Managing Work-Life Balance in Construction Helen

Lingard, Valerie Francis, 2009-04-09 Work in the construction industry is particularly tough. It demands excessively long hours and frequent weekend work. Other characteristics are particularly marked, such as re-location, job insecurity and distinctive behavioural patterns, which negatively affect employees' personal lives further. Work-life balance has emerged as one of the most pressing management issues in the 21st century. For construction managers dealing with traditional models of work and rigid work schedules, the issue may be especially difficult to manage, and yet the work-life balance is now recognised as an issue of strategic importance to the construction industry. It is critical to the construction industry's continued ability to attract and retain a talented workforce, and it is also inextricably linked to organizational effectiveness and employees' well-being. This book presents the argument for the management of work-life balance in the construction industry. It maps the changes to the workforce demographic profile and the changing expectations relating to work and personal life that occurred during the second half of the 20th century. Legal imperatives for managing work-life balance are set out. It also presents work-life balance theory and discusses the practical implications of research, along with extensive empirical data collected from the industry. Lastly, practical advice is provided about what construction organizations can and should do to manage work-life balance. This provides a unique guide to a key issue.

Motivational Interviewing in Schools Stephen Rollnick, Richard Rutschman, Sebastian G. Kaplan, 2016-09-20 The first teacher's guide to the proven counseling approach known as motivational interviewing (MI), this pragmatic book shows how to use everyday interactions with students as powerful opportunities for change. MI comprises skills and strategies that can make brief conversations about any kind of behavioral, academic, or peer-related challenge more effective. Extensive sample dialogues bring to life the dos and don'ts of talking to K-12 students (and their parents) in ways that promote self-directed problem solving and personal growth. The authors include the distinguished codeveloper of MI plus two former classroom teachers. User-friendly features include learning exercises and reflection questions; additional helpful resources are available at the companion website. Written for teachers, the book will be recommended and/or used in teacher workshops by school psychologists, counselors, and social workers. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.

Agricultural Markets in Benin and Malawi Marcel Fafchamps, 2016 Surveys of the operation of agricultural traders in two Sub-Saharan African countries suggest that their performance would benefit from policies aimed at increasing their asset base, reducing transaction risk, promoting more sophisticated business practices, and reducing physical marketing costs. Drawing on original surveys of agricultural traders, Fafchamps and Gabre-Madhin examine how traders operate in two Sub-Saharan African countries, Benin and Malawi. They find the following:- The largest transaction costs for traders are search and transport. Search methods rely principally on personal visits by the trader, which raises search costs. And since enterprises are very small, transport represents a large share of marketing costs.- Brand recognition, grading, and quality certification are nonexistent.- Brokers and agents are not organized in commodity exchanges.- Quantities are not pooled for transport and storage so as to achieve returns to scale.- Interseasonal and interregional arbitrage is not feasible for most traders, who prefer to operate day to day in a small territory. This information provides some important insights into how agricultural trade could be improved. It suggests possible policy interventions in four main areas: increasing traders' asset base, reducing transaction risk, promoting more sophisticated business practices, and reducing physical marketing costs. This paper - a product of Rural Development, Development Research Group - is part of a larger effort in the group to understand the operation of commodity markets in rural areas. The study was funded by

the Bank's Research Support Budget under the research project "Markets for Agricultural Inputs in Sub-Saharan Africa" (RPO 683-48). The authors may be contacted at marcel.fafchamps@economics.oxford.ac.uk or e.gabre-madhin@cgiar.org.

A Profile of the Electric Power Industry Charles E. Clark,2012-09-18 The electric power industry was

traditionally a utility to which people gave little thought. It has stable prices, low business risk, and predictable emerging issues. But great change has shaken the industry—mergers have resulted in large and powerful companies. Natural gas prices have plummeted and gas is replacing coal as the basis for both electricity production and new capacity. Environmental regulation is in flux. And new technologies are transforming all parts of the industry's value chain. The high cost and new skills demanded by these technologies give rise to unprecedented financial risk. Addressing these new challenges and changes is the perfect book—*A Profile of the Electric Power Industry: Facing the Challenges of the 21st Century*. This book describes how the industry is organized, how it functions, with several unique aspects addressed in depth. These aspects include electricity demand, production, capacity expansion, generating technologies, fuels, regulation of both prices and environmental impacts, and retail products. Global climate change, energy efficiency, and the Smart Grid also receive extended coverage to help you understand the industry's future.

A Profile of the Steel Industry Peter

Warrian, 2012-11-02 Steel companies were at the birth of the modern business corporation. The first billion dollar corporation ever formed was U.S. Steel in 1901. By the mid-twentieth century the steel mill and the automobile plant were the two pillars upon which the twentieth century industrial economy rested. Given the scale of capital and operations, vertical integration was seen to be pivotal, from the raw materials of iron ore and coal on one end of the supply chain to the myriad of finished products on the other. By the end of the twentieth century, however, things had dramatically changed. Take a look inside for a brilliant and concise history of the steel industry. The author has put together a true presentation of the economics of the industry, with an overview of how the industry operates and the environment in which it operates. This book includes a detailed discussion of the regulation of the industry; a documentation of the reasons why a rejuvenated steel industry will be critical to the economic health of the United States and Canada; and a rationale for the reemergence of the steel industry in particular, and manufacturing in general, as a vital force in the North American economy of the new millennium. It was widely perceived that the United States was moving from an industrial age into an information age, driven by high technology. That process is now being reversed. The steel industry has continuously

been forced to remake itself, and this book describes those developments and dynamics.
