Virtualpolitik Elizabeth Mathews Losh, 2009 Government media-making, from official websites to whistleblowers' e-mail, and its sometimes unintended consequences. Today government agencies not only have official Web sites but also sponsor moderated chats, blogs, digital video clips, online tutorials, videogames, and virtual tours of national landmarks. Sophisticated online marketing campaigns target citizens with messages from the government--even as officials make news with digital gaffes involving embarrassing e-mails, instant messages, and videos. In *Virtualpolitik*, Elizabeth Losh closely examines the government's digital rhetoric in such cases and its dual role as mediamaker and regulator. Looking beyond the usual focus on interfaces, operations, and procedures, Losh analyzes the ideologies revealed in government's digital discourse, its anxieties about new online practices, and what happens when officially sanctioned material is parodied, remixed, or recontextualized by users. Losh reports on a video game that panicked the House Intelligence Committee, pedagogic and therapeutic digital products aimed at American soldiers, government Web sites in the weeks and months following 9/11, PowerPoint presentations by government officials and gadflies, e-mail as a channel for whistleblowing, digital satire of surveillance practices, national digital libraries, and computer-based training for health professionals. Losh concludes that the government's virtualpolitik--its digital realpolitik aimed at preserving its own power--is focused on regulation, casting as criminal such common online activities as file sharing, video-game play, and social networking. This policy approach, she warns, indefinitely postpones building effective institutions for electronic governance, ignores constituents' need to shape electronic identities to suit their personal politics, and misses an opportunity to learn how citizens can have meaningful interaction with the virtual manifestations of the state.

A Buyer's and User's Guide to Astronomical Telescopes and Binoculars James Mullaney, 2013-10-10 Amateur astronomers of all skill levels are always contemplating their next telescope, and this book points the way to the most suitable instruments. Similarly, those who are buying their first telescopes – and these days not necessarily a low-cost one – will be able to compare and contrast different types and manufacturers. This exciting and revised new guide provides an extensive overview of binoculars and telescopes. It includes detailed up-to-date information on sources, selection and use of virtually every major type, brand, and model on today's market, a truly invaluable treasure-trove of information and helpful advice for all amateur astronomers. Originally written in 2006, much of the first edition is inevitably now out of date, as equipment advances and manufacturers come and go. This second edition not only updates all the existing sections of "A Buyer's and User's Guide to Astronomical Telescopes and Binoculars" but adds two new ones: Astro-imaging and Professional-Amateur collaboration. Thanks to the rapid and amazing developments that have been made in digital cameras – not those specialist cool-chip astronomical cameras, not even DSLRs, but regular general-purpose vacation cameras – it is easily possible to image all sorts of astronomical objects and fields. Technical developments, including the Internet, have also made it possible for amateur astronomers to make a real contribution to science by working with professionals. Selecting the right device for a variety of purposes can be an

overwhelming task in a market crowded with observing options, but this comprehensive guide clarifies the process. Anyone planning to purchase binoculars or telescopes for astronomy – whether as a first instrument or as an upgrade to the next level – will find this book a treasure-trove of information and advice. It also supplies the reader with many useful hints and tips on using astronomical telescopes or binoculars to get the best possible results from your purchase.
