The Weather Maïke Biederstadt,2021-09-07 From raucous stormy seas to a welcomingly vivid rainbow, weather's most exciting moments come to brilliant life in this fantastic new pop-up book. In her hugely successful books *Creatures of the Deep* and *What's in the Egg*, as well as her enormously popular series of greeting cards for the Museum of Modern Art, Maïke Biederstaedt has established herself as one of the preeminent paper artists working today. Now Biederstaedt takes book engineering to new heights as she immerses readers in five electrifying weather scenarios. As each spread unfolds, a meticulously designed landscape emerges--a freighter balances like a nutshell between high waves in the sea; a tornado takes terrifying aim at a truck trying to outrun it; a rain-spewing storm cloud towers like a skyscraper over a farm house. Nature's delicate beauty emerges in the intricate shapes of a snowflake and in the luminous arc of a rainbow. Each page features an informative description of its weather event and the book closes with sobering commentary on the effects of climate change. A wondrous introduction to weather for budding climatologists, this is also an artistic tour de force that collectors will treasure.

Weather Operations in the Transformation Era Colonel Usaf John M Lanicci,USAF, John M., John Lanicci, , USAF,2012-09-25 In *Weather Operations in the Transformation Era*, Col. John M. Lanicci USAF, takes a compelling look at future weather operations. His hypothesis is that a consolidated battlespace picture integrates both natural and man-made elements, which is totally consistent with USAF transformation efforts. He points out that the way ahead is easier said than done and offers several cogent reasons why the weather operations portion of information-in-warfare has not caught up with current USAF doctrine. One such example is our historical tendency to look at weather as a somewhat isolated, tactical problem. Significant advances in information technology and advent of effects-based operations are propelling the USAF weather community away from traditional, single-inject stand-up briefings towards continuously updated advice to war fighters at every step of campaign/mission planning and execution. This technological momentum will make it necessary to fundamentally change data collection, analysis, prediction, and product tailoring. The author outlines these changes in a concept called weather, intelligence, surveillance, and reconnaissance (WISR), a term first used by the Air Staff to describe the

total integration of natural and man-made environments for predictive battlespace awareness (PBA). The WISR concept is based on substantially increasing the volume of weather data collected in theater by using the same airborne assets being proposed for PBA, persistent ISR, and time-critical targeting. It proposes the creation of a four-dimensional database that can be used to integrate the natural environment into the common operating picture. The WISR concept also advocates transmitting real-time weather information to the cockpit as a means to optimize the kill chain by allowing rapid redirecting of sorties based on continuously updated weather information.

Paper Or Plastic Werner Trieschmann, 2016 The last time we saw Sarah, she was the young hero of Paper or Plastic?. There, Sarah was trying her best as a new employee at Puritan Foods, a grocery store with more than a cart full of crazy customers and fellow employees. In Paper or Plastic: The Ice Storm, Sarah is back, but this time she is hastily given—maybe tricked into?—the job of assistant manager. Sarah is happy about the new promotion until she realizes that with great power comes even more grocery store insanity. Did we mention there's an ice storm coming?! When the assistant manager suddenly leaves ahead of the bad weather, Sarah is left to deal with stubborn customers who just want to stand at a register and read a magazine. Then there are unruly kids running around the store throwing cereal and climbing on top of shelves. That's nothing compared to the strike organized by the baggers and a mysterious figure known as El Diablo. Sarah tries to stay awake throughout the ordeal—Puritan Foods is open 24/7 of course—while also trying to smooth over the toughest obstacle of all, the cane-wielding head of Skybell Ice Cream. Will the striking baggers get a raise or just a bunch of bananas? Will there be anything left on the shelves? Will Sarah survive? The answers and laughs are in the forecast of Paper or Plastic: The Ice Storm.--
