PATRICK VOLLMAR

☐ **TREHERNE'S TITLE 1 PARENT ADVISORY COUNCIL**- Two Cents Production,2012-10 Proud of his roots in Brooklyn and New York City Oreste Renato Rondinella was Professor of Educational Studies (presently Professor Emeritus) at Seton Hall University, South Orange, NJ. He decided to utilize his knowledge and passion in teaching to satisfy a long time desire to disprove the axiom "those who can't do, teach!" He wanted to make a statement that this wasn't true for those dedicated to the teaching profession. In 1983 Oreste returned to school for a post-doctoral degree in Marriage and Family Therapy. Subsequently, he directed two Marriage and Family Centers, Allegra Counseling Centers that were successful. He continued to teach for about ten years during this time. However, Oreste began to experience a great hunger and desire to write and retired as a professor- psychotherapist to write full time. He has completed three books: Sin Is Necessary, Illusion vs. Reality---Sounds Within and Without, and is completing Intrigue in Rome. Dr. Rondinella has traveled extensively in the last twenty-five years and conducted research and interviews that contributed to his books. As of October 1, 2003, Dr. Rondinella has resumed his independent practice of marriage and family therapy including individual psychotherapy.

☐ **THE V-CHIP DEBATE** Monroe E. Price,2013-11-26 The V-chip is a highly significant part of the discussion about whether television (or broadcasting in general) deserves some special attention in terms of its accessibility to children, its particular power to affect conduct, and its invasiveness. But as this notion of filtering and labeling has caught the imagination of the regulator, the legislator, and all those who wish to consider new ways to alter bargaining over imagery in society, the very idea of the V-chip or its equivalent is moving across other technologies, including the Internet. The V-chip issue has also fueled the ongoing debate about violence and sexual practices in society, and how representations on television relate to those practices. Although the initial concept of the V-chip is simple, its flow into the public realm raises so many extraordinary questions that the introduction and production of the chip virtually serves as a case study in problems of law and public policy. The very conceptualization of speech in society is being affected by this issue. Accordingly, the place of the V-chip in this debate is increasingly important; indeed, it may be argued that the V-chip's contribution to legal argumentation may be greater than its ultimate contribution to the relationship between children and imagery. Among the questions the contributors address are: \*What research basis is necessary to require a framework for labeling and rating? \*What relationship between government and the image-producing industries can be characterized--for constitutional and other reasons--as voluntary as opposed to coercive? \*Who should evaluate these images? \*To what extent should the evaluation process be centralized and/or distributed? \*What assessment is appropriate to evaluate whether the experiment is successful? In addition to the V-chip's origin's in Canada and its further evolution in the United States, this book discusses the development of the V-chip and television rating systems in Europe, Australia, and throughout the world. It also includes essays which contrast the very different approaches in Canada and the United States in terms of the role of regulatory agency, industry, and government.
