Lipad! Mga Kwento Ng Pag-Asa Mula Sa Pilipinas Minnie Agdeppa, Violence, suffering, hunger, death, grief, and despair would be the regular content of social and mainstream media. The negatives are often highlighted. Rarely does one find something soothing and inspiring for the soul to read and celebrate with. The world needs to hear and read a lot of Good News more than ever. *Lipad! Mga Kwento Ng Pag-asa Mula Sa Pilipinas* (Fly! Stories Of Hope From The Philippines) aims to bring to the fore 13 stories of hope from my experiences and those of my friends' to a world that needs to know of it so direly. It also aims to inspire readers to positively respond to those suffering from mental afflictions out of a true desire to understand their predicament and be a support towards their healing. After all, the illness of one affects the entirety of society. The healing of one, then, leads to the healing of all.

Evaluation of the project "Integrating Agriculture into National Adaptation Plans (NAP-Ag)" Food and Agriculture Organization of the United Nations, 2021-06-22 The Integrating Agriculture into National Adaptation Plans (NAP-Ag) programme, jointly coordinated by UNDP and FAO, worked with eleven countries to identify and integrate climate adaptation measures into national planning and budgeting processes, in support of achieving the Sustainable Development Goals (in particular SDG 2 - Zero Hunger; and SDG 13 - Climate Action) and the Paris Agreement. The evaluation assessed programme relevance and the achievement and sustainability of programme results among other dimensions. The evaluation found that NAP-Ag's country-driven, multi-sector and multi-level approach allowed for ample engagement of stakeholders, contributed to establish coordination mechanisms and promoted ownership of results. The programme supported the development of institutional capacities; directly influenced the integration of agriculture adaptation options into countries' plans, practices and policies, and supported countries in accessing climate finance. NAP-Ag also contributed to global climate change adaptation efforts by supporting countries to accomplish the work outlined by UNFCCC. NAP-Ag also influenced the inclusion of gender aspects adaptation options in many countries. FAO should continue promoting the adoption of programme outcomes in countries' systems and further support countries to mobilize financial support to scale up lessons learned from NAP-Ag. Private sector involvement should be increased to guarantee the implementation of certain climate adaptation options. Strategic stakeholders should be engaged to support gender mainstreaming efforts in agriculture climate adaptation options.

Mobile Childhoods in Filipino Transnational Families Itaru Nagasaka, Asuncion Fresnoza-Flot, 2015-08-24 *Mobile Childhoods in Filipino Transnational Families* focuses on the lived experiences of '1.5-generation' migrants with similar 'roots' (the Philippines), traversing different 'routes' (receiving countries). By shedding light on the diversified paths of their migratory lives, it revisits the relationships between mobility, sociality and identity.

Disasters in the Philippines Glenda Bonifacio, Roxanna Balbido Epe, 2023-04-28 Bringing together the voices of local scholars in the Philippines, this book offers critical insights into one of the world's most disaster-prone regions. The Asia-Pacific region is one of the most vulnerable regions in the world, with the effects of climate change contributing to rising sea levels and increasingly frequent typhoons and floods. Case studies in this book examine such disasters, including the aftermath of 2013 super typhoon Haiyan. Discussions are centered around four themes: women and empowerment, economics and recovery, community and resilience, and religion and spirituality. Through its analysis, the book demonstrates the scopes, inequities, and inefficiencies of policies and responses, as well as forms of empowerment and resilience, in meeting challenges in disaster-afflicted communities in the Philippines. Its conclusions provide a more nuanced and grounded perspective of policies, practices, and approaches in the sociology of disasters today.

Developing Countries and Technology Inclusion in the 21st Century Information Society Etim, Alice S., 2020-11-27 In recent years, many developing regions across the globe have made rigorous efforts to become integrated into the global information society. The development and implementation of information communication technology (ICT) devices and policies within various fields of service have significantly aided in the infrastructural progression of these countries. Despite these considerable advancements, there remains a lack of research and awareness on this imperative subject. *Developing Countries and Technology Inclusion in the 21st Century Information Society* is an essential reference source that discusses the adoption and impact of ICT tools in developing areas of the world as well as specific challenges and sustainable uses within various professional fields. Featuring research on topics such as policy development, gender differences, and international business, this book is ideally designed for educators, policymakers, researchers, librarians, practitioners, scientists, government officials, and students seeking coverage on modern applications of ICT services in developing countries.

Report of the National Workshop on Micro-Enterprise Development in Coastal Communities in the Philippines Food and Agriculture Organization of the United Nations, 2007 The goals of the National Workshop on Micro-enterprise Development in Coastal Communities in the Philippines were to exchange experiences and good practices and to identify financial and institutional support services and facilities to sustain livelihoods and micro-enterprise development in coastal areas. The workshop was attended by 45 participants from people's organizations, fisherfolk cooperatives, non-governmental organizations, national government agencies and financing institutions. The discussions at the workshop showed that livelihood diversification and the improvement of income and employment opportunities in coastal fishing communities are crucial for their participation in the conservation and management of aquatic resources. Key elements of sustainable micro-enterprise development as identified by the workshop include capability building of fisherfolk organizations such as cooperatives and associations to implement livelihood projects, the preparation of feasibility studies and business plans, technical skills development, sound financial management practices, development of innovative and high quality products, access to new markets including urban and regional markets and the full participation of fisherfolk in the identification of livelihood activities and micro-enterprises. The Pilot Project in Support of the Development of Micro-enterprises in Banate Bay, Iloilo and Southern Iloilo was implemented by the University of the Philippines in the Visayas in cooperation with the Banate Bay Resource Management Council Inc. and the Southern Iloilo Coastal Resource Management Council with support from FAO. A number of microenterprises were introduced and supported in the municipalities of Banate Bay and Southern Iloilo including fish ball production, shrimp paste production, oyster and mussel culture, salt production and iodization, fish marketing and fish sauce production. Training programmes were conducted for fisherfolk on product development and marketing of their products. Good coordination with local government units, active participation of all stakeholders and conduct of appropriate training programmes are considered essential for the sustainability of the micro-enterprises. The involvement of fisherfolk in

livelihood activities and micro-enterprises is strengthening their participation in the fisheries and aquatic resources management councils of Banate Bay and Southern Iloilo. The experiences of the pilot project also suggest that in order to make various income generating livelihood initiatives sustainable and stand on their own feet, many of these need to develop further into full-fledged micro-enterprises. Considerable scope lies in farming of aquatic organisms such as seaweed, shellfish and various fish species as well as in fisheries related value adding activities such as fish processing and marketing. As far as the relationship between the conservation of aquatic resources and the generation of income is concerned, the quality of the aquatic environment and the economic success of mariculture micro-enterprises and activities are directly related. This should create a strong motivation for fisherfolk entrepreneurs involved in such type of enterprises to be strong advocates and stewards of a healthy coastal ecology. In the long term, fisherfolk will benefit from the development of various micro-enterprise initiatives. It is clearly in their interest.

The South China Sea Bill Hayton, 2014-10-28 China's rise has upset the global balance of power, and the first place to feel the strain is Beijing's back yard: the South China Sea. For decades tensions have smoldered in the region, but today the threat of a direct confrontation among superpowers grows ever more likely. This important book is the first to make clear sense of the South Sea disputes. Bill Hayton, a journalist with extensive experience in the region, examines the high stakes involved for rival nations that include Vietnam, India, Taiwan, the Philippines, and China, as well as the United States, Russia, and others. Hayton also lays out the daunting obstacles that stand in the way of peaceful resolution. Through lively stories of individuals who have shaped current conflicts—businessmen, scientists, shippers, archaeologists, soldiers, diplomats, and more—Hayton makes understandable the complex history and contemporary reality of the South China Sea. He underscores its crucial importance as the passageway for half the world's merchant shipping and one-third of its oil and gas. Whoever controls these waters controls the access between Europe, the Middle East, South Asia, and the Pacific. The author critiques various claims and positions (that China has historic claim to the Sea, for example), overturns conventional wisdoms (such as America's overblown fears of China's nationalism and military resurgence), and outlines what the future may hold for this clamorous region of international rivalry.

Education for Sustainable Development and Disaster Risk Reduction Rajib Shaw, Yukihiko Oikawa, 2014-08-06 Education for Sustainable Development (ESD) and Disaster Risk Reduction Education (DRRE) have overlapping areas of concern focusing on strengthening the link to local communities. In reality, there is significant synergy in ESD and disaster risk reduction (DRR). Both concepts urge looking at the communities, both focus on behavior changes and both call for linking knowledge to action. The Decade of Education for Sustainable Development (DESD) ends in 2014 and the Hyogo Framework for Action (HFA) ends in 2015. Therefore, at this junction, it is important to review the progress made over the past 10 years and to suggest future synergy options. This book is the first attempt to review these two emerging fields and to provide input to the future direction of education. The book has 11 chapters, drawing lessons mainly from Japan and discussing their implications for the world. The first four chapters provide an overview of the ESD-DRR linkage, ESD and its evolution, DRRE and Climate Change Education. These are followed by case studies from ESD practices in Japan, in schools, universities and communities. The primary target groups for this book are students and researchers in the fields of environment, disaster risk reduction and climate change studies. The book provides them with a good idea of the current research trends in the field and furnishes basic knowledge about these vital topics. Another target group comprises practitioners and policy makers, who will be able to apply the knowledge collected here to establishing policy and making decisions.

OECD Food and Agricultural Reviews Agricultural Policies in the Philippines OECD, 2017-04-07 This report analyses Philippine agricultural policy. Agriculture provides 30% of total employment in the Philippines and represents 11% of its Gross Domestic Product. The Philippines has had notable recent overall economic success, yet improving agricultural performance remains challenging.

Emerging Perspectives on the Mobile Content Evolution Aguado, Juan Miguel, 2015-09-21 In less than a decade, mobile technology has revolutionized our cultures, societies, and economies by impacting both personal and professional aspects of human life. Mobile technology has therefore become the fastest diffusing technology in history, expanding and transforming existent possibilities by making technology accessible and ubiquitous. *Emerging Perspectives on the Mobile Content Evolution* seeks a better understanding of the centrality of mobile content in the recent and coming evolution of both the ICT ecosystem and the media industry. This publication appeals to a broad audience within the interdisciplinary field of media studies, covering topic areas such as

journalism, marketing and advertising, broadcasting, information management, media management, media economics, media- and technology-related public policies, media sociology, audience/consumption studies, and arts. This publication presents a multi-disciplinary discussion through a collection of academic chapters covering topics such as mobile communications and entrepreneurship, reflection on wearables and innovation, personal and mobile healthcare, mobile journalism and innovation, and behavioral targeting in the mobile ecosystem.

Flash Floods Kevin Sene,2012-12-14 Flash floods typically develop in a period a few hours or less and can arise from heavy rainfall and other causes, such as dam or flood defence breaches, and ice jam breaks. The rapid development, often associated with a high debris content, can present a considerable risk to people and property. This book describes recent developments in techniques for monitoring and forecasting the development of flash floods, and providing flood warnings. Topics which are discussed include rainfall and river monitoring, nowcasting, Numerical Weather Prediction, rainfall-runoff modelling, and approaches to the dissemination of flood warnings and provision of an emergency response. The book is potentially useful on civil engineering, water resources, meteorology and hydrology courses (and for post graduate studies) but is primarily intended as a review of the topic for a wider audience.

Media and Disaster Risk Reduction Rajib Shaw,Suvendrini Kakuchi,Miki Yamaji,2021-03-16 This book analyzes recent advances, trends, challenges and potentials of the role of media in disaster risk reduction. Collaboration, co-design and co-delivery with other stakeholders in science technology, private sectors, and civil society are found to be effective in reaching people and communities. The media is considered to be of utmost importance in all phases of disasters, before, during and after, with different types of media having different proactive roles to play in disaster risk reduction. Before disasters, they play essential roles not only in bringing early warning to people but also in enhancing their perception of the need to take action. At during- and post-disaster response recovery phases, community radio and social media are the key. These necessitate a resilient media infrastructure as the core of uninterrupted coverage. Media literacy has become an important issue for several stakeholders, including governments. In addition, more focus is placed on media governance to look at the priorities of disaster risk reduction initiatives within the media. All of these are considered to lead to trust in the media, which further improves people’s disaster response actions based on information from the media, before and during disasters. Covering different aspects of media, this book is a valuable source for students, researchers, academics, policy-makers and development practitioners.
