**The Employment Impact of Innovation** Mario Pianta, Marco Vivarelli, 2003-09-01 The diffusion of information and communication technologies is rapidly changing the structure of advanced economies, raising new problems of technological unemployment. The view that market forces can easily counterbalance the labour-saving impact of innovation is contrasted in this book with empirical findings on aggregate compensation effects and on the consequences of product, process and organizational innovation in industries and services. After examining several policy aspects, new employment-friendly economic and innovation policies are proposed.

*Ritual and Music of North China* Stephen Jones, 2016-12-05 The rich local traditions of musical life in rural China are still little known. Music-making in village society is largely ceremonial, and shawm bands account for a significant part of such music. This is the first major ethnographic study of Chinese shawm bands in their ceremonial and social context. Based in a poor county in Shanxi province in northwestern China, Stephen Jones describes the painful maintenance of ceremonial and its music there under Maoism, its revival with the market reforms of the 1980s and its modification under the assault of pop music since the 1990s. Part One of the text explains the social and historical background by outlining the lives of shawm band musicians in modern times. Part Two looks at the main performing contexts of funerals and temple fairs, whilst Part Three discusses musical features such as instruments, scales, and repertoires. The downloadable resources consist of a 47-minute film in two parts, showing excerpts from funerals and temple fairs (complementing Part Two of the text), while a separate section contains a magnificent 1992 funerary performance of a complete shawm-band suite. As a package, the book and downloadable resources illuminate the whole ceremonial context of music-making in rural China, illustrating the ritual-music experience of villagers, with lay Daoist priests, opera troupes, and beggars also making cameo appearances. While the modern stage repertoires of urban professionals remain our main exposure to Chinese music, this publication is all the more valuable in showing the daily musical experiences of the majority of people in China. It will appeal to ethnomusicologists, anthropologists and all those interested in modern Chinese history and society.

Indigenous Language Media, Language Politics and Democracy in Africa Abiodun Salawu, Monica Chibita, Sarantakos, 2015-10-26 This book deals with the often-neglected link between indigenous languages, media and democracy in Africa. It recognizes that the media plays an amplifying role that is vital to modern-day expression, public participation and democracy but that without the agency to harness media potential, many Africans will be excluded from public discourse.
