Not so good at remembering your login details? Feel anxious about keeping your many passwords in a physical book? Perhaps you also worry about relying on technology to store your critical information? Worry no more as this password tracker is the perfect solution! You no longer need to rely on software or apps to keep your passwords organized as this secret password tracker book with encryption keys does it all and gives you peace of mind! You create codes using secret keys that are kept in a separate place from the book. ☆ HOW TO USE ☆ Use the secret key sections at the back of the book to assign a character to a particular password or phrase (examples are below). Cut out the pages and put them in a safe place(s) to use with the book when you need to remember or update a password. Combine the keys to create a secret key code so that you can build your password. You can make the key code as simple, or complex as you want. ● Example 1: You assign M to Dandelion123 If the key code for a website is M, then the password is: Dandelion123 ● Example 2: You assign 1 to Twinkle, 2 to Little, and 3 to Star If the key code for a website is 1123, then the password is: TwinkleTwinkleLittleStar ● Example 3: You assign a to Cat, ! to m@D, and 0 to Blu31. If the key code for a website is 0!a, then the password is: Blu31.m@DCat The above examples demonstrate how you can use this book for passwords only, however, this can also be applied to usernames/emails for extra encryption/protection, as the following simple example demonstrates: ● Example 4: You assign L to sallysmith@emaildomain.com and 8 to Counting123 If the key code for a website email login is L, and the password 8, then: The login email is sallysmith@emaildomain.com and the password is Counting123 More details about this book: Store up to 32 passwords per letter.

Store an additional 16 miscellaneous passwords. Store the details of up to 10 email accounts. Store the details of up to 5 cryptocurrency wallets. Assign keys ranging from a-z, A-Z, 0-103, and many of the commonly used English symbols, equating to 182 keys. Create up to 52 additional/personalized keys for extra encryption. Combine keys to create an unlimited amount of secret key codes. This is a safe and reassuring way to keep track of and store your passwords. You remain in control as you keep the secret key. If you lose this book, it will be impossible for someone to decrypt your hidden/secret key codes. This book will be useless. This password book is great as a gift for everyone and anyone you can think of!
