

P47 Thunderbolt In 3d

Howard Staunton

P-47 Thunderbolt with the USAAF Tomasz Szlagor, 2013-03-19 A visual history of the P-47 Thunderbolt. Contains more than 120 black and white photographs - all accompanied by informative captions, 12 color photos, 8 pages of color profiles. Also includes bonus decals representing the unique markings of featured aircraft in 1/72, 1/48 and 1/32 scale.

P-47 Thunderbolt vs Bf 109G/K Martin Bowman, 2008-08-19 The P-47 climbed like a homesick angel and dived for the deck like a rock. This was due to the mighty power of its air-cooled, turbo-supercharged Double Wasp engine, combined with a brutish barrel-shaped airframe. The deadly firepower was totally destructive. The world's largest single-engined fighter when the USA entered the war, the P-47's 18 cylinders vibrated the whole aircraft like it was going to destroy itself. More Thunderbolts were built than any other American fighter in history. In December 1942, the P-47 was the only readily available American-produced high performance fighter. At altitudes up to 15,000 ft, its rival, the Bf 109G, had all-round better performance than the P-47C, most notably in rate of climb. The Thunderbolt's performance progressively improved above 15,000 ft, and between 25,000 to 30,000 ft it surpassed those of the enemy fighters, except for rate of climb and acceleration - the P-47 was double the weight of a Bf 109. Although the latter could initially accelerate well in a dive, the P-47C soon overhauled it and easily out-dived the Messerschmitt from high altitudes. P-47 pilots were advised to avoid combats at low altitudes and slow speeds. Thunderbolt pilots were synonymous with the might of the Eighth Air Force's fighter strength from the summer of 1943 until the end of the conflict, during which time the P-47 was operated in the escort, ground strafing and dive-bombing roles. The P-47 was flown exclusively by Gabby Gabreski and Robert Johnson, the top two scoring American fighter aces in the ETO/MTO. All told, the Thunderbolt was flown by 18 of the top 30 American aces in Europe during the war, while the Bf 109G was the staple Defense of the Reich fighter from 1943 to war's end. The numerous aspects of the pilots' training, the tactics they used once in combat and the leading edge technology employed by these second generation World War 2 fighters is covered in detail, as is the continual development of both fighter types. Finally, the key elements of both fighters - the airframe, engine, armament and flying characteristics - are also explored through first hand accounts from the aces that went head-to-head in the war-torn skies of Europe.

General Laws of the State of Idaho Idaho, Henry Z. Johnson, Charles S. Kingsley, 1899

Allied Jet Killers of World War 2 Stephen Chapis, Andrew Thomas, 2017-12-28 Allied fighter pilots began encountering German jets – principally the outstanding Me 262 fighter – from the autumn of 1944. Stunned by the aircraft's speed and rate of climb, it took USAAF and RAF units time to work out how to combat this deadly threat as the Luftwaffe targeted the medium and heavy bombers attacking targets across the Reich. A number of high-scoring aces from the Eighth Air Force (Drew, Glover, Meyer, Norley and Yeager, to name but a few) succeeded in claiming Me 262s, Me 163 and Ar 234s during the final months of the campaign, as did RAF aces like Tony Gaze and

'Foob' Fairbanks. The exploits of both famous and little-known pilots will be chronicled in this volume, detailing how they pushed their P-47s, P-51s, Spitfires and Tempests to the limits of their performance in order to down the Luftwaffe's 'wonder weapons'.
