge of child development are used to teach content knowledge. It is this concern that makes this volume an excellent resource for teachers and parents. In addition to specific discussions of how to build and conduct a social studies curriculum, the work includes vignettes of teachers and children in the classroom; graphics illustrating concepts and methods; and matrices, charts and tables to enhance understanding. The authors effectively intertwine social learning in young children and development of self-concept with the theme-based curriculum of the National Council for Social Studies, the principles of multicultural education, parent collaboration to support learning, and creating connections between classroom and community.

Community and the Politics of Place Daniel Kemmis,1990 Thomas Jefferson envisioned a nation of citizens deeply involved in public life. Today Americans are lamenting the erosion of his ideal. What happened in the intervening centuries? Daniel Kemmis argues that our loss of capacity for public life (which impedes our ability to resolve crucial issues) parallels our loss of a sense of place. A renewed sense of inhabitation, he maintains —of community rooted in place and of people dwelling in that place in a practiced way—can shape politics into a more cooperative and more humanly satisfying enterprise, producing better people, better communities, and better places. The author emphasizes the importance of place by analyzing problems and possibilities of public life in a particular place— those northern states whose settlement marked the end of the old frontier. National efforts to “keep citizens apart” by encouraging them to develop open country and rely upon impersonal, procedural methods for public problems have bred stalemate, frustration, and alienation. As alternatives he suggests how western patterns of inhabitation might engender a more cooperative, face-to-face practice of public life. Community and the Politics of Place also examines our ambivalence about the relationship between cities and rural areas and about the role of corporations in public life. The book offers new insight into the relationship between politics and economics and addresses the question of whether the nation-state is an appropriate entity for the practice of either discipline. The author draws upon the growing literature of civic republicanism for both a language and a vantage point from which to address problems in American public life, but he criticizes that literature for its failure to consider place. Though its focus on a single region lends concreteness to its discussions, Community and the Politics of Place promotes a better understanding of the quality of public life today in all regions of the United States.

Navigating the Social World Mahzarin R. Banaji,Susan A. Gelman,2013-03-26 Navigating the social world requires sophisticated cognitive machinery that, although present quite early in crude forms, undergoes significant change across the lifespan. This book will be the first to report on evidence that has accumulated on an unprecedented scale, showing us what capacities for social cognition are present at birth and early in life, and how these capacities develop through learning in the first years of life. The volume will highlight what is known about the discoveries themselves but also what these discoveries imply about the nature of early social cognition and the methods that have allowed these discoveries -- what is known concerning the phylogeny and ontogeny of social cognition. To capture the full depth and breadth of the exciting work that is blossoming on this topic in a manner that is accessible and engaging, the editors invited 70 leading researchers to develop a short report of their work that would be written for a broad audience. The purpose of this format was for each piece to focus on a single core message: are babies aware of what is right and wrong, why do children have the same implicit intergroup preferences that adults do, what does language do to the building of category knowledge, and so on. The unique format and accessible writing style will be appealing to graduate students and researchers in cognitive psychology, developmental psychology, and social psychology.

Growing Up With Technology Lydia Plowman, Christine Stephen, Joanna McPake, 2010-04-05 Growing Up with Technology explores the role of technology in the everyday lives of three- and four-year-old children, presenting the implications for the children's continuing learning and development. Children are growing up in a world where the internet, mobile phones and other forms of digital interaction are features of daily life. The authors have carefully observed children's experiences at home and analysed the perspectives of parents, practitioners and the children themselves. This has enabled them to provide a nuanced account of the different ways in which technology can support or inhibit learning. Drawing on evidence from their research, the authors bring a fresh approach to these debates, based on establishing relationships with children, families and educators to get insights into practices, values and attitudes. A number of key questions are considered, including: Which technologies do young children encounter at home and preschool? What kind of learning takes place in these encounters? How can parents and practitioners support this learning? Are some children disadvantaged when it comes to learning with technology? Growing Up with Technology is strongly grounded in a series of research projects, providing new ways of thinking about how children's learning with technology can be supported. It will be of great interest to undergraduate and postgraduate students on a range of courses including childhood studies, and those with a particular interest in the use of technology in education. Parents, practitioners and researchers will also find this a fascinating and informative read.

The Potential of Community Sport for Social Inclusion Hebe Schaijée, Reinhard Haudenhuyse, Lieve Bradt, 2022-05-11 Social inclusion is a pressing issue confronting all levels of sport today, and community sport in particular. Sport is being promoted as an inclusive environment in which people of all backgrounds and abilities can participate and access a range of social and health benefits. Moreover, sport is often heralded as a vehicle for promoting social inclusion in other societal domains. Yet, the policy ideal of 'sport for all' is not always realised in practice, and community sport continues to be plagued by various forms of discrimination and social exclusion. This book brings together a team of scholars from across the globe whose research addresses the complex relationship between community sport and social inclusion. Their contributions critically examine the

dynamics of inclusion/exclusion in community sport, as well as the broader outcomes and impacts that sports programmes may have in promoting, or hindering, social inclusion in other areas of life, such as employment, education and migrant integration. This book will be of interest to academics, researchers, and advanced students of sport, sociology, politics, social work and public policy. The chapters in this book were originally published as a special issue of Sport in Society.

A Social Archaeology of Roman and Late Antique Egypt Ellen Swift, Jo Stoner, April Pudsey, 2022 Artefact evidence has the unique power to illuminate many aspects of life that are rarely explored in written sources, yet this potential has been underexploited in research on Roman and Late Antique Egypt. This book presents the first in-depth study that uses everyday artefacts as its principal source of evidence to transform our understanding of the society and culture of Egypt during these periods. It represents a fundamental reference work for scholars, with much new and essential information on a wide range of artefacts, many of which are found not only in Egypt but also in the wider Roman and late antique world. By taking a social archaeology approach, it sets out a new interpretation of daily life and aspects of social relations in Roman and Late Antique Egypt, contributing substantial insights into everyday practices and their social meanings in the past. Artefacts from University College London's Petrie Museum of Egyptian Archaeology are the principal source of evidence; most of these objects have not been the subject of any previous research. The book integrates the close study of artefact features with other sources of evidence, including papyri and visual material. Part one explores the social functions of dress objects, while part two explores the domestic realm and everyday experience. An important theme is the life course, and how both dress-related artefacts and ordinary functional objects construct age and gender-related status and facilitate appropriate social relations and activities. There is also a particular focus on wider social experience in the domestic context, as well as broader consideration of economic and social changes across the period.
