Passport Photos Amitava Kumar,2023-11-10 Passport Photos, a self-conscious act of artistic and intellectual forgery, is a report on the immigrant condition. A multigenre book combining theory, poetry, cultural criticism, and photography, it explores the complexities of the immigration experience, intervening in the impersonal language of the state. Passport Photos joins books by writers like Edward Said and Trinh T. Minh-ha in the search for a new poetics and politics of diaspora. Organized as a passport, Passport Photos is a unique work, taking as its object of analysis and engagement the lived experience of post-coloniality--especially in the United States and India. The book is a collage, moving back and forth between places, historical moments, voices, and levels of analysis. Seeking to link cultural, political, and aesthetic critiques, it weaves together issues as diverse as Indian fiction written in English, signs put up by the border patrol at the U.S.-Tijuana border, ethnic restaurants in New York City, the history of Indian indenture in Trinidad, Native Americans at the Superbowl, and much more. The borders this book crosses again and again are those where critical theory meets popular journalism, and where political poetry encounters the work of documentary photography. The argument for such border crossings lies in the reality of people's lives. This thought-provoking book explores that reality, as it brings postcolonial theory to a personal level and investigates global influences on local lives of immigrants.

Selected Quality Metrics for Digital Passport Photographs Oriana Yuridia González Castillo,2008 This thesis deals with the development of metrics for the automated determination of the quality and grade of acceptance of digital passport photographs without having any reference image available. Different kinds of algorithms were implemented to determine values for image attributes and to detect the face features. No priority for the evaluation of attributes was given in the documents of the international standards. For that reason an international online and on-site survey was developed to explore the opinion of user experts whose work is related to passport photographs. Three different metrics, expressed by the Photograph/ Image and Biometric Attributes Quality Indexes (PAQI, IAQI, BAQI) have been developed to obtain reference values for the quality determination of a passport photograph. Another metric developed is called Non-Conformance Quality Index which is based on the representation of the quality information in the minimum unit of information storage: the byte. The nonconformance of a quality attribute is stored in a bit. For a digital passport photograph the representation of the quality attributes is defined by four bytes. Every byte has eight bits and every bit represents an attribute.

Passport Photo Studio . NET Monkey Research Automation,2010-03-20 Passport Photo Studio .NET tells its readers how to make a passport photo by taking a picture using a digital camera and a wall as the background. Wintin less than five (5) minutes, you upload your digital picture, the system will help you resize and crop the proper area to produce a perfect passport photo. During this process the system will automatically correct color, background and constrast. Therefore the final result will look better than the opriginally uploaded picture. In general, if the original picture is taken by following the simple guidelines, the final outcome should be better than from a passport photo shop or a postal office. The Passport in America Craig Robertson,2010-07-02 In today's world of constant identification checks, it's difficult to recall that there was ever a time when proof of identity was not a part of everyday life. And as anyone knows who has ever lost a passport, or let one expire on the eve of international travel, the passport has become an indispensable document. But how and why did this form of identification take on such a crucial role? In the first history of the passport in the United States, Craig Robertson offers an illuminating account of how this document, above all others, came to be considered a reliable answer to the question: who are you? Historically, the passport originated as an official letter of introduction addressed to foreign governments on behalf of American travelers, but as Robertson shows, it became entangled in contemporary negotiations over citizenship and other forms of identity documentation. Prior to World War I, passports were not required to cross American borders, and while some people struggled to understand how a passport could accurately identify a person, others took advantage of this new document to advance claims for citizenship. From the strategic use of passport applications by freed slaves and a campaign to allow married women to get passports in their maiden names, to the passport nuisance of the 1920s and the contested addition of photographs and other identification technologies on the passport, Robertson sheds new light on issues of individual and national identity in modern U.S. history. In this age of heightened security, especially at international borders, Robertson's *The Passport in America* provides anyone interested in questions of identification and surveillance with a richly detailed, and often surprising, history of this uniquely important document.

Black Passport Stanley Greene,2009 The archetype of the war correspondent is freighted with an outsize heroic mythos to which world-renowned conflict photographer Stanley Greene is no stranger. *Black Passport* is his autobiographical monograph-cum-scrapbook, and it transports the viewer behind the news as Greene reflects upon his career, oscillating between the relative safety of life in the West and the traumas of wars abroad. This glimpse of the polarities that have comprised Greene's life raises essential questions about the role of the photojournalist, as well as concerns about its repercussions: what motivates someone to willingly confront death and misery? To do work that risks one's life? Is it political engagement, or a sense of commitment to telling difficult stories? Or does being a war photographer simply satisfy a yearning for adventure? *Black Passport* offers an experience that is both exceptionally personal and ostensibly objective. Built around Greene's narrating monologue, the book's 26 short,

nonsequential scenes are each illustrated by a portfolio of his work.

Passport to Heaven Micah Wilder,2021-06-01 “You have a call, Elder Wilder.” When missionary Micah Wilder set his sights on bringing a Baptist congregation into the Church of Jesus Christ of Latter-day Saints, he had no idea that he was the one about to be changed. Yet when he finally came to know the God of the Bible, Micah had no choice but to surrender himself—no matter the consequences. For a passionate young Mormon who had grown up in the Church, finding authentic faith meant giving up all he knew: his community, his ambitions, and his place in the world. Yet as Micah struggled to reconcile the teachings of his Church with the truths revealed in the Bible, he awakened to his need for God’s grace. This led him to be summoned to the door of the mission president, terrified but confident in the testimony he knew could cost him everything. Passport to Heaven is a gripping account of Micah’s surprising journey from living as a devoted member of a religion based on human works to embracing the divine mercy and freedom that can only be found in Jesus Christ.

Animation Under the Swastika Rolf Giesen,J.P. Storm,2012-08-02 Among their many idiosyncrasies, Adolf Hitler and Joseph Goebbels, the Nazi minister of propaganda, remained serious cartoon aficionados throughout their lives. They adored animation and their influence on German animation after World War II continues to this day. This study explores Hitler and Goebbels' efforts to establish a German cartoon industry to rival Walt Disney's and their love-hate relationship with American producers, whose films they studied behind locked doors. Despite their ambitious dream, all that remains of their efforts are a few cartoon shorts--advertising and puppet films starring dogs, cats, birds, hedgehogs, insects, Teutonic dwarves, and other fairy-tale ensemble. While these pieces do not hold much propaganda value, they perfectly illustrate Hannah Arendt's controversial description of those who perpetrated the Holocaust: the banality of evil.
Traces Bettina Bock von Wülfigen,2017-07-24 Traces keep time and make the past visible. As such, they continue to be a fundamental resource for scientific knowledge production in modernity. While the art of trace reading is a millennia-old practice, tracings are specifically produced in the photographic archive or in the scientific laboratory. The material traces of the forms represent the objects and causes to which they owe their existence while making them invisible at the moment of their visualization. By looking at different techniques for the production of traces and their changes over two centuries, the contributions show the continuities they have, both in the laboratories and in large colliders of particle physics. This volume, inspired by Carlo Ginzburg’s early works, formulates a theory of traces for the 21st century.
