The Comprehensive Sourcebook of Bacterial Protein Toxins Joseph E. Alouf, Daniel Ladant, Michel R. Popoff, 2005-12-20 This book describes the major achievements and discoveries relevant to bacterial protein toxins since the turn of the new century illustrated by the discovery of more than fifty novel toxins (many of them identified through genome screening). The establishment of the three-dimensional crystal structure of more than 20 toxins during the same period offers deeper knowledge of structure-activity relationships and provides a framework to understand how toxins recognize receptors, penetrate membranes and interact with and modify intracellular substrates. Edited by two of the most highly regarded experts in the field from the Institut Pasteur, France 14 brand new chapters dedicated to coverage of historical and general aspects of toxinology Includes the major toxins of both basic and clinical interest are described in depth Details applied aspects of toxins such as therapy, vaccinology, and toolkits in cell biology Evolutionary and functional aspects of bacterial toxins evaluated and summarized Toxin applications in cell biology presented Therapy (cancer therapy, dystonias) discussed Vaccines (native and genetically engineered vaccines) featured Toxins discussed as biological weapons, comprising chapters on anthrax, diphtheria, ricin etc.

Nevada Imogen Binnie, 2022-06-07 One of Vogue's Best Books of 2022 So Far, BuzzFeed's Summer Books You Won't Be Able To Put Down, Book Riot's Best Summer Reads for 2022, and Dazed's Queer Books to Read in 2022 [Nevada] is defiant, terse, not quite cynical, sometimes flip, addressed to people who think they know. It is, if you like, punk rock. —The New Yorker Nevada is a book that changed my life: it shaped both my worldview and personhood, making me the writer I am. And it did so by the oldest of methods, by telling a wise, hilarious, and gripping story. —Torrey Peters, author of *Detransition, Baby* A beloved and blistering cult classic and finalist for the Lambda Literary Award for Transgender Fiction finally back in print, Nevada follows a disaffected trans woman as she embarks on a cross-country road trip. Maria Griffiths is almost thirty and works at a used bookstore in New York City while trying to stay true to her punk values. She's in love with her bike but not with her girlfriend, Steph. She takes random pills and drinks more than is good for her, but doesn't inject anything except, when she remembers, estrogen, because she's trans. Everything is mostly fine until Maria and Steph break up, sending Maria into a tailspin, and then onto a cross-country trek in the car she steals from Steph. She ends up in the backwater town of Star City, Nevada, where she meets James, who is probably but not certainly trans, and who reminds Maria of her younger self. As Maria finds herself in the awkward position of trans role model, she realizes that she could become James's savior—or his downfall. One of the most beloved cult novels of our time and a landmark of trans literature, Imogen Binnie's Nevada is a blistering, heartfelt, and evergreen coming-of-age story, and a punk-smeared excavation of marginalized life under capitalism. Guided by an instantly memorable, terminally self-aware protagonist—and back in print featuring a new afterword by the author—Nevada is the great American road novel flipped on its head for a new generation.

Partnership for the Americas: Western Hemisphere Strategy and U.S. Southern Command James G. Stavridis, 2014-02-23 Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command. Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch ideas not missiles into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

Real News Scott Stedman, 2019-04-16 Documented Evidence of the Trump-Russia Conspiracy Investigative reporter Scott Stedman has made waves worldwide with his hard-hitting investigative journalism, going as far as anyone has to uncover the deep roots of the Trump-Russia Conspiracy. His research has been cited by the Washington Post, BBC, Reuters, CNN, McClatchy, the Daily Mail, the Guardian, and Vice, and has even helped guide Congress's investigations. Real News collects, for the first time in print, Stedman's eye-opening research into and evidence of every level of the Trump-Russia Conspiracy, from the 2016 Trump Tower Meetings to the dirty-money deal for Trump Tower Moscow, from the "coffee boy" George Papadopoulos and his mysterious wife to Russian infiltration of the National Rifle Association, from Cambridge Analytica's sketchy business deals and influence operations to the battle for true journalism that will combat cries of "Fake News!" Full of real, exclusive evidence including ownership records, flight logs, banking information and statements, meeting transcripts, maps, quotes, stats and figures, cease and desist letters, and more, Real News not only enables readers to see and evaluate the arguments for the existence of the Trump-Russia Conspiracy for themselves, it also fully explains how Stedman went about his investigations to discover the truth. Anyone who is interested in the evidence—the real news about the Trump-Russia Conspiracy—needs to read this book.

Computational Statistical Mechanics W.G. Hoover, 2012-12-02 Computational Statistical Mechanics describes the use of fast computers to simulate the equilibrium and nonequilibrium properties of gases, liquids, and solids at, and away from equilibrium. The underlying theory is developed from basic principles and illustrated by applying it to the simplest possible examples. Thermodynamics, based on the ideal gas thermometer, is related to Gibbs's statistical mechanics through the use of Nosé-Hoover heat reservoirs. These reservoirs use integral feedback to control temperature. The same approach is carried through to the simulation and analysis of nonequilibrium mass, momentum, and energy flows. Such a unified approach makes possible consistent mechanical definitions of temperature, stress, and heat flux which lead to a microscopic demonstration of the Second Law of Thermodynamics directly from mechanics. The intimate connection linking Lyapunov-unstable microscopic motions to macroscopic dissipative flows through multifractal phase-space structures is illustrated with many examples from the recent literature. The book is well-suited for undergraduate courses in advanced thermodynamics, statistical mechanics and transport theory, and graduate courses in physics and chemistry.

Louisiana in Words Joshua Clark,2007-02-28 Louisiana in Words is a Book of Hours for a place that's more like a religion than a state. -Josh Russell, author of Yellow Jack Here we are, Louisianians all, somewhere in this book, but after that sense of self-recognition comes a desire to go to every place in this book, see it, know it like the writer does, experience our home state's every corner. -New Orleans Times-Picayune Taste, smell, hear, and see Louisiana in this collection of one-minute experiences taking place over a twenty-four-hour period across the Pelican State. One hundred twenty Louisiana-born or current resident contributors of all ages, backgrounds, and perspectives have offered their grateful, graceful, and grave visions of the state, a place as evocative as the essays within this gathering of voices. The ultimate insider's look, the book provides an unparalleled feel for hitherto hidden worlds inside the state. Together these minutes provide a mosaic of the landscape, heritage, speech, and traditions of Louisiana, a place so often romanticized, demonized, adored, pitied, and patronized. Contributors were asked to write one page or less about one minute, anytime, anywhere, in Louisiana. Writers selected include award-winning writers such as John Biguenet, Andrei Codrescu, Barry Gifford, Bev Marshall, David Madden, Lee Meitzen Grue, and Fredrick Barton as well as novice writers of all ages. Passages cast Louisiana's diverse peoples as backdrop against the action that transpires within the minute. Authors and their stories' settings reflect the entire state, from the northeast corner near Lake Providence to Lake Charles in the southeast; from Monroe along the Ouachita River and Shreveport in the northwest to Lafayette, the heart of Cajun country; from the south-centrally located Alexandria on the Red River to the southernmost port of New Orleans.

Understanding Mass Incarceration James Kilgore,2015-08-11 We all know that orange is the new black and mass incarceration is the new Jim Crow, but how much do we actually know about the structure, goals, and impact of our criminal justice system? Understanding Mass Incarceration offers the first comprehensive overview of the incarceration apparatus put in place by the world's largest jailer: the United States. Drawing on a growing body of academic and professional work, Understanding Mass Incarceration describes in plain English the many competing theories of criminal justice—from rehabilitation to retribution, from restorative justice to justice reinvestment. In a lively and accessible style, author James Kilgore illuminates the difference between prisons and jails, probation and parole, laying out key concepts and policies such as the War on Drugs, broken windows policing, three-strikes sentencing, the school-to-prison pipeline, recidivism, and prison privatization. Informed by the crucial lenses of race and gender, he addresses issues typically omitted from the discussion: the rapidly increasing incarceration of women, Latinos, and transgender people; the growing imprisonment of immigrants; and the devastating impact of mass incarceration on communities. Both field guide and primer, Understanding Mass Incarceration will be an essential resource for those engaged in criminal justice activism as well as those new to the subject.

No Aging in India Lawrence Cohen,1998-07-30 From the opening sequence, in which mid-nineteenth-century Indian fishermen hear the possibility of redemption in an old woman's madness, No Aging in India captures the reader with its interplay of story and analysis. Drawing on more than a decade of ethnographic work, Lawrence Cohen links a detailed investigation of mind and body in old age in four neighborhoods of the Indian city of Varanasi (Banaras) with events and processes around India and around the world. This compelling exploration of senility—encompassing not only the aging body but also larger cultural anxieties—combines insights from medical anthropology, psychoanalysis, and postcolonial studies. Bridging literary genres as well as geographic spaces, Cohen responds to what he sees as the impoverishment of both North American and Indian gerontologies—the one mired in ambivalence toward demented old bodies, the other insistent on a dubious morality tale of modern families breaking

up and abandoning their elderly. He shifts our attention irresistibly toward how old age comes to matter in the constitution of societies and their narratives of identity and history.
