*Machine Learning and Knowledge Discovery in Databases* Dimitrios Gunopulos,Thomas Hofmann,Donato Malerba,Michalis Vazirgiannis,2011-09-06

This three-volume set LNAI 6911, LNAI 6912, and LNAI 6913 constitutes the refereed proceedings of the European conference on Machine Learning and Knowledge Discovery in Databases: ECML PKDD 2011, held in Athens, Greece, in September 2011. The 121 revised full papers presented together with 10 invited talks and 11 demos in the three volumes, were carefully reviewed and selected from about 600 paper submissions. The papers address all areas related to machine learning and knowledge discovery in databases as well as other innovative application domains such as supervised and unsupervised learning with some innovative contributions in fundamental issues; dimensionality reduction, distance and similarity learning, model learning and matrix/tensor analysis; graph mining, graphical models, hidden markov models, kernel methods, active and ensemble learning, semi-supervised and transductive learning, mining sparse representations, model learning, inductive logic programming, and statistical learning. a significant part of the papers covers novel and timely applications of data mining and machine learning in industrial domains.

**Baboquivari Mountain Plants** Daniel F. Austin,2022-05-03 The Baboquivari Mountains, long considered to be a sacred space by the Tohono O'odham people who are native to the area, are the westernmost of the so-called Sky Islands. The mountains form the border between the floristic regions of Chihuahua and Sonora. This encyclopedic work describes the flora of this unique area in detail. It includes descriptions, identifications, ecology, and extensive etymologies of plant names in European and indigenous languages. Daniel Austin also describes pollination biology and seed dispersal and explains how plants in the area have been used by humans, beginning with Native Americans. The term "sky island" was first used by Weldon Heald in 1967 to describe mountain ranges that are separated from each other by valleys of grassland or desert. The valleys create barriers to the spread of plant species in a way that is similar to the separation of islands in an ocean. The 70,000-square-mile Sky Islands region of southeastern Arizona, southwestern New Mexico, and northwestern Mexico is of particular interest to botanists because of its striking diversity of plant species and habitats. With more than 3,000 species of plants, the region offers a surprising range of tropical and temperate zones. Although others have written about the region, this is the first book to focus exclusively on the plant life of the Baboquivari Mountains. The book offers an introduction to the history of the region, along with a discussion of human influences, and includes a useful appendix that lists all of the plants known to be growing in the Baboquivari Mountain chain.

*Maryland* Comte De Paris,2009-02 Jealousy and infighting, along with continued interference from Washington left the Union high command completely without purpose. Troops sat idle, or marched to strategically ineffective locations. The Battle of Cedar Mountain would be claimed as a victory by both sides. The Union Army under Pope was nearly destroyed in the second Battle at Manassas Junction. The inability of the federal army leaders to work together, in direct contrast to the Confederate leaders under Lee, puts Washington in danger once again. Pope is relieved and McClellan once again assumes command of Union forces. Lee would move away from the encamped federal troops near Washington and head for the rich resources of Pennsylvania and the Shenandoah Valley. McClellan was ordered keep watch on Washington and it looked as if the South would have the freedom to move through Maryland unchecked....until Harper's Ferry and Antietam.

*Murder at the Yeshiva* Stewart Bird,2015-06-19 Mo Shuman, a homicide detective who is about to retire at the Twelfth Precinct on the Lower East Side, catches the murder of Aaron Cohen, a yeshiva student whose body is found beneath the Williamsburg Bridge. In solving the murder with his homicide squad, Shuman must come to grips with his own demons. Murder at the Yeshiva is a suspenseful story of greed, sexual abuse and murder against the backdrop of a cloistered religious community. Detective Shuman finds himself at the center of a political struggle as he hunts down the murderer with grim determination at the same time he is being hunted down himself. Murder at the Yeshiva starts with a simple premise – but murder is seldom simple; especially when it’s immersed in subterfuge with concurrently-running subplots and special interests. Slowly, readers become privy to information that Shuman does not know – and just as slowly, the gears of a murder machine begin to come together and ramp up. Part of the compelling draw of Murder at the Yeshiva is this attention to detail, which takes a relatively straightforward scenario and develops it into something unexpectedly complex. And while readers who want quick action and predictable paths in their murder mysteries may find themselves chafing at the bit of a slower-moving plot than some, the pleasure here lies in this exquisitely delicate evolutionary process. S. Bird takes the time to build characters, atmosphere, subplots, motives, and mystery. Under his hand the plot thickens like a pudding, carefully stirred and tended until, many chapters into the story, readers find themselves thoroughly immersed in a well-cooked saga that’s as much about Shuman’s evolution as it is about solving a murder.
