Social Reading José-Antonio Cerdón-García,Julio Alonso-Arévalo,Raquel Gómez-Díaz,Daniel Linder,2013-10-31 Contemporary developments in the book publishing industry are changing the system as we know it. Changes in established understandings of authorship and readership are leading to new business models in line with the postulates of Web 2.0. Socially networked authorship, book production and reading are among the social and discursive practices starting to define this emerging system. Websites offering socially networked, collaborative and shared reading are increasingly important. Social Reading maps socially networked reading within the larger framework of a changing conception of books and reading. This book is structured into chapters covering topics in: social reading and a new conception of the book; an evaluation of social reading platforms; an analysis of social reading applications; the personalization of system contents; reading in the Cloud and the development of new business models; and Open Access e-books. Discusses social reading as an emerging tendency involving authors, readers, librarians, publishers, and other industry professionals Describes how the way we read is changing Presents ways in which the major players in the digital content industry are developing specific applications to foster socially networked reading

A-U-M Dennis Waite,2015-09-25 Gaudapada was one of the world's greatest philosophers in seventh-century India. He invokes the mystical symbol 'AUM' (pronounced as 'ohm') pointing to the three states of consciousness (waking, dreaming and deep sleep) and the nature of reality itself. In the text on which this book is based, he writes that the waker, dreamer and deep-sleeper are like the roles that an actor plays at various times. All three states are the result of ignorance and error. Who we really are is the fourth aspect – the actor himself. If you see or feel a 'thing', then that 'thing' is not 'real.' So the waking world is no more real than the dream. 'You' have never been born. Nothing has ever been created. Causality is a myth. Discover your true nature to be Existence-Consciousness, without limitations, undivided and infinite, prior to time and space. Incredible? Read...and be convinced by the irrefutable logic of Gaudapada.

A Plato Reader Plato,2012-09-15 A Plato Reader offers eight of Plato's best-known works--Euthyphro, Apology, Crito, Meno, Phaedo, Symposium, Phaedrus, and Republic--unabridged, expertly introduced and annotated, and in widely admired translations by C. D. C. Reeve, G. M. A. Grube, Alexander Nehamas, and Paul Woodruff. The collection features Socrates as its central character and a model of the examined life. Its range allows us to see him in action in very different settings and philosophical modes: from the elenctic Socrates of the Meno and the dialogues concerning his trial and death, to the erotic Socrates of the Symposium and Phaedrus, to the dialectician of the Republic. Of Reeve's translation of this final masterpiece, Lloyd P. Gerson writes, Taking full advantage of S. R. Slings' new Greek text of the Republic, Reeve has given us a translation both accurate and limpid. Loving attention to detail and deep familiarity with Plato's thought are evident on every page. Reeve's brilliant decision to cast the dialogue into direct speech produces a compelling impression of immediacy unmatched by other English translations currently available.

Storage Systems Alexander Thomasian,2021-10-13 Storage Systems: Organization, Performance, Coding, Reliability and Their Data Processing was motivated by the 1988 Redundant Array of Inexpensive/Independent Disks proposal to replace large form factor mainframe disks with an array of commodity disks. Disk loads are balanced by striping data into strips—with one strip per disk— and storage reliability is enhanced via replication or

erasure coding, which at best dedicates k strips per stripe to tolerate k disk failures. Flash memories have resulted in a paradigm shift with Solid State Drives (SSDs) replacing Hard Disk Drives (HDDs) for high performance applications. RAID and Flash have resulted in the emergence of new storage companies, namely EMC, NetApp, SanDisk, and Purestorage, and a multibillion-dollar storage market. Key new conferences and publications are reviewed in this book. The goal of the book is to expose students, researchers, and IT professionals to the more important developments in storage systems, while covering the evolution of storage technologies, traditional and novel databases, and novel sources of data. We describe several prototypes: FAWN at CMU, RAMCloud at Stanford, and Lightstore at MIT; Oracle's Exadata, AWS' Aurora, Alibaba's PolarDB, Fungible Data Center; and author's paper designs for cloud storage, namely heterogeneous disk arrays and hierarchical RAID. Surveys storage technologies and lists sources of data: measurements, text, audio, images, and video Familiarizes with paradigms to improve performance: caching, prefetching, log-structured file systems, and merge-trees (LSMs) Describes RAID organizations and analyzes their performance and reliability Conserves storage via data compression, deduplication, compaction, and secures data via encryption Specifies implications of storage technologies on performance and power consumption Exemplifies database parallelism for big data, analytics, deep learning via multicore CPUs, GPUs, FPGAs, and ASICs, e.g., Google's Tensor Processing Units

How to Do Things with Words John Langshaw Austin, 1975 This work sets out Austin's conclusions in the field to which he directed his main efforts for at least the last ten years of his life. Starting from an exhaustive examination of his already well-known distinction between performative utterances and statements, Austin here finally abandons that distinction, replacing it with a more general theory of 'illocutionary forces' of utterances which has important bearings on a wide variety of philosophical problems.

Document Analysis Systems V Daniel Lopresti, Jianying Hu, Ramanujan Kashi, 2003-08-02 This book constitutes the refereed proceedings of the 5th International Workshop on Document Analysis Systems, DAS 2002, held in Princeton, NJ, USA in August 2002 with sponsorship from IAPR. The 44 revised full papers presented together with 14 short papers were carefully reviewed and selected for inclusion in the book. All current issues in document analysis systems are addressed. The papers are organized in topical sections on OCR features and systems, handwriting recognition, layout analysis, classifiers and learning, tables and forms, text extraction, indexing and retrieval, document engineering, and new applications.

Understanding Molecular Simulation Daan Frenkel, Berend Smit, 2001-10-19 Understanding Molecular Simulation: From Algorithms to Applications explains the physics behind the recipes of molecular simulation for materials science. Computer simulators are continuously confronted with questions concerning the choice of a particular technique for a given application. A wide variety of tools exist, so the choice of technique requires a good understanding of the basic principles. More importantly, such understanding may greatly improve the efficiency of a simulation program. The implementation of simulation methods is illustrated in pseudocodes and their practical use in the case studies used in the text. Since the first edition only five years ago, the simulation world has changed significantly -- current techniques have matured and new ones have appeared. This new edition deals with these new developments; in particular, there are sections on: · Transition path sampling and diffusive barrier crossing to simulate rare events · Dissipative particle dynamics as a coarse-grained simulation technique · Novel schemes to compute the long-ranged forces · Hamiltonian and non-Hamiltonian dynamics in the context of constant-temperature and constant-pressure molecular dynamics simulations · Multiple-time step algorithms as

an alternative for constraints · Defects in solids · The pruned-enriched Rosenbluth sampling, recoil-growth, and concerted rotations for complex molecules · Parallel tempering for glassy Hamiltonians Examples are included that highlight current applications and the codes of case studies are available on the World Wide Web. Several new examples have been added since the first edition to illustrate recent applications. Questions are included in this new edition. No prior knowledge of computer simulation is assumed.

Paradise Lost John Milton,1711

Beyond the Information Commons Charles Forrest,Martin Halbert,2020-08-22 In the closing decades of the twentieth century, academic libraries responded to rapid changes in their environment by acquiring and making accessible a host of new information resources, developing innovative new services and collaborative partnerships, and building new kinds of technology-equipped spaces to support changing user behaviors and emerging patterns of learning. The “Information Commons” or “InfoCommons” blossomed in a relatively short amount of time in libraries across North America, and around the world, particularly in Europe and the British Commonwealth. This book is more than a second edition of the 2009 book *A Field Guide to the Information Commons* which documented the emergence of a range of facilities and service programs that called themselves “Information Commons.” This new book updates this review of current practice in the Information Commons and other new kinds of facilities inspired by the same needs and intents, but goes beyond that by describing the continued evolution. This new book is an attempt to answer the question: “What might be the next emerging concept for a technology-enabled, user-responsive, mission-driven form of the academic library?” Like its predecessor, *Beyond the Information Commons* is structured in two parts. First, a brief series of essays explore the Information Commons from historical, organizational, technological, and architectural perspectives. The second part is a field guide composed of more than two dozen representative entries describing various Information Commons using a consistent format that provides both perspective on issues and useful details about actual implementations. Each of these includes photos and other graphics.
