Enabling Technologies for High Spectral-efficiency Coherent Optical Communication Networks Xiang Zhou, Chongjin Xie, 2016-04-11 Enabling Technologies for High Spectral-efficiency Coherent Optical Communication Networks Presents the technological advancements that enable high spectral-efficiency and high-capacity fiber-optic communication systems and networks This book examines key technology advances in high spectral-efficiency fiber-optic communication systems and networks, enabled by the use of coherent detection and digital signal processing (DSP). The first of this book's 16 chapters is a detailed introduction. Chapter 2 reviews the modulation formats, while Chapter 3 focuses on detection and error correction technologies for coherent optical communication systems. Chapters 4 and 5 are devoted to Nyquist-WDM and orthogonal frequency-division multiplexing (OFDM). In chapter 6, polarization and nonlinear impairments in coherent optical communication systems are discussed. The fiber nonlinear effects in a non-dispersion-managed system are covered in chapter 7. Chapter 8 describes linear impairment equalization and Chapter 9 discusses various nonlinear mitigation techniques. Signal synchronization is covered in Chapters 10 and 11. Chapter 12 describes the main constraints put on the DSP algorithms by the hardware structure.

Chapter 13 addresses the fundamental concepts and recent progress of photonic integration. Optical performance monitoring and elastic optical network technology are the subjects of Chapters 14 and 15. Finally, Chapter 16 discusses spatial-division multiplexing and MIMO processing technology, a potential solution to solve the capacity limit of single-mode fibers. Contains basic theories and up-to-date technology advancements in each chapter Describes how capacity-approaching coding schemes based on low-density parity check (LDPC) and spatially coupled LDPC codes can be constructed by combining iterative demodulation and decoding Demonstrates that fiber nonlinearities can be accurately described by some analytical models, such as GN-EGN model Presents impairment equalization and mitigation techniques Enabling Technologies for High Spectral-efficiency Coherent Optical Communication Networks is a reference for researchers, engineers, and graduate students.

Expanding Opportunities to Link Research and Clinical Practice JoAnne Ferrara, Janice L. Nath, Irma N. Guadarrama, Ronald Beebe, 2017-03-01 This volume in the Research in Professional Development Schools book series considers the role professional development schools (PDSs) play in expanding opportunities for linking research and clinical practice. As in past volumes of this series, PDS practitioners and researchers make a compelling case for the power of micro-level initiatives to change practice. Contributors share ideas to expand PDS work beyond site-specific contexts to include a broader

macro?level agenda for clinical practice. Authors hope to inspire large scale PDS reform through replication of successful initiatives featured in this volume. Evoking change is not easy. Nonetheless, series editors and contributors conclude that PDSs generate a critical mass of PK-16 educators willing to form partnerships to address enduring educational dilemmas. This volume represents a cross section of PDS stakeholders engaged in research along with innovative projects that uncover the richness of clinical practice. Higher education faculty, school practitioners, and preservice teachers featured in these chapters explore the ways PDSs deepen clinical practice while enriching teaching and learning. We begin with the discussion by Beebe, Stunkard, and Nath on the National Association for Professional Development School's (NAPDS's) role to support teacher candidates' clinical practice through the cooperative efforts of university and school?based personnel. The authors explain NAPDS' history and advocacy over the years to promote a context for schooluniversity partnerships to thrive and expand. As the premier association guiding the work of collaborative P-12/higher education partnerships, we welcome the insightful perspectives provided.

Digital Economies at Global Margins Mark Graham, 2019-02-12 Investigations of what increasing digital connectivity and the digitalization of the economy mean for people and places at the world's economic margins. Within the last decade, more than one billion people became new Internet users. Once, digital connectivity was confined to economically prosperous parts of the world; now Internet users make up a majority of the world's population. In this book, contributors from a range of disciplines and locations investigate the impact of increased digital connectivity on people and places at the world's

economic margins. Does the advent of a digitalized economy mean that those in economic peripheries can transcend spatial, organizational, social, and political constraints—or do digital tools and techniques tend to reinforce existing inequalities? The contributors present a diverse set of case studies, reporting on digitalization in countries ranging from Chile to Kenya to the Philippines, and develop a broad range of theoretical positions. They consider, among other things, data-driven disintermediation, women's economic empowerment and gendered power relations, digital humanitarianism and philanthropic capitalism, the spread of innovation hubs, and two cases of the reversal of core and periphery in digital innovation. Contributors Niels Beerepoot, Ryan Burns, Jenna Burrell, Julie Yujie Chen, Peter Dannenberg, Uwe Deichmann, Jonathan Donner, Christopher Foster, Mark Graham, Nicolas Friederici, Hernan Galperin, Catrihel Greppi, Anita Gurumurthy, Isis Hjorth, Lilly Irani, Molly Jackman, Calestous Juma, Dorothea Kleine, Madlen Krone, Vili Lehdonvirta, Chris Locke, Silvia Masiero, Hannah McCarrick, Deepak K. Mishra, Bitange Ndemo, Jorien Oprins, Elisa Oreglia, Stefan Ouma, Robert Pepper, Jack Linchuan Qiu, Julian Stenmanns, Tim Unwin, Julia Verne, Timothy Waema

It presents 34 selected papers from the 18th International Conference on Hybrid Intelligent Systems (HIS 2019) and 9 papers from the 15th International Conference on Information Assurance and Security (IAS 2019), which was held at VIT Bhopal University, India, from December 10 to 12, 2019. A premier conference in the field of artificial intelligence, HIS - IAS 2019

brought together researchers, engineers and practitioners whose work involves intelligent systems, network security and their applications in industry. Including contributions by authors from 20 countries, the book offers a valuable reference guide for all researchers, students and practitioners in the fields of Computer Science and Engineering.

Online Maps with APIs and WebServices Michael P. Peterson, 2012-03-30 The Internet has become the major form of map delivery. The current presentation of maps is based on the use of online services. This session examines developments related to online methods of map delivery, particularly Application Programmer Interfaces (APIs) and MapServices in general, including Google Maps API and similar services. Map mashups have had a major impact on how spatial information is presented. The advantage of using a major online mapping site is that the maps represent a common and recognizable representation of the world. Overlaying features on top of these maps provides a frame of reference for the map user. A particular advantage for thematic mapping is the ability to spatially reference thematic data.

ICCSM2014-Proceedings of the International Conference on Cloud Security Management ICCSM-2014 Barbara Endicott-Popovsky,2014-10-07 These Proceedings are the work of researchers contributing to the 2nd International Conference on Cloud Security Management Security (ICCSM 2014), being held this year at the University of Reading, UK on the 23-24 October 2014, . The conference chair is Dr John McCarthy, Vice President, from the Cyber Security, ServiceTech, UK and the Programme Chair is Dr. Barbara Endicott-Popovsky, from the Center for Information Assurance and Cybersecurity, University of Washington, Seattle, USA. As organisations rush to adopt Cloud Computing at a rate faster than originally projected, it is safe to predict that, over the coming years,

Cloud Computing will have major impacts, not only on the way we conduct science and research, but also on the quality of our daily human lives. Computation research, education, and business communities have been exploring the potential benefits of Cloud Computing and the changes these imply. Experts have predicted that the move to the cloud will alter significantly the content of IT jobs, with cloud clients needing fewer hands-on skills and more skills that administer and manage information. Bill Gates was recently quoted: How you gather, manage, and use information will determine whether you win or lose. Cloud Computing impacts will be broad and pervasive, applying to public and private institutions alike.

By highlighting the different technological nuances that need to be incorporated into successful e-government designs, this book is a useful tool for professionals and researchers concerned with the organizational development in different types of e-government communities and environments.

Perception of Energy Experts on the Adoption of Energy Efficient Technology Ir. Dr. THIRUMALAICHELVAM SUBRAMANIAM, 2019-04-22 Barriers to commercial and industrial energy efficiency improvements in Klang Valley, Malaysia are more pronounced due to the existence of factors such as weak policy and regulatory frameworks, economic

and financial constraints, lack of information, and other issues. This research utilized a qualitative research methodology using a phenomenology approach aimed at enhancing the knowledge of commercial and industrial energy efficiency in Klang Valley, Malaysia by investigating the barriers associated with the implementation of energy efficiency measure. The eleven main themes and twenty-eight sub-themes identified from the study revealed that energy is poorly managed in the various commercial and industrial sectors and that there is an energy efficiency gap resulting from the low implementation of energy efficiency measures. In addition, the study revealed that the most important factors impeding the implementation of cost-effective energy efficiency technologies in the organizations are principally economic and financial barriers such as lack of budget funding and access to capital. The study also revealed that these economic and financial barriers are linked to the lack of adequate government framework for commercial and industrial energy efficiency. The study also showed that market factors related to cost reductions resulting from lowered energy use and threats of rising energy prices are the most important drivers for adapting energy efficiency technologies. To motivate energy efficiency, there should be established standards, guidelines, roadmaps, regulations, and enforcement of regulation suitable for the local environment, which at present has not been executed completely in Malaysia.
