Opening Combination Padlocks Carl Black,2002-11-01 It is incredibly easy to forget the combination to padlocks on your own tool shed, gym locker or anyplace else these common locks are found. This handy guide teaches one thing: how to open a padlock whose combination is lost. Dissatisfied with books that showed methods that didn't allow entry into all locks or made it difficult to always accurately find the first or third number, usually the main basis for their technique, author Carl Black devised a foolproof system that allows quick entry into all combination padlocks in minutes without any guesswork or tools. He explains how it works with clear instructions and illustrations and gives problem-solving tips for difficult locks. For information purposes only.

The Padlock Open'd Padlock-Keeper Of Drury Lane Mungo,2018-04-17 The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. This collection reveals the history of English common law and Empire law in a vastly changing world of British expansion. Dominating the legal field is the Commentaries of the Law of England by Sir William Blackstone, which first appeared in 1765. You Can't Padlock an Idea Stephen A. Schneider,2014-10-03 You Can't Padlock an Idea examines the educational programs undertaken at the Highlander Folk School in Tennessee and looks specifically at how these programs functioned rhetorically to promote democratic social change. Founded in 1932 by educator Myles Horton, the Highlander Folk School sought to address the economic and political problems facing communities in Appalachian Tennessee and other southern states. To this end Horton and the school's staff involved themselves in the labor and civil rights disputes that emerged across the south over the next three decades. Drawing on the Highlander archives housed at the

Wisconsin Historical Society, the Avery Research Center in South Carolina, and the Highlander Research and Education Center in Tennessee, Stephen A. Schneider reconstructs the pedagogical theories and rhetorical practices developed and employed at Highlander. He shows how the school focused on developing forms of collective rhetorical action, helped students frame social problems as spurs to direct action, and situated education as an agency for organizing and mobilizing communities. Schneider studies how Highlander's educational programs contributed to this broader goal of encouraging social action. Specifically he focuses on four of the school's more established programs: labor drama, labor journalism, citizenship education, and music. These programs not only taught social movement participants how to create plays, newspapers, citizenship schools, and songs, they also helped the participants frame the problems they faced as having solutions based in collective democratic action. Highlander's programs thereby functioned rhetorically, insofar as they provided students with the means to define and transform oppressive social and economic conditions. By providing students with the means to comprehend social problems and with the cultural agencies (theater, journalism, literacy, and music) to address these problems directly, Highlander provided an important model for understanding the relationships connecting education, rhetoric, and social change.

Under Padlock and Seal (Masterpiece Collection) Harold Avery, 2013-12 Who on earth should want to be grinding anything at that time of night? The Pines was a rambling old house; the girls always slept with their window open; and just below was an outbuilding, part of which was used as a tool-house, in which stood the grindstone; and thus the sound had reached Elsie at a moment when perhaps her slumber was not as deep

as usual. The noise continued, with pauses at regular intervals, when whatever was being sharpened was removed from the stone. Taking care not to disturb her elder sister, Ida, whose heavy breathing showed that she was sound asleep, the little girl slipped out of bed, and crept softly over to the window. By straining her neck, and pressing her cheek close against the pane, she could just get a glimpse of the tool-house window, which she noticed was faintly illuminated, as it might have been by the feeble rays of a night-light. A sudden thought occurred to Elsie that it must be her cousin, Brian Seaton, who lived at the Pines, and went to school with her brother Guy. Brian was always boat-building; sometimes he sat up later than he ought to have done, and continued to work long after every one else was in bed. No doubt the rascal was doing so now, and had stolen down to put a fresh edge on his chisel. Elsie was a spirited young monkey, and she and Brian were great chums. I'll just creep down and show him I've found him out, she said to herself. What fun to take him by surprise! To put on dressing-gown and slippers was but the work of a few moments. Softly opening the bedroom door, she passed out on to the landing, and groping in the darkness until she found the rail of the banisters, she proceeded down the stairs. How still and quiet the house seemed! Nothing broke the silence but the solemn tick-tack of the big clock in the hall, which had been ticking in the same sedate manner since the days when Elsie's grandmother had been a little girl. Feeling her way down the length of the hall, not without an occasional bump against chairs and other such obstacles, Elsie came to a little lobby or cloak-room, having at the farther end a half-glass door, which opened on the yard, and from which the tool-house was distant not more than a dozen paces. She quite expected to find this door open, and was surprised to discover that it was

not only shut, but locked on the inside. What a beggar Brian is! thought the girl. He must have climbed out of his window, and come down the water-pipe, as he did one day last summer.

The Padlock Isaac Bickerstaff, 1806

Under Padlock and Seal Harold Harold Avery, 2013-10 Elsie pushed away the bed-clothes which were covering her ear, and listened; then she sat up in bed, and listened again. There was no doubt that it was an actual sound, and not mere imagination. How long it had been going on, or when it first began to mingle in a confused manner with her dreams, she could not say; but now she heard it plainly enough, and recognized what it was-the peculiar, grating hiss of a grindstone, punctuated every now and then with a subdued little squeak made by the treadle.
