Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of

three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Modern Sociological Theory George Ritzer, Jeffrey Stepnisky, 2017-01-23 Now with SAGE Publishing, and

co-authored by one of the foremost authorities on sociological theory, the Eighth Edition of *Modern Sociological Theory* by George Ritzer and Jeffrey Stepnisky provides a comprehensive overview of the major theorists and theoretical schools, from the Structural Functionalism of early 20th century through the cutting-edge theories of the late 20th and early 21st centuries. The integration of key theories with biographical sketches of theorists and the requisite historical and intellectual context helps students to better understand the original works of contemporary thinkers. New to this Edition A new chapter focuses theories of race, racism, and colonialism, as well as theories about indigenous peoples and theories from the “Global South” that challenge the work of scholars from Europe and North America. New material on colonialization, classical women theorists, and race, as well as new timelines in history chapters. The chapter on Symbolic Interactionism now discusses work on the sociology of emotions. The concluding chapter now discusses affect theory and theories of presumption, one of the newest developments in consumer theory. The chapter on Contemporary Theories of Modernity includes new section on the work of Charles Taylor. New perspectives on the work of Immanuel Wallerstein have been added to the chapter on Neo-Marxian theories. The opening historical sketch chapters now include a discussion of colonialism as one of the forces that shaped modern society; new material on the historical significance of early women founders; and a section on theories of race.

Pax Economica Marc-William Palen,2024-02-27 A new economic history which uncovers the forgotten left-wing, anti-imperial, pacifist origins of economic cosmopolitanism and free trade from the mid-nineteenth to the mid-twentieth century. The post-1945 international free-trade regime was established to foster a more integrated, prosperous, and peaceful world. As US Secretary of State Cordell Hull (1933-1944), Father of the United Nations and one of the regime's principal architects, explained in his memoirs, unhampered trade dovetailed with peace; high tariffs, trade barriers, and unfair economic competition, with war. Remarkably, this same economic order is now under assault from the country most involved in its creation: the United States. A global economic nationalist resurgence - heralded by Donald Trump's America First protectionism and resultant trade wars with the USA's closest allies and trading partners - now looks to transform over seventy years of regional and global market integration into an illiberal economic order resembling that of the late nineteenth and early twentieth centuries. Economic cosmopolitan critics of today's retreat from free trade have offered dire warnings that doing so would be catastrophic for global consumers and an existential threat to regional and world peace. But under what circumstances did this ideological marriage of free trade, prosperity, and peace arise? Who were its main adherents? How did this same free-trade ideology succeed in becoming the new economic orthodoxy following the Second World War? And how

might the successes and failures of this earlier struggle to reform the economic order inform today's globalization crisis? In *Pax Economica*, economic historian Marc-William Palen finds answers amid a century of transnational peace and anti-imperial activism that stretched from Britain's unilateral adoption of free trade in 1846 to the founding of the US-led liberal trading system that arose immediately after the Second World War. Over five thematic chapters, considering the period from different perspectives, and utilising archival research conducted in Europe, North America, and Australia, Palen shows that this politico-ideological struggle to create a more prosperous and peaceful world through free trade pitted economic cosmopolitans against economic nationalists. Cosmopolitans sought to counter the industrialising world's embrace of economic nationalism because they believed - much like today's critics of Trump's tariffs and Brexit - that economic nationalism laid the groundwork for trade wars, high prices for consumers, and geopolitical conflict; while free trade created market interdependence, prosperity, social justice, and a more peaceful world. *Pax Economica* argues that this cosmopolitan fight for free trade laid foundations for a century of anti-imperial and peace activism across the globe - and paved the way for today's global trade regime now under siege--

How Shakespeare Changed Everything Stephen Marche,2011-05-10 Did you know the name Jessica was first used in *The Merchant of Venice*? Or that Freud's idea of a healthy sex life came from Shakespeare? Nearly four hundred years after his death, Shakespeare permeates our everyday lives: from the words we speak to the teenage heartthrobs we worship to the political rhetoric spewed by the twenty-four-hour news cycle. In the pages of this wickedly clever little book, Esquire columnist Stephen Marche uncovers the hidden influence of Shakespeare in our culture, including these fascinating tidbits: Shakespeare coined over 1,700 words, including hobnob, glow, lackluster, and dawn. Paul Robeson's 1943 performance as Othello on Broadway was a seminal moment in black history. Tolstoy wrote an entire book about Shakespeare's failures as a writer. In 1936, the Nazi Party tried to claim Shakespeare as a Germanic writer. Without Shakespeare, the book titles *Infinite Jest*, *The Sound and the Fury*, and *Brave New World* wouldn't exist. Stephen Marche has cherry-picked the sweetest and most savory historical footnotes from Shakespeare's work and life to create this unique celebration of the greatest writer of all time.

Lloyd's Register of American Yachts ,1917

Within the Veil Félix Cortez,2020-08-30 Most scholars understand that the Day of Atonement ritual of Leviticus 16 provides the main template for understanding Jesus's death and exaltation in the argument of Hebrews. This study suggests that the perspective of Hebrews is much wider than that, conceiving of the ascension as the inauguration of Jesus' office as Son at the right hand of God. The title Son is the fulfillment of the promises made to David (2 Sam 7:12-15), which are claimed for Jesus explicitly in Heb 1:5 and 13. This connection to the Davidic covenantal traditions brings closer the theology of Hebrews and the theology of other New Testament documents, which opens new vistas for understanding early Christianity.

New Babylonians Iain Borden,Sandy

McCreery,2001-08-29 The Situationists, who first appeared on the architectural scene in the 1960s, regarded cities as the ultimate opportunity for creative self-expression. While there are many publications about the history of the Situationist International, New Babylonians offers unique coverage of how their tactics are currently employed in architectural and urban strategies. It features renowned architects and educators who were first generation Situationists and also highlights some of the most exciting international practitioners involved in urban design today. * Contains contributions from an impressive roster of academics, designers, writers, and art practitioners * Offers timely and lively insights about contemporary urban architecture and art

African Civilization in the 21st Century Tseggai Isaac, Andrew Targowski, 2015 This book took the task of conceptualizing the change of African Civilization in the 21st century. It examines African Civilization and its encounters in view of the last 500 years of European and American slavery, exploitation and diplomatic paralysis. In post-colonial Africa (1960-2014), foreign powers have more influence on Africa. However, Africa cannot claim to have the diplomatic prestige to influence European, American or Asian powers. The overwhelming challenges that Africa has been experiencing did attract global reaction ranging from military intervention, diplomatic push or pull (rarely in between), and frequent humanitarian involvements. It is still inconclusive if global attention on Africa has had impact as much as it has been a stomping ground for advisors, donors, politicians, international agencies and a phalanx of well-meaning NGOs. However, their impact can be exemplified by the fact that in Sub-Saharan Africa, every second individual still does not have access to fresh water and electricity in the 21st century. In this book, the focus is put on Sub-Saharan Africa, where every other habitant has no access to fresh water and electricity. In this book, the following modernization strategies are recognized and discussed in Africa today: Westernization, Africanization, Chinezation, and Globalization. The evaluation of these policies is done with the civilization approach which is characterized by a big-picture view of the integration of society, culture (including religion), and infrastructure

over a long period of time on a large territory. Furthermore, in the 21st century, global civilization are forming and penetrating contemporary civilizations such as: Western, Eastern, Chinese, Japanese, Islamic, Buddhist, Hindu, and African enforcing the development of large scale global businesses and capital. In such a context, should African Civilization follow the questionable policy of Westernization and Globalization? Or should it not follow these challenges and avoid the temptations of fast development and look rather towards the Africanization approach, which could make it last longer than the so called more modern, mentioned civilizations. These kinds of considerations are debated in this book.

The Polity Reader in Social Theory

Polity, 1994-01-31 This book provides a comprehensive and integrated introduction to the major debates and schools of thought in social theory today. Some thirty different selections cover the period from the turn of the century up to the present. Classical social thought is well represented: Marx and Weber, Simmel, Mead and the Frankfurt School are among those included in this volume. The main emphasis of the text, however, is upon current social theory, its main lines of orientation, and the dominant areas of controversy and advance. Problems of method and epistemology are given some prominence; however, most of the contributions are substantive in character and are concerned with the theoretical interpretation of modern social institutions. The authors represented, or discussed, in the volume include

all of the most prominent figures in current social theory - for instance, Zygmunt Bauman, Nancy Chodorow, Pierre Bourdieu, Michel Foucault, Harold Garfinkel, Anthony Giddens, Jurgen Habermas, Agnes Heller, Richard Rorty and H. G. Gadamer. Each section of the volume is preceded by an introduction which summarizes the articles that it contains. The result is a source book which is invaluable for anyone interested in the development of social theory today.

Knowledge Societies Nico Stehr, 1994 In this analysis of the central role that knowledge plays in our life, Nico Stehr examines the premises of existing social theory and explores the knowledge relations in advanced societies. The planned result is a significant synthesis of social theory.
