*Information Highlighting in Advanced Learner English* Marcus Callies, 2009-04-08 This book presents the first detailed and comprehensive study of information highlighting in advanced learner language, echoing the increasing interest in questions of near-native competence in SLA research and contributing to the description of advanced interlanguages. It examines the production and comprehension of specific means of information highlighting in English by native speakers and German learners of English as a foreign language, presenting triangulated experimental and learner corpus data as corroborating evidence. The study focuses on learners' use of discourse-pragmatically motivated variations of the basic word order such as inversion, preposing, and it- and wh-clefts, an underexplored field in SLA research to date. The book also provides a critical re-assessment of the study of pragmatics within SLA. It has largely been neglected to date that L2 pragmatic knowledge includes more than the sociopragmatic and pragmalinguistic abilities for understanding and performing speech acts. Thus, the book argues for an extension of the scope of inquiry in interlanguage pragmatics beyond the cross-cultural investigation of speech acts. It also discusses pedagogical implications for foreign language teaching and will be of interest to applied linguists and SLA researchers, language teachers and curriculum designers.

*Youth and Disability* Jenny Slater, 2016-02-11 In this ground-breaking book, Jenny Slater uses the lens of 'the reasonable' to explore how normative understandings of youth, dis/ability and the intersecting identities of gender and sexuality impact upon the lives of young dis/abled people. Although youth and disability have separately been thought within socio-cultural frameworks, rarely have sociological studies of 'youth' and 'disability' been brought together. By taking an interdisciplinary, critical disability studies approach to explore the socio-cultural concepts of 'youth' and 'disability' alongside one-another, Slater convincingly demonstrates that 'youth' and 'disability' have been conceptualised within medical/psychological frameworks for too long. With chapters focusing on access and youth culture, independence, autonomy and disabled people's movements, and the body, gender and sexuality, this volume's intersectional and transdisciplinary engagement with social theory offers a significant contribution to existing theoretical and empirical literature and knowledges around disability and youth. Indeed, through highlighting the ableism of adulthood and the falsity of conceptualising youth as a time of becoming-independent-adult, the need to shift approaches to research around dis/abled youth is one of the main themes of the book. This book therefore is a provocation to rethink what is implicit about 'youth' and 'disability'. Moreover, through such an endeavour, this book sits as a challenge to Mr Reasonable.

**Variation in Non-finite Constructions in English** Mark Kaunisto, Juhani Rudanko, 2019-05-29 This book sheds new light on the nature of gerunds in English, utilizing data from very large electronic corpora in order to compare pairs of patterns viewed as constructions. It serves as a contribution to the study of complementation, an under-researched area of investigation which bridges observations at the intersection of lexico-grammar, syntax and semantics. As a result, the reader develops their understanding of the meaning and use of each pattern within the system of English predicate complementation as it has evolved in recent times. This book will be of interest to students and scholars of English linguistics, especially English grammar.

**The Perfect Learners' Dictionary (?)** Thomas Herbst, Kerstin Popp, 2011-08-25 This volume undertakes a detailed analysis of the latest generation of learners' dictionaries of English. It assembles the papers delivered at the eponymous symposium held at the University of Erlangen-Nürnberg in April 1997. There are a number of reasons why these dictionaries are of special lexicographic interest: 1. the type of learners' dictionary associated notably with the name of Hornby can look back on a long tradition in British lexicography; 2. competition between various publishers since the late 70s has given crucial impetus to the development of these dictionaries; 3. these new dictionaries are decisively marked by the evaluation of large-scale computer corpora. Central to the volume is the in-depth comparison of four dictionaries published in 1995: OALD5, LDOCE3, COBUILD2, CIDE. The aim is to exemplify specific differences of approach in the four dictionaries from a wide range of viewpoints (definitions, information on valency and collocations, policy on usage examples, political correctness, etc.). A number of articles also enlarge on the history of learners' dictionaries of English, the significance of corpus linguistics for lexicography, and perspectives for the future, notably in connection with the electronic media.

**Risk Management in the Outdoors** Tracey J. Dickson, Tonia L. Gray, 2011-11-23 Risk Management in the Outdoors is essential reading for students and practitioners involved in outdoor education, sport, recreation and tourism. Written by an expert author team, it explores the value of the outdoors in a society that is increasingly risk-adverse, but at the same time pushes the commodification of high risk and extreme activities. Drawing upon the risk management process from the International Standard on Risk Management, ISO 31000, this text adopts a whole-of-organisation approach to risk management. It covers: • organisational sustainability • legal issues • program design • activities • severe weather scenarios • incident analysis . Risk Management in the Outdoors provides

direction on how best to manage the 'down-side' of risk taking while maximising the potential benefits. Each chapter contains focus questions, case studies, action points for practitioners, plus further questions and activities.

**Ethnocentrism and the English Dictionary** Phil Benson, 2002-01-08 This unique work challenges the assumption that dictionaries act as objective records of our language, and instead argues that the English dictionary is a fundamentally ethnocentric work. Using theoretical, historical and empirical analyses, Phil Benson shows how English dictionaries have filtered knowledge through predominantly Anglo-American perspectives. The book includes a major case study of the most recent edition of the Oxford English Dictionary and its treatment of China.

**Islam in Indonesia** Jajat Burhanudin, Kees van Dijk, 2013-01-31 While Muslims in Indonesia have begun to turn towards a strict adherence to Islam, the reality of the socio-religious environment is much more complicated than a simple shift towards fundamentalism. In this volume, contributors explore the multifaceted role of Islam in Indonesia from a variety of different perspectives, drawing on carefully compiled case studies. Topics covered include religious education, the increasing number of Muslim feminists in Indonesia, the role of Indonesia in the greater Muslim world, social activism and the middle class, and the interaction between Muslim radio and religious identity.

**The High-risk Surgical Patient** Paolo Aseni, Antonino Massimiliano Grande, Ari Leppäniemi, Osvaldo Chiara, 2023-03-07 It is well known that certain diseases and patient conditions are associated with increased perioperative risk. The aim of this book is to define and identify the clinical factors that warrant a broader and more detailed assessment of pre-operative surgical risk in difficult and unusual clinical settings. One of the sections is dedicated to the main pathway of peri- and post-surgical critical care based on the patient-specific deterioration risk and associated diseases; here, a panel of selected experts describes the correct patient-oriented pathways for complex or unscheduled surgical operations in order to reduce the operative risk. In addition, the book describes the latest trends in minimally invasive surgical techniques that are associated with peri- and post-operative risk reduction, and provides an overview of recent advances in surgical simulation, focusing on perspectives in surgical research to increase patient safety. Guidance is also provided on extracorporeal membrane oxygenation (ECMO), Left Ventricular Assist Devices (LVADs), and their management in patients requiring emergency surgery. The book will help surgical trainees recognize cases with the highest surgical risk and identify the most common complications at an early stage.
