The Principles of Philosophy Rene Descartes,2003-12-01

Philosophy of Mind Andrew Pessin,Recorded Books, LLC.,Playaway Digital Audio,Findaway World, LLC.,2010-09-28
The nature of the mind lies at the heart of the eternal human quest for understanding. What does it mean to think? What is the relation between mind and body, and where do we draw the line between physical and mental? With an enthusiastic and scholarly approach, Professor Andrew Pessin of Connecticut College addresses these and other questions, including a studied look at beliefs, consciousness, groundbreaking thought experiments, and whether or not computers can ever truly think.

Atlas Shrugged Ayn Rand,2007 Atlas Shrugged Is The Astounding Story Of A Man Who Said That He Would Stop The Motor Of The World--And Did. Tremendous In Scope, Breathtaking In Its Suspense, Atlas Shrugged Stretches The Boundaries Further Than Any Book You Have Ever Read. It Is A Mystery, Not About The Murder Of A Man'S Body, But About The Murder--And Rebirth--Of Man'S Spirit.

Confessions of Zeno Italo Svevo,1948

Philosophy as a Way of Life Pierre Hadot,1995-08-03 This book presents a history of spiritual exercises from Socrates to early Christianity, an account of their decline in modern philosophy, and a discussion of the different conceptions of philosophy that have accompanied the trajectory and fate of the theory and practice of spiritual exercises. Hadot's book demonstrates the extent to which philosophy has been, and still is, above all else a way of seeing and of being in the world.

How Rome Fell Adrian Goldsworthy,2009-05-12 The author discusses how the Roman Empire--an empire without a serious rival--rotted from within, its rulers and institutions putting short-term ambition and personal survival over the wider good of the state.

Explaining Social Behavior Jon Elster, 2015-07-28 In this new edition of his critically acclaimed book, Jon Elster examines the nature of social behavior, proposing choice as the central concept of the social sciences. Extensively revised throughout, the book offers an overview of key explanatory mechanisms, drawing on many case studies and experiments to explore the nature of explanation in the social sciences; an analysis of the mental states - beliefs, desires, and emotions - that are precursors to action; a systematic comparison of rational-choice models of behavior with alternative accounts, and a review of mechanisms of social interaction ranging from strategic behavior to collective decision making. A wholly new chapter includes an exploration of classical moralists and Proust in charting mental mechanisms operating 'behind the back' of the agent, and a new conclusion points to the pitfalls and fallacies in current ways of doing social science, proposing guidelines for more modest and more robust procedures.

Keith Joseph Andrew Denham, Mark Garnett, 2014-12-18 Hailed by Margaret Thatcher as the founder of modern conservatism, Keith Joseph is commonly ranked among the most influential politicians of the late-20th century. A complex and enigmatic figure Joseph was almost unique among Mrs Thatcher's senior ministers in refusing to write his own memoirs. Challenging both the mad monk view held by his critics and his status of mythical hero to his admirers, the authors present a picture of Joseph as a thinker and decision-maker. The authors tell of Joseph's formative years before he entered Parliament in 1956: the powerful Jewish dynasty into which Joseph was born; his time at Harrow; at Oxford; his war years in the Royal Artillery; and his Fellowship at All Souls. This volume charts the political career of Keith Joseph. The authors challenge Joseph's self-declared conversion to Conservatism in 1974 and the importance of his education of Margaret Thatcher. His own ambition, intellectual integrity and consistency are all examined and a different picture

emerges of his role as the intellectual driving force behind Conservative Government policy in the 1980s.

The Three Cultures Jerome Kagan, 2009-04-27 Jerome Kagan examines the basic goals, vocabulary, and assumptions of the natural sciences, social sciences, and humanities, summarizing their unique contributions to our understanding of human nature.

The Feminine Mystique Betty Friedan, 2001-09-17 Released for the first time in paperback, this landmark social and political volume on feminism is credited with being responsible for raising awareness, liberating both sexes, and triggering major advances in the feminist movement. Reprint.

On Revolution Hannah Arendt, 1963

The Fountainhead Ayn Rand, 2022-02-08 The Fountainhead, one of the most thought-provoking novels of the twentieth century, advocates individualism through the story of a gifted young architect who rejects the tyranny of conventional public opinion. Three personalities vividly depict the struggle for personal integrity in a world that prioritises conformity above creativity: Gail Wynand, the newspaper mogul and self-made millionaire whose power was bought by sacrificing his ideals to the lowest common denominator of public taste; and Dominique Francon, the devastating beauty whose desperate search for meaning has been twisted, through despair, into a quest to destroy the single object of her affection.

The Urantia Book, 1996

Faith, Freedom and the Spirit Paul D. Molnar, 2015-01-28 Distinguished scholar Paul Molnar adds to his previous work, *Divine Freedom and the Doctrine of the Immanent Trinity*, to help us think more accurately about the economic Trinity, about divine and human interaction in the sphere of faith and knowledge within history. Exploring why it is imperative to begin and end theology from within faith, Molnar relies on the thinking of Karl Barth and of Thomas F. Torrance in dialogue with other

contemporary theologians (Catholic and Protestant) about divine and human freedom. Powerfully argued and meticulously documented, Molnar's magisterial study begins with an extensive discussion of the role of faith in knowing God and in relating to God in and through his incarnate Word and thus through the Holy Spirit. From there he proceeds to consider the divine freedom once again as the basis for true human freedom, discussing how and why a properly functioning pneumatology will lead to an appropriately theological understanding of God's actions within the economy. He considers perils of embracing a historicized Christology, proposing an alternative way of understanding the connection between time and eternity that is christologically focused and pneumatologically informed. And finally, he discusses at length how the doctrine of justification by faith relates to living the Christian life in the power of the Holy Spirit and the economy of grace.

Faith Is Not Blind Bruce C. Hafen, Marie K.

Hafen, 2018-11-26

History of Economic Thought E. K. Hunt, Mark

Lautzenheiser, 2015-01-28 The new edition of this classroom classic retains the organizing theme of the original text, presenting the development of thought within the context of economic history. Economic ideas are framed in terms of the spheres of production and circulation, with a critical analysis of how past theorists presented their ideas.

The Courage of Truth Michel Foucault, 2012-05-08 The Courage of the Truth is the last course that Michel Foucault delivered in a series of lectures from 1970 to 1984 at the Collège de France. Here, Foucault continues the theme of the previous year's lectures in exploring the notion of truth-telling in politics to establish a number of ethically irreducible conditions based on courage and conviction. His death, on June 25th, 1984, tempts us to detect the philosophical testament in these lectures, especially in view of the prominence they give to the themes of life and

death.

The Arcades Project Walter Benjamin, 1999 Focusing on the arcades of 19th-century Paris--glass-roofed rows of shops that were early centers of consumerism--Benjamin presents a montage of quotations from, and reflections on, hundreds of published sources. 46 illustrations.

What is Ancient Philosophy? Pierre Hadot, 2002 Hadot shows how the schools, trends, and ideas of ancient Greek and Roman philosophy strove to transform the individual's mode of perceiving and being in the world. For the ancients, philosophical theory and the philosophical way of life were inseparably linked. Hadot asks us to consider whether and how this connection might be reestablished today.
