*Urban Revolutions* Emilie Bahr, 2016-04-12 *Urban Revolutions* is a different kind of cycling book. Author Emilie Bahr draws on her experience as an everyday cyclist and a transportation planner in New Orleans to demystify urban bicycling in this visually-compelling and fun-to-read field guide. What does it mean for a city to be bike-friendly? What makes bicycling a women's issue? What does it take to feel safe on a bike? How do you bike to work in the summer and still look professional? What is the most fun you can possibly have on two wheels without being athletic? Bahr answers all these questions and more in her friendly and thoughtful essays and detailed practical tips on everything from biking in hot weather to biking with kids to biking with natural hair. Read an interview with Emilie on our blog! *Urban Revolutions* from Micheal Boedigheimer on Vimeo.

**The China Lab Guide to Megablock Urbanisms** Jeffrey Johnson, Cressica Brazier, Tat Lam, 2022-01-19 A wider conversation on the policies and collective experiences of large-scale development that are shaping China's urban future. Superblocks are the basic unit of China's urban development, but they are also spatial instruments with social, cultural, environmental, and economic implications, operating between the scales of architecture and the city. These redefined 'Megablocks' then become laboratories for the consequences, opportunities, and potential global proliferation of Chinese urban models, reconsidered through the filters of ecology, economics, and ethics. In this bilingual Guide to Megablock Urbanisms, China Lab aims to document and advance China's urban future. Co-published with GSAPP, Columbia University. Contributions: Amale Andraos, David Bray, Eric Chang, Yung Ho Chang, Renee Y. Chow, Edward Denison, Duanfang Lu, Joris Fach, John Fitzgerald, Steven Holl, Michiel Hulshof, Jun Jiang, Clover Lee, Zhongjie Lin, Matthew Niederhauser, Xuefei Ren, Daan Roggeveen, André Schmidt, Grahame Shane, Jian Shi, Jiaming Zhu, Jianfei Zhu

The Lab Book Darren Wershler, Lori Emerson, Jussi Parikka, 2022-03-22 An important new approach to the study of laboratories, presenting a practical method for understanding labs in all walks of life From the "Big Science" of Bell Laboratories to the esoteric world of séance chambers to university media labs to neighborhood makerspaces, places we call "labs" are everywhere—but how exactly do we account for the wide variety of ways that they produce knowledge? More than imitations of science and engineering labs, many contemporary labs are hybrid forms that require a new methodological and theoretical toolkit to describe. The Lab Book investigates these vital, creative spaces, presenting readers with the concept of the "hybrid lab" and offering an extended—and rare—critical investigation of how labs have proliferated throughout culture. Organized by interpretive categories such as space, infrastructure, and imaginaries, The Lab Book uses both historical and contemporary examples to show how laboratories have become fundamentally connected to changes in the contemporary university. Its wide reach includes institutions like the MIT Media Lab, the Tuskegee Institute's Jesup Wagon, ACTLab, and the Media Archaeological Fundus. The authors cover topics such as the evolution and delineation of lab-based communities, how labs' tools and technologies contribute to defining their space, and a glossary of key hybrid lab techniques. Providing rich historical breadth and depth, The Lab Book brings into focus a critical, but often misunderstood, aspect of the contemporary arts and humanities.

**Respecifying Lab Ethnography** Philippe Sormani, 2016-04-08 *Respecifying Lab Ethnography* delivers the first ethnomethodological study of current experimental physics in action, describing the disciplinary orientation of lab work and exploring the discipline in its social order, formal stringency and skilful performance – in situ and in vivo. Drawing upon extensive participant observation, this book articulates and draws upon two major strands of ethnomethodological inquiry: reflexive ethnography and video analysis. In bringing together these two approaches, which have hitherto existed in parallel, *Respecifying Lab Ethnography* introduces a practice-based video analysis. In doing so, the book recasts conventional distinctions to shed fresh light on methodological issues surrounding the descriptive investigation of social practices more broadly. An engaged and innovative study of the encountered worksite, this book will appeal not only to sociologists with interests in ethnomethodology and the sociology of work, but also to scholars of science and technology studies and those working in the fields of ethnography and social science methodology.

**Gold on a Sailboat!** Sam Venkatesam, 2022-08-02 Can you smuggle some thirty-five million dollars worth of gold openly and so audaciously that no one can catch you when you carry it from Houston to Cochin on the high seas using a sailboat? Dr. Mohan Reddy, an American metallurgist, does it, and he does it successfully. The gold bars were accidentally found by him in a jungle in Texas. The original thief of the gold comes to know about his loss and keeps an eagle's eye on Mohan all the time. What about Mohan's own challenges? The movement of gold bars within the US is the first one. The next one is converting the shape of gold amenable for transportation, a metallurgical nightmare. What about the treacherous Atlantic Ocean? What about the pirates of the Arabian Sea? What about the moles placed by the original thief of the gold on his sailboat? What about converting the gold into legal money? Most importantly, how would he handle the whole perilous caper all alone and without any latitude for error or failure?

**Guidelines for Laboratory Design** Louis J. DiBerardinis, Janet S. Baum, Melvin W. First, Gari T. Gatwood, Anand K. Seth, 2013-04-08 Proven and tested guidelines for designing ideal labs for scientific investigations Now in its Fourth Edition, *Guidelines for Laboratory Design* continues to enable readers to design labs that make it possible to conduct scientific investigations in a safe and healthy environment. The book brings together all the professionals who are critical to a successful lab design, discussing the roles of architects, engineers, health and safety professionals, and laboratory researchers. It provides the design team with the information needed to ask the right questions and then determine the best design, while complying with current regulations and best practices. *Guidelines for Laboratory Design* features concise, straightforward advice organized in an easy-to-use format that facilitates the design of safe, efficient laboratories. Divided into five sections, the book records some of the most important discoveries and achievements in: Part IA, Common Elements of Laboratory Design, sets forth technical specifications that apply to most laboratory buildings and modules Part IB, Common Elements of Renovations, offers general design principles for the renovation and modernization of existing labs Part II, Design Guidelines for a Number of Commonly Used Laboratories, explains specifications, best practices, and guidelines for nineteen types of laboratories, with three new chapters covering nanotechnology, engineering, and autopsy labs Part III, Laboratory Support Services, addresses design issues for imaging facilities, support shops, hazardous waste facilities, and laboratory storerooms Part IV, HVAC Systems, explains how to heat, cool, and ventilate labs with an eye towards energy conservation Part V, Administrative Procedures, deals with bidding procedures, final acceptance inspections, and sustainability The final part of the book features five appendices filled with commonly needed data and reference materials. This Fourth Edition is indispensable for all laboratory design teams, whether constructing a new laboratory or renovating an old facility to meet new objectives.

**Industry-Laboratory Partnerships** National Research Council, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, 1999-09-17 The Sandia National Laboratories asked the Board on Science, Technology, and Economic Policy (STEP) to hold a one-day symposium to review Sandia's proposal to develop a science and technology park. In light of the importance of industry-laboratory cooperation for the STEP Board's project on Government-Industry Partnerships for the Development of New Technologies, the Board convened a workshop bringing together executive branch officials, congressional staff, representatives from the private sector, and regional economists to discuss the Sandia S&T park initiative. The Sandia S&T Park, which Sandia National Laboratories, the City of Albuquerque, and the State of New Mexico are jointly developing, is a 285 acre site located adjacent to Sandia National Laboratories. Groundbreaking for the park took place in May, 1999.

Boundary Lab Nandan Kamath, 2024-03-11 Sport is a petri dish. In it, society tests not only human limits but also individual and collective attitudes and norms, often before they impact the wider world beyond the boundary. In its quest for universal rules, organized sport must regularly balance multiple interests and answer difficult questions. This helps sport—and through sport, society—to tweak laws, markets, morals and technological advances. The outcomes of the resulting debates influence the way we live, view each other, and organize our world. Why should we care about sport and its governance? Within the covers of Boundary Lab lie the answers.

**Lab Coats in Hollywood** David A. Kirby, 2013-02-08 How science consultants make movie science plausible, in films ranging from 2001: A Space Odyssey to Finding Nemo. Stanley Kubrick's 2001: A Space Odyssey, released in 1968, is perhaps the most scientifically accurate film ever produced. The film presented such a plausible, realistic vision of space flight that many moon hoax proponents believe that Kubrick staged the 1969 moon landing using the same studios and techniques. Kubrick's scientific verisimilitude in 2001 came courtesy of his science consultants—including two former NASA scientists—and the more than sixty-five companies, research organizations, and government agencies that offered technical advice. Although most filmmakers don't consult experts as extensively as Kubrick did, films ranging from A Beautiful Mind and Contact to Finding Nemo and The Hulk have achieved some degree of scientific credibility because of science consultants. In Lab Coats in Hollywood, David Kirby examines the interaction of science and cinema: how science consultants make movie science plausible, how filmmakers negotiate scientific accuracy within production constraints, and how movies affect popular perceptions of science. Drawing on interviews and archival material, Kirby examines such science consulting tasks as fact checking and shaping visual iconography. Kirby finds that cinema can influence science as well: Depictions of science in popular films can promote research agendas, stimulate technological development, and even stir citizens into political action.

Raindance Writers' Lab Elliot Grove, 2014-03-26 If you're looking for a straightforward, practical, no-nonsense guide to scriptwriting that will hold your hand right the way through the process, read on! The Raindance Writers' Lab guides you through the tools that enable you to execute a strong treatment for a feature and be well on the way to the first draft of your script. Written by the creator of the Raindance Film Festival himself, Elliot Grove uses a hands-on approach to screenwriting based on his many years of experience teaching the subject for Raindance training. He uses step-by-step processes illustrated with diagrams and charts to lend a visual structure to the teaching. Techniques are related to real-life examples throughout, from low budget to blockbuster films. The Companion Website contains interviews with British writers and directors as well as a handy series of legal contracts, video clips and writing exercises. In this brand new 2nd edition, Grove expands on his story structure theory, as well as how to write for the internet and short films. The website also contains sample scripts and legal contracts, a writing exercise illustrated with a video clip, a folder full of useful hyperlinks for research, and a demo version of Final Draft screenwriting software.

*Intelligent Cities* Nicos Komninos, 2013-05-13 At the turn of the century some cities and regions in Europe, Japan and the USA, displayed an exceptional capacity to incubate and develop new knowledge and innovations. The favourable environment for research, technology and innovation created in these areas was not immediately obvious, yet it was of great significance for a development based on knowledge, learning, and innovation. *Intelligent Cities* focuses on these environments of innovation, and the major models (technopoles, innovating regions, intelligent cities) for creating an environment-supporting technology, innovation, learning, and knowledge-based development. The introduction and the first chapter deal with innovation as an environmental condition, and with the geography and typology of islands of innovation. The next three parts focus on the theoretical paradigms and the planning models of the 'industrial district', the innovating region', and the 'intelligent city', which offer three alternative ways to create an environment of innovation.

**A Lab of My Own** Neena B. Schwartz, 2010-01-01 What was it like to be a woman scientist battling the “old boy’s” network during the 1960s and 1970s? Neena Schwartz, a prominent neuroendocrinologist at Northwestern University, tells all. She became a successful scientist and administrator at a time when few women entered science and fewer succeeded in establishing independent laboratories. She describes her personal career struggles, and those of others in academia, as well as the events which lead to the formation of the Association of Women in Science, and Women in Endocrinology, two national organizations, which have been successful in increasing the numbers of women scientists and their influence in their fields. The book intersperses this socio-political story with an account of Schwartz’s personal life as a lesbian and a description of her research on the role of hormones in regulating reproductive cycles. In a chapter titled “Don’t Ask, Don’t Tell,” she examines the “evidence” from a scientist’s point of view for the hormonal and genetic theories for homosexuality. Other chapters provide advice on mentoring young scientists and a discourse on why it matters to all of us to have more women doing and teaching science. She also describes the process of putting together an interdisciplinary Center on Reproductive Science at Northwestern, which brought together basic and clinical scientists in an internationally recognized program of research and practice.

Media Laboratories Sarah Ann Wells, 2017-02-15 Media Laboratories explores a pivotal time for South American literature of the 1930s and '40s. Cinema, radio, and the typewriter, once seen as promising catalysts for new kinds of writing, began to be challenged by authors, workers, and the public. What happens when media no longer seem novel and potentially democratic but rather consolidated and dominant? Moving among authors from Brazil, Argentina, and Uruguay, and among the genres of fiction, the essay, popular journalism, and experimental little magazines, Sarah Ann Wells shows how writers on the periphery of global modernity were fashioning alternative approaches to these media. Analyzing authors such as Clarice Lispector, Jorge Luis Borges, and Felisberto Hernández, along with their lesser-known contemporaries, Media Laboratories casts a wide net: from spectators of Hollywood and Soviet montage films, to inventors of imaginary media, to proletarian typists who embodied the

machine-human encounters of the period. The text navigates contemporary scholarly and popular debates about the relationship of literature to technological innovation, media archaeology, sound studies, populism, and global modernisms. Ultimately, Wells underscores a question that remains relevant: what possibilities emerge when the enthusiasm for new media has been replaced by anxiety over their potentially pernicious effects in a globalizing, yet vastly unequal, world?
