Staging and the Arts in Nineteenth-Century France

Camilla Murgia, 2023-09-22 This book discusses the mechanisms and patterns of staging in nineteenth-century France. Often associated with theatre and performance, staging also applies to visual arts. It is thoroughly embedded in a more general cultural development comprising the dissemination of knowledge, political awareness and consumerism. The notion of staging applies to a process of appearing, revealing and disappearing that puts forward new ways for the individual to be seen and to make the self (and the other) visible. Staging determines and questions the process of appearing and disappearing by generating connections and interactions between multiple layers of reality (i.e., artistic, theatrical, literary, and visual) – but according to what criteria, through what mechanisms and with what materials? What are the repercussions of staging, and, even more important, what does staging not show? This book argues that the notion of staging goes beyond interdisciplinarity. Looking at the different ways staging was used and conceived introduces new approaches to understanding visual culture in nineteenth-century France.

**Paris Primitive** Sally Price, 2007-10-15 In 1990 Jacques Chirac, the future president of France and a passionate fan of non-European art, met Jacques Kerchache, a maverick art collector with the lifelong ambition of displaying African sculpture in the holy temple of French culture, the Louvre. Together they began laying plans, and ten years later African fetishes were on view under the same roof as the Mona Lisa. Then, in 2006, amidst a maelstrom of controversy and hype, Chirac presided over the opening of a new museum dedicated to primitive art in the shadow of the Eiffel Tower: the Musée

du Quai Branly. Paris Primitive recounts the massive reconfiguration of Paris's museum world that resulted from Chirac's dream, set against a backdrop of personal and national politics, intellectual life, and the role of culture in French society. Along with exposing the machinations that led to the MQB's creation, Sally Price addresses the thorny questions it raises about the legacy of colonialism, the balance between aesthetic judgments and ethnographic context, and the role of institutions of art and culture in an increasingly diverse France. Anyone with a stake in the myriad political, cultural, and anthropological issues raised by the MQB will find Price's account fascinating.

Slides Anne Lacoste, 2017 Although the history of photography was built around prints, there were significant developments in slides from the last third of the 19th century, renewing the tradition of magic lanterns. Photographic projection offers a unique field of exploration involving a wide variety of forms, protagonists and places spanning a period of over one hundred and fifty years. Its history tells of the dissemination of knowledge, the quest for color and stereoscopy, the boom in amateur photography, and the medium's integration into the contemporary art scene from the 1960s. Amateurs, professional photographers, publishers, artists, architects and designers have joined forces here to describe the

specificities of the slide and show its impact on visual culture.--Page 4 of cover.
