Automate the Boring Stuff with Python Al Sweigart,2015-04-14 If you've ever spent hours renaming files or updating hundreds of spreadsheet cells, you know how tedious tasks like these can be. But what if you could have your computer do them for you? In *Automate the Boring Stuff with Python*, you'll learn how to use Python to write programs that do in minutes what would take you hours to do by hand—no prior programming experience required. Once you've mastered the basics of programming, you'll create Python programs that effortlessly perform useful and impressive feats of automation to: Search for text in a file or across multiple files>Create, update, move, and rename files and foldersSearch the Web and download online contentUpdate and format data in Excel spreadsheets of any sizeSplit, merge, watermark, and encrypt PDFsSend reminder emails and text notificationsFill out online forms Step-by-step instructions walk you through each program, and practice projects at the end of each chapter challenge you to improve those programs and use your newfound skills to automate similar tasks. Don't spend your time doing work a well-trained monkey could do. Even if you've never written a line of code, you can make your computer do the grunt work. Learn how in *Automate the Boring Stuff with Python*. Note: The programs in this book are written to run on Python 3.

Introduction to Renewable Power Systems and the Environment with R Miguel F. Acevedo,2018-07-26 Introduction to Renewable Power Systems and the Environment with R showcases the fundamentals of electrical power systems while examining their relationships with the environment. To address the broad range of interrelated problems that come together when generating electricity, this reference guide ties together multiple engineering disciplines with applied sciences. The author merges chapters on thermodynamics, electricity, and environmental systems to make learning fluid and comfortable for students with different backgrounds. Additionally, this book provides users with the opportunity to execute computer examples and exercises that use the open source R system. Functions of the renpow R package have been described and used in this book in the context of specific examples. The author lays out a clear understanding of how electricity is produced around the world and focuses on the shift from carbon-based energy conversions to other forms including renewables. Each energy conversion system is approached both theoretically and practically to provide a comprehensive guide. Electrical circuits are introduced from the simplest circumstances of direct current (DC), progressing to more complex alternating current (AC) circuits, single phase and three-phase, and electromagnetic devices including generators and transformers. Thermodynamics are employed to understand heat engines and a variety of processes in electrochemical energy conversion, such as fuel cells. The book emphasizes the most prevalent renewable energy conversions in use today: hydroelectrical, wind, and solar. This book is an invaluable for students as a resource to help them understand those aspects of environment systems that motivate the development and utilization of renewable power systems technology.

Techno-Societal 2020 Prashant M. Pawar,R. Balasubramaniam,Babruvahan P. Ronge,Santosh B. Salunkhe,Anup S. Vibhute,Bhuwaneshwari Melinamath,2021-05-19 This book, divided in two volumes, originates from Techno-Societal 2020: the 3rd International Conference on Advanced Technologies for Societal Applications, Maharashtra, India, that brings together faculty members of various engineering colleges to solve Indian regional relevant problems under the guidance of eminent researchers from various reputed organizations. The focus of this volume is on technologies that help develop and improve society, in particular on issues such as sensor and ICT based technologies for the betterment of people, Technologies for agriculture and healthcare, micro and nano technological applications. This conference aims to help innovators to share their best practices or products developed to solve specific local problems which in turn may help the other researchers to take inspiration to solve problems in their region. On the other hand, technologies proposed by expert researchers may find applications in different regions. This offers a multidisciplinary platform for researchers from a broad range of disciplines of Science, Engineering and Technology for reporting innovations at different levels.

Perspectives in Dynamical Systems II: Mathematical and Numerical Approaches Jan Awrejcewicz,2022-01-01 This volume is part of collection of contributions devoted to analytical and experimental techniques of dynamical systems, presented at the 15th International Conference “Dynamical Systems: Theory and Applications”, held in Łódź, Poland on December 2-5, 2019. The wide selection of material has been divided into three volumes, each focusing on a different field of applications of dynamical systems. The broadly outlined focus of both the conference and these books includes bifurcations and chaos in dynamical systems, asymptotic methods in nonlinear dynamics, dynamics in life sciences and bioengineering, original numerical methods of vibration analysis, control in dynamical systems, optimization problems in applied sciences, stability of dynamical systems, experimental and industrial studies, vibrations of lumped and continuous systems, non-smooth systems, engineering systems and differential equations, mathematical approaches to dynamical systems, and mechatronics.

Advances in Hydrosience Ven Te Chow,2013-10-22 Advances in Hydrosience, Volume 13-1982 covers topics on water-related thermal problems, solid-state hydrology, alluvial hydraulics, and ocean waves. The book presents articles on the simulation techniques for Aquifer Thermal Energy Storage, which deals with various aspects of the mathematical simulation of thermal energy storage in aquifers, and the theory of thermal control and prevention of ice in rivers and lakes. The text also includes an article on the hydraulic theory of alluvial rivers, which deals with sediment transport on a plane bed, the influence of dunes on flow resistance in steady and unsteady flow, and flow in bends. The stochastic analysis and probabilistic prediction of random seas is also encompassed. The book will prove invaluable to hydrologists, engineers working in fields concerned with water and water technology, those interested in temporarily storing energy from solar and other heat sources, those interested in groundwater, and geomorphologists.

Radio System Design for Telecommunications Roger L. Freeman,2006-11-03 Step-by-step tutorial to master current design techniques for wireless communication systems The Third Edition of Radio System Design for Telecommunications brings this highly acclaimed book fully up to date with the latest technological advances and new applications. At the same time, the hallmarks of the previous editions, including the text's popular tutorial presentation, have been retained. Readers therefore get all the tools and guidance they need to master an essential set of current design techniques for radio systems that operate at frequencies of 3 MHz to 100 GHz. Using simple mathematics, the author illustrates design concepts and applications. The book's logical organization, beginning with a discussion of radio propagation problems, enables readers to progressively develop the skills and knowledge needed to advance in the text. Topics that are new to the Third Edition include: Chapter devoted to wireless LANs (WLANs) as detailed in IEEE 802.11 Subsections covering IEEE 802.15, 802.16, 802.20, and the wireless metropolitan area network (WMAN) WiFi, WiMax, and UWB applications that have recently experienced explosive growth Broadband radio in telecommunications, as well as offset frequency division multiplex (OFDM), a new technique for transmitting information in an interference environment The use of very small aperture satellite terminal (VSAT) systems as an economical alternative to public switched telecommunication networks (PSTN) Review questions and problems at the end of each chapter engage readers' newfound skills and knowledge and help them assess whether they are ready to progress to the next chapter. References are provided for readers who want to investigate particular topics in greater depth. Students in wireless telecommunications will find the book's tutorial style ideal for learning all the ins and outs

of radio system design, whereas professionals in the industry will want to refer to the Third Edition for its clear explanations of the latest technology and applications.

Big Data Intelligence and Computing Ching-Hsien Hsu,Mengwei Xu,Hung Cao,Hojjat Baghban,A. B. M. Shawkat Ali,2023-04-30 This book constitutes the proceedings of the International Conference on Big Data Intelligence and Computing, DataCom 2022, which took place in Denarau Island, Fiji, in December 2022. The 30 full papers included in this volume were carefully reviewed and selected from 88 submissions. The papers detail big data analytics solutions, distributed computation paradigms, on-demand services, autonomic systems, and pervasive applications.

Reconnecting with Your Loved Ones Sue Frederick,2013-07-23 Sue Frederick, a lifelong intuitive, always had the gift of seeing through the thin veil. In Reconnecting with Your Loved Ones: Eight Essential Steps to Heal Your Grief, readers will experience her unique 8 Steps for Healing Grief, including the Break Your Heart Wide Open Meditation and other life-changing techniques that illuminate how accessible the other realms are to us. Frederick teaches that seeing and talking to our departed is not only possible, but necessary for healing grief. Readers will learn exactly how to do that and how to experience grief as an opening to our true purpose here.

How To Build High-Performance Teams Donald H. WEISS,1991-11-08 Here's a step-by-step process to recruit, empower and lead teams. How to Build High-Performance Teams focuses on the how-to keys of team-building—from recruiting the right team members to truly empowering them with authority and responsibility for their decisions and performance. You'll understand how to build trust, confidence, and group work skills, balancing and fine-tuning the team process as you go. You'll learn how to: • Build and manage teams that live up to their promise of higher productivity and greater problem-solving ability • Maximize team productivity by encouraging group discussion and problem-solving • Overcome organizational, management and employee barriers to teamwork • Manage interpersonal conflicts among team members. Prediction of Reservoir Quality Through Chemical Modeling American Association of Petroleum Geologists,1990

Trace Element Speciation Analytical Methods and Problems Graeme E. Batley,1989-06-30 This book discusses in detail the application of physical separation procedures together with modern instrumental analysis techniques such as HPLC, gas chromatography, and anodic strip-ping voltammetry. Particular emphasis is given to environmental samples where the greatest concern for the effects of speciation on trace element transport, toxicity, and bioavailability have been expressed. Special chapters are also devoted to methods of sampling and storage, and to the mathematical modeling of chemical speciation. Although designed for the practical analytical chemist, this publication is essential reading for researchers in or entering the field of chemical speciation.

Mathematical Modeling and Simulation of Systems Alexander Palagin,Anatoliy Anisimov,Anatoliy Morozov,Serhiy Shkarlet,2019-07-17 This book presents current investigations in the field of mathematical modeling and simulation to support the development of intelligent information systems in domains such as ecology and geology, manufacturing, project management, and safety of distributed information systems. The book will be of interest to developers of modern high-tech software complexes for situational control centers, based on mathematical modeling and simulation methods. In addition, it will appeal to software engineers and programmers, offering them new implementation and application methods. Gathering the latest research, prepared by leading scholars, and identifying promising new directions for solving complex scientific and practical problems, the book presents selected outcomes of the 14th International Scientific-Practical Conference, MODS2019, held in Chernihiv, Ukraine, on June 24 to 26, 2019.
